1. Purpose of this document

The purpose of this document is to provide guidance, context, and instruction for users to successfully add and/or update user roles within Comply.

Note: This process is available to Admin users only.

2. Overview

There are 5 Mandatory roles in Comply:

- Data Provider – person responsible for providing the data for the return.
- Preparer – person responsible for preparing the return.
- Reviewer – person responsible for reviewing the return.
- Approver – person responsible for approving the return.
- Submitter – person responsible for submitting the return.

A user must be selected for each mandatory role in each jurisdiction

Welcome to Comply!

Complete the steps below to get up and running

- Set up your company details**
Please fill our excel template and reupload it for us
- Set up your list of users**
Please share your contact list for users
- Set up user roles**
Please set up user roles for entities

Add roles for each user per jurisdiction by selecting in the dropdown under each entity. The role of each user allows them different levels of access to each entities data.

Entity PL 1

Jurisdiction	Data Provider	Preparer	Reviewer	Approver	Submitter	Payment Approver	Tr
Apply to All	Select User	Select User	Select User	Select User	Select User	Select User	S
Poland	Select User	Select User	Select User	Select User	Select User	Select User	S

There will be 2 versions of Comply offered to clients:

- Managed Service – Where TBI Staff will manage a large proportion of the day-to-day task on behalf of the client.
- Self Service – Where the client will manage most of the day-to-day tasks locally.

In either case, these roles must be assigned to one of the following groups:

- Client Staff
- Taxback International (TBI) Staff
- System Bot (for use when using API's for Data Upload)

