Overview

Purpose of this document

The purpose of this document is to provide guidance, context, and instruction on the processes for Uploading files to Comply. This will include:

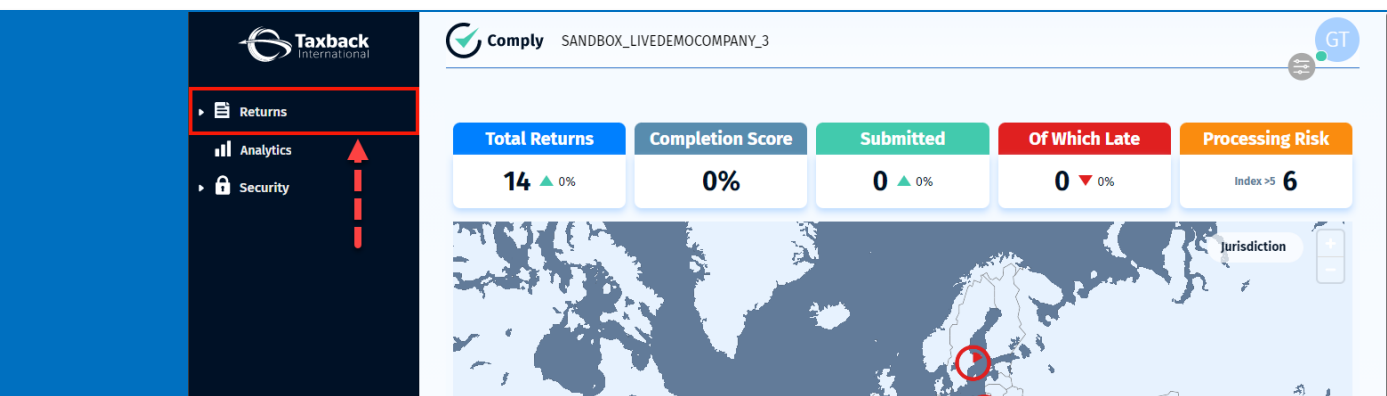

- Uploading Data Files for Return (For clients not using API for uploads)
- Files uploaded (For Clients using API for Uploads)
- Uploading Supporting Documents

1. Upload a Data File for Return (Non API)

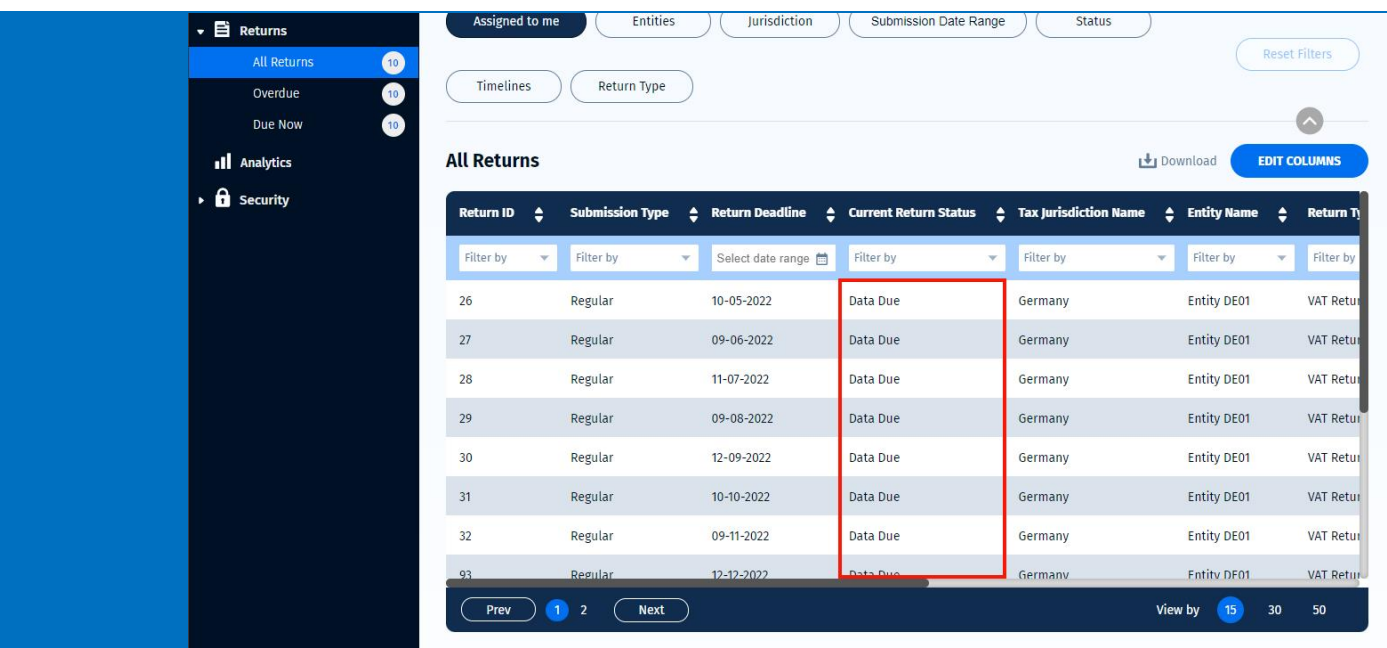

For clients not using an API to automatically upload their transactions into Comply, they will be required to manually upload a Data File (taken from their ERP system) into Comply.

Based on configured Scheduler, the **Data Provider** (User in Comply responsible for uploading data) will be notified that Data is Due. When they log into Comply and visit the Returns Tab, they will see all the returns which are on a status of **Data Due**.

1. Navigate to the Returns Menu.

2. By default, the returns displayed will be all returns those assigned to you.

Set a data range filter if you wish to display returns for a specific period only.

- Click the return you wish to upload a **Data File for Return** for. For this example, I (as the Data Provider) am required to upload a date for the return ID 27. It is currently displaying as **Data Due**, it is for the **Return Period April 2022**, with a **Return Deadline of 09/06/2022**.

CHOOSE FILE

4. Upload the Data File. To select the file from its current location the user can:

Note: Password protected files cannot be uploaded.

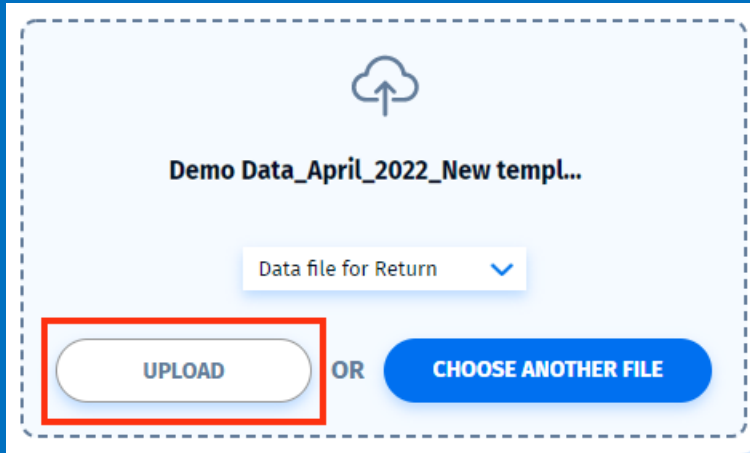

- **Drag and Drop** a file
- Click the **Choose File** button.

The screenshot shows the 'Return 27' interface in the Comply system. At the top, there's a header with the Comply logo and 'SANDBOX_LIVEDEMOCOMPANY_3'. Below this, a table lists return details: Jurisdiction (Germany), Entity (Entity DE01), Type (VAT Return), Frequency (Monthly), Period (Apr 2022), Status (Data Due), and Filing Deadline (2022-06-09). A 'Return Timeline' section shows due dates for Data, Preparation, Review, Approval, and Submission, all marked as 'Not Completed'. A navigation bar includes buttons for 'Files', 'Data Validation', 'Transactions', 'Return Validation', and 'Return Review'. The 'Data Files' tab is active, showing 'No data to show'. A red box highlights the 'UPLOAD ADDITIONAL FILES' section, which contains a cloud upload icon, the text 'Drag and drop file here', 'OR', and a 'CHOOSE FILE' button.