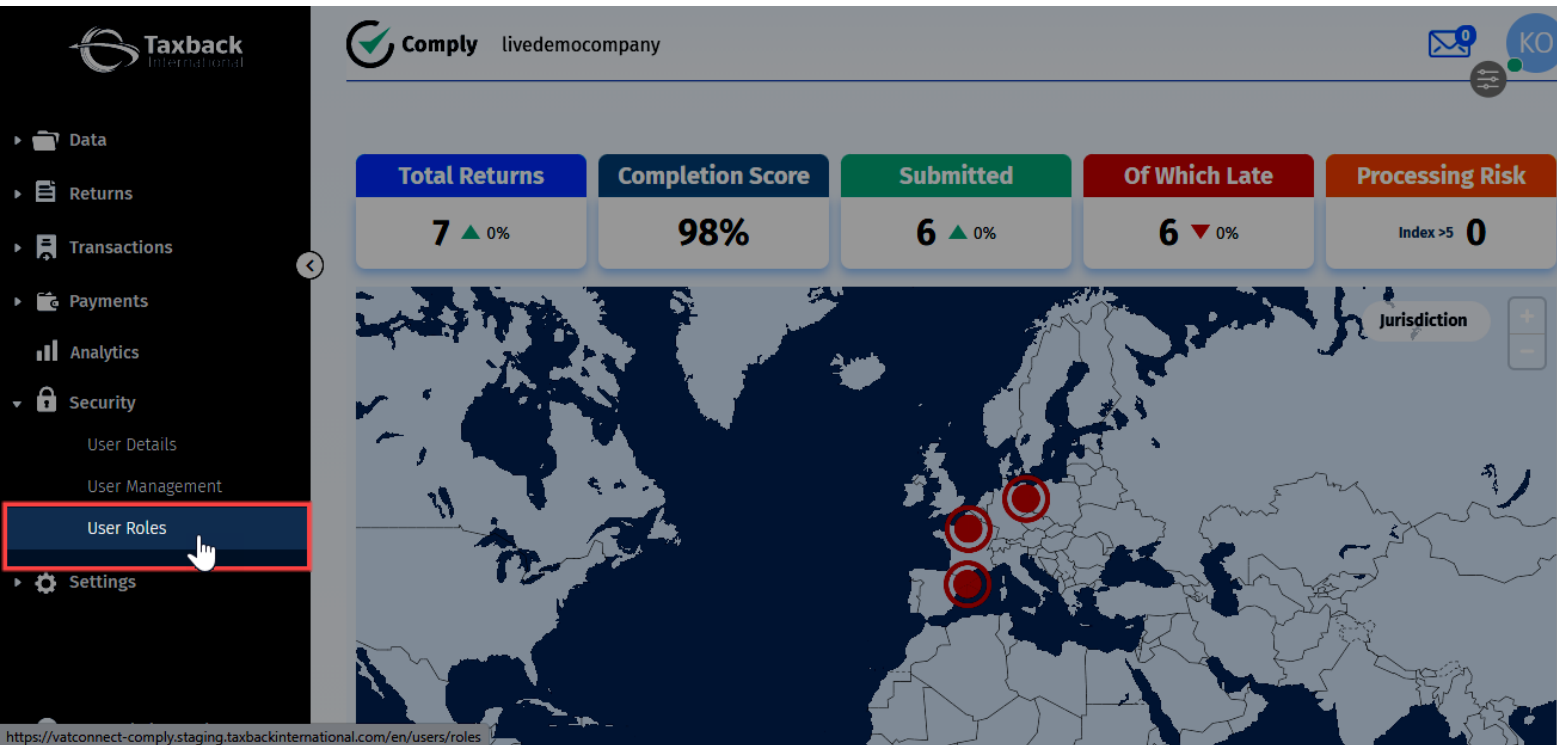

Note 1: A Company could potentially consist of multiple jurisdictions. If so, roles/users should be assigned to tasks for each jurisdiction as required.

Note 2: If the same roles/users are to perform the same tasks for each jurisdiction, the user can select the roles from the drop-down options beside "Apply to All".

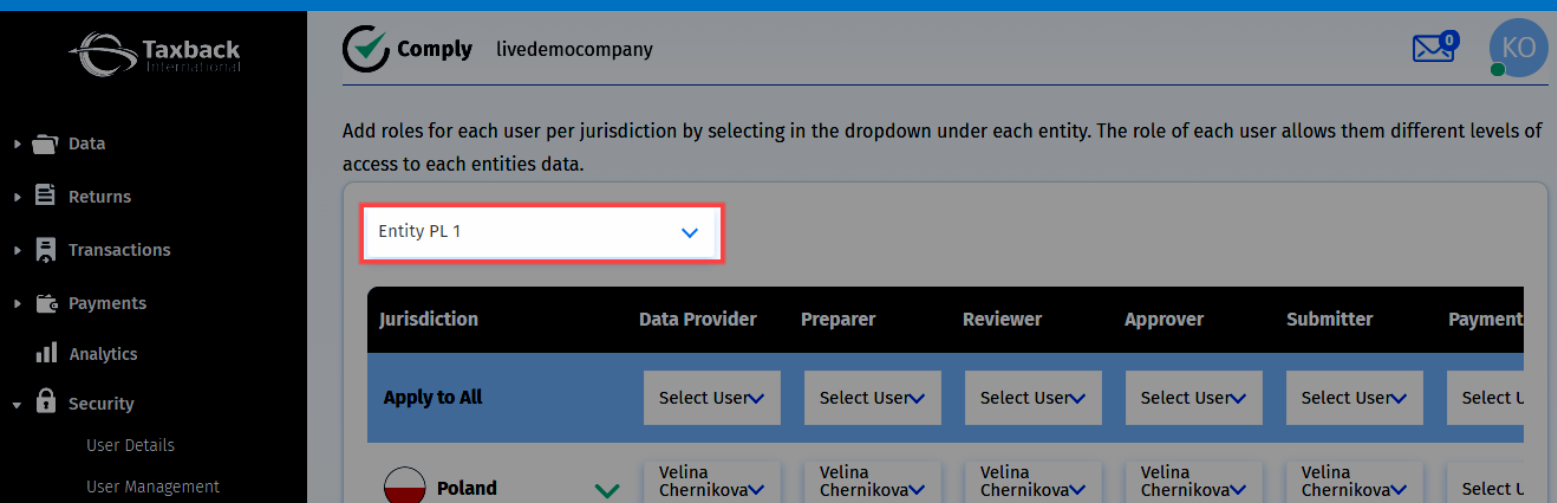

3. Set up User Roles

To assign a role/user to a task:

1. Go to Menu.
2. Click **Security**.
3. Click on the **User Roles** sub-menu.

4. Click the **Entity** drop-down menu. This allows the user to manage the roles at Entity level.

5. Select the relevant **Entity**.

The screenshot shows the Taxback Comply interface for 'livedemocompany'. On the left is a sidebar with navigation options: Data, Returns, Transactions, Payments, Analytics, and Security (with sub-items User Details and User Management). The main area has a header with the Comply logo and a user profile 'KO'. Below the header is a text instruction: 'Add roles for each user per jurisdiction by selecting in the dropdown under each entity. The role of each user allows them different levels of access to each entities data.' A dropdown menu for 'Entity PL 1' is open, showing a search bar and a list of entities: 'Entity PL 1' (highlighted with a red box and a hand cursor), 'UK Entity 1', 'Entity DE01', and 'Entity FR22'. In the background, a table shows roles (Provider, Preparer, Reviewer, Approver, Submitter, Payment) and users (Velina Chernikova) with 'Select User' buttons.

The roles are now displayed for the selected Entity.

The user has 2 options:

- Assign users to roles which will apply to all jurisdictions.
- Assign different users to roles for specific jurisdictions.

3.1. Assign User Roles to all Jurisdictions

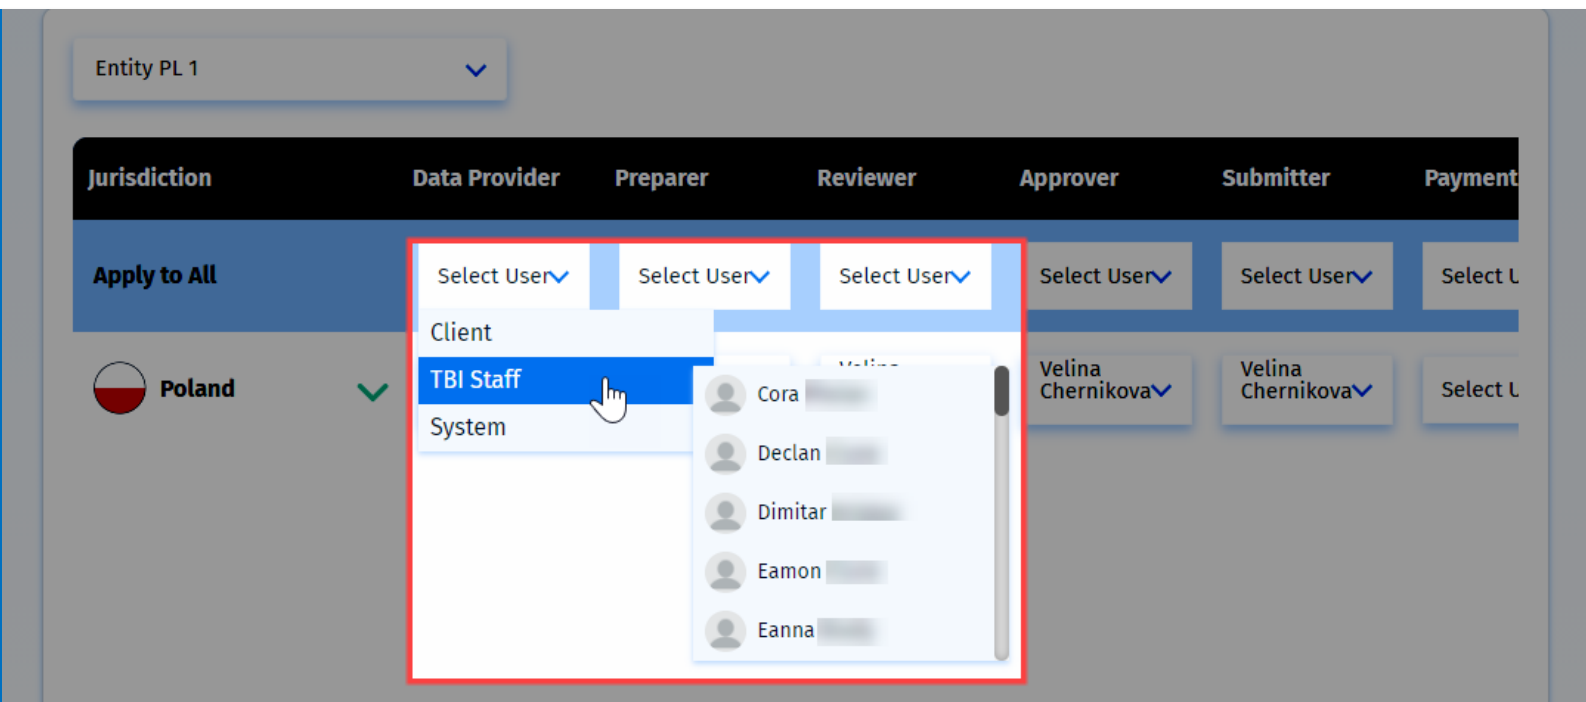

1. Click the **Select User** drop-down menu for the relevant role at the **Apply to All** level.

Add roles for each user per jurisdiction by selecting in the dropdown under each entity. The role of each user allows them different levels of access to each entities data.

The screenshot shows the Taxback Comply interface for 'livedemocompany'. The 'Entity' dropdown is set to 'Entity PL 1'. Below it is a table with columns: Jurisdiction, Data Provider, Preparer, Reviewer, Approver, Submitter, and Payment. The first row is 'Apply to All'. The 'Data Provider' column for 'Apply to All' has a dropdown menu open, showing a search bar and a list of users: 'Select User' (highlighted with a red box), 'Client', 'TBI Staff', and 'System'. The 'Poland' jurisdiction is shown with a green checkmark. The 'Preparer', 'Reviewer', 'Approver', and 'Submitter' columns for 'Poland' show the user 'Velina Chernikova' with a dropdown arrow. The 'Payment' column for 'Poland' has a 'Select User' button.

2. Select whether the user is a **Client**, **TBI Staff** or **System** user.

3. Select the user to be assigned to that role.