5. From the drop-down menu, select **Data File for Return**.

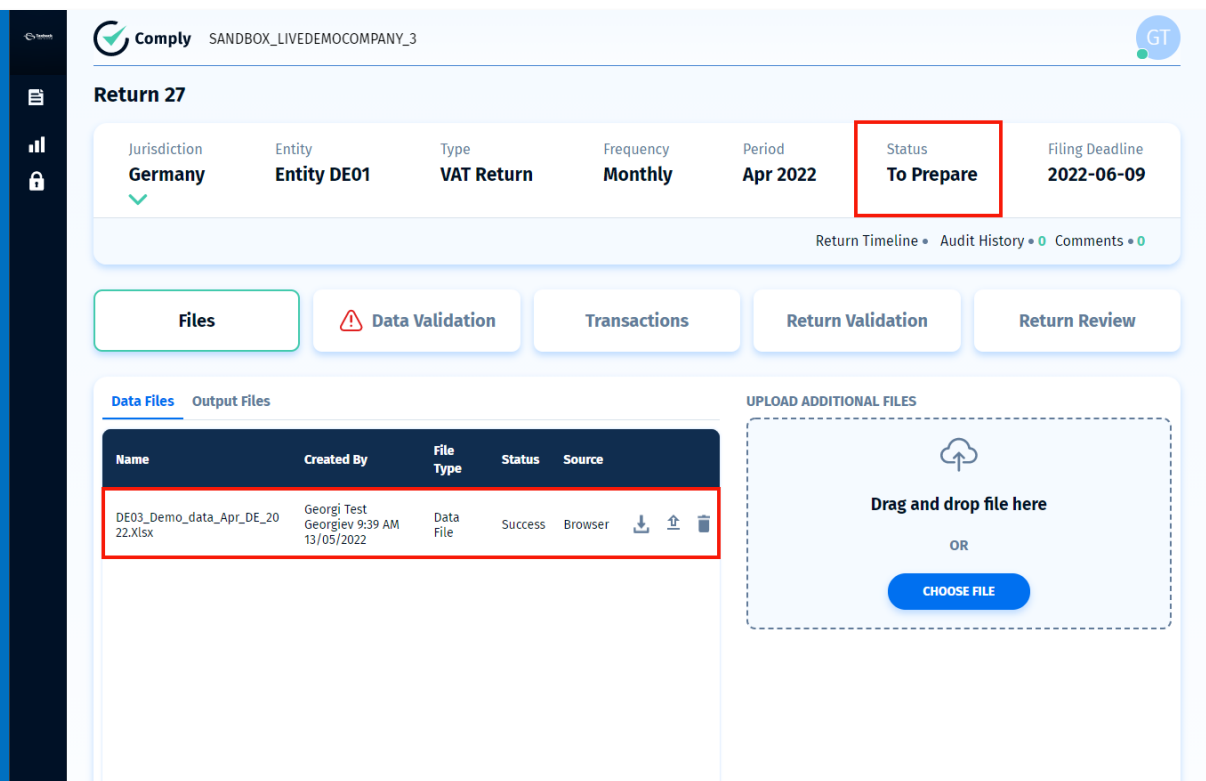

This close-up shows the file upload area. A dashed box contains a cloud upload icon and the text 'Demo Data_April_2022_New templ...'. Below this, a dropdown menu is open, showing three options: 'Supporting Document', 'Data file for Return' (which is highlighted with a red box and a mouse cursor), and 'Supporting Document'. At the bottom of the dashed box are two buttons: 'UPLOAD' and 'ANOTHER FILE'.

- Once the **Data File for Return** is attached, click **Upload**.

The file is then uploaded and goes through a data transformation process, which runs the data against the comply rules engine to ensure the data is in good order to run through Comply.

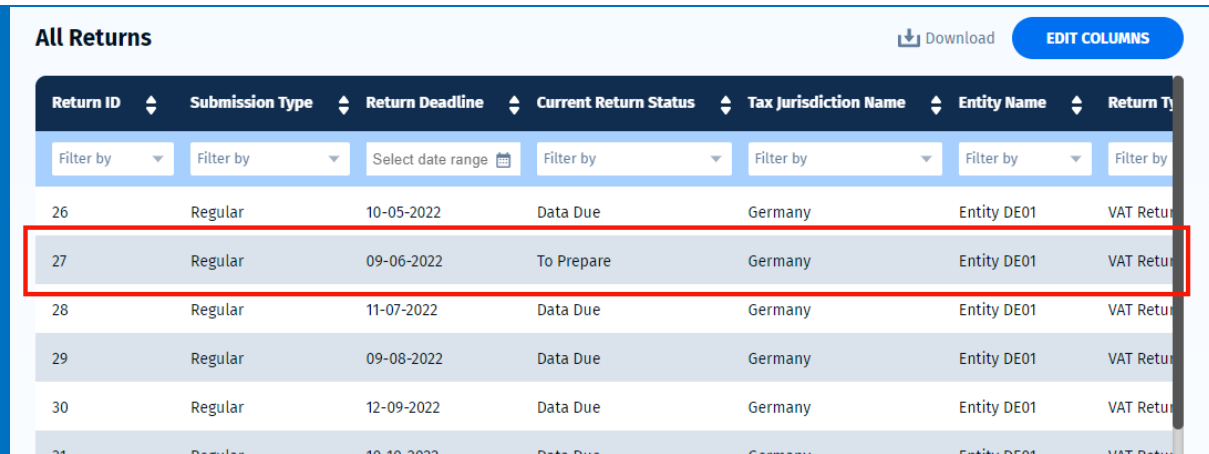

Once complete, the return status changes to **To Prepare**.

Jurisdiction	Entity	Type	Frequency	Period	Status	Filing Deadline
Germany	Entity DE01	VAT Return	Monthly	Apr 2022	To Prepare	2022-06-09

Name	Created By	File Type	Status	Source
DE03_Demo_data_Apr_DE_2022.Xlsx	Georgi Test Georgiev 9:39 AM 13/05/2022	Data File	Success	Browser

Based on the assigned due date for the Data Preparation step, a notification is sent to the Data Preparer (providing they have configured their notifications settings), and the Return will now be visible for them in their Returns section once they login.

All Returns Download EDIT COLUMNS

Return ID	Submission Type	Return Deadline	Current Return Status	Tax Jurisdiction Name	Entity Name	Return Type
26	Regular	10-05-2022	Data Due	Germany	Entity DE01	VAT Return
27	Regular	09-06-2022	To Prepare	Germany	Entity DE01	VAT Return
28	Regular	11-07-2022	Data Due	Germany	Entity DE01	VAT Return
29	Regular	09-08-2022	Data Due	Germany	Entity DE01	VAT Return
30	Regular	12-09-2022	Data Due	Germany	Entity DE01	VAT Return
31	Regular	10-10-2022	Data Due	Germany	Entity DE01	VAT Return

That completes the process for the **Data Provider**.

2. Upload a Data File for Return (API Users)

For clients using APIs for data upload, it is key that during onboarding the Data Provider role is assigned to **System Bot** (as opposed to a physical user). This is generally configured during onboarding or by an Admin User.

Security > User Roles

The screenshot shows the 'User Roles' configuration page in the Taxback International Comply interface. The left sidebar contains navigation links: Returns, Transactions, Payments, Analytics, Security (selected), User Details, User Management, User Roles (highlighted), and Settings. The main content area is titled 'Add roles for each user per jurisdiction by selecting in the dropdown under each entity. The role of each user allows them different levels of access'. A dropdown menu shows 'Entity PL 1'. Below it, a table lists roles for different jurisdictions. The 'Data Provider' column is highlighted with a red box, showing 'System Bot' for 'Poland'. Other roles like 'Preparer', 'Reviewer', and 'Approver' are also shown with dropdown menus.

Jurisdiction	Data Provider	Preparer	Reviewer	Approver
Apply to All	Select User	Select User	Select User	Select User
Poland	System Bot	Keith O'Sullivan	Keith O'Sullivan	Keith O'Sullivan

All relevant client data (Transactions) will be uploaded via the API and pushed through preconfigured mapping and validation. The Return details will be made available to the Preparer and will have a status of **To Prepare**.

2.1. Return Statuses In Comply

Clients using API to upload return data (Transactions) will only manually process returns in Comply which have a status of **To Prepare**.

Data Due	Return Status Displayed
Prior to first transaction pushed via API	Data Due
After first transaction pushed via API	To Prepare

2.1.1. Before first transaction is pushed via API

All Returns (1) 

Return ID	Submission Type	Return Deadline	Current Return Status	Tax Jurisdiction Name	Entity Name	Is Return
Filter by	Filter by	Select date range	Data Due	Germany	Filter by	Select Is
452	Regular	14-11-2022	Data Due	Germany	DE1	No

2.1.2. After first transaction is pushed via API

All Returns (1) 

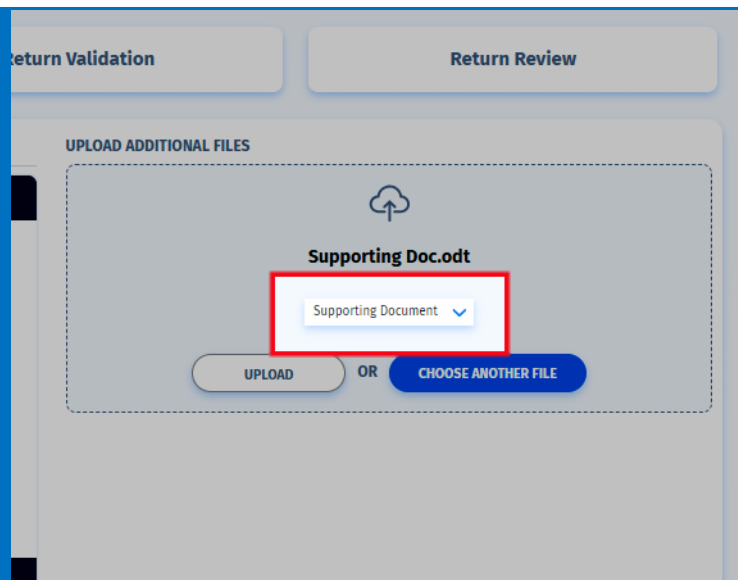

Return ID	Submission Type	Return Deadline	Current Return Status	Tax Jurisdiction Name	Entity Name	Is Return
Filter by	Filter by	To Prepare Select date range	Data Due	Germany	Filter by	Select Is
452	Regular	14-11-2022	Data Due	Germany	DE1	No

3. Upload a Supporting Document

Uploading additional files which provide supporting information is possible, but this information is not used in the calculation or generation of the return.

To do this:

1. In the files tab, click to **Upload** or **Drag and Drop** a file to add.
2. Select **Supporting Document** from the drop-down menu
Depending on the file type, Supporting Document may be the only option.

3. Click **Upload**.