4. Repeat these steps for each role.
5. Click **Submit**.

Note 1 - It may be the case that the **Preparer** and **Submitter** is the same person, but there are rules built in to prevent the Preparer and Reviewer from being the same person.

Note 2 – The **Reviewer** and **Approver** roles can be assigned to the system user which will automatically approve the return for that stage in the process.

Note 3 – Additional non-mandatory roles are also available for completion, these are:

- Payment Approver – Applies to TBI Pay service.
- Treasurer – Applies to TBI Pay service.
- Escalation TBI – more than one approved user can be appointed here as a point of escalation.
- Escalation Client – more than one approved user can be appointed here as a point of escalation.

3.2. Assign User Roles by Jurisdiction

Each entity may have multiple jurisdictions and different users may be assigned to complete different tasks. To do this:

1. At the Jurisdiction level, click the relevant user drop-down.
2. Select the Role type: **Client**, **TBI Staff** or **System** user.
3. Select the relevant user to be assigned to that role.

Entity PL 1

Jurisdiction	Data Provider	Preparer	Reviewer	Approver	Submitter	Payment
Apply to All	Select User	Select User	Select User	Select User	Select User	Select User
Poland	Velina Chernikova	Velina Chernikova	Velina Chernikova	Velina Chernikova	Velina Chernikova	Select User
	Client	TBI Staff				
	System					
		Ivan C. Bankov				
		Karan Nijhawan				
		Keith O'Sullivan				
		Mag Swan				

4. Repeat for each relevant role.

Jurisdiction	Data Provider	Preparer	Reviewer	Approver	Submitter	Payment Approver
Apply to All	Select User	Select User	Select User	Select User	Select User	Select User
Poland	client	Keith O'Sullivan	Keith O'Sullivan	client	Keith O'Sullivan	Keith O'Sullivan

5. If there are multiple Jurisdictions, repeat steps 1 – 4 for each one. (See example on next page)

Add roles for each user per jurisdiction by selecting in the dropdown under each entity. The role of each user allows them different levels of access to each entities data.

Entity 1 

Jurisdiction	Data Provider	Preparer	Reviewer	Approver	Submitter	Payment Appro
Apply to All	Select User 	Select User 	Select User 	Select User 	Select User 	Select User 
 United Kingdom 	Demo User 	Demo User 	Demo User 	Demo User 	Demo User 	Demo User
 Germany 	Select User 	Select User 	Select User 	Select User 	Select User 	Select User

6. Click **Submit**.

Note 1 - It may be the case that the **Preparer** and **Submitter** is the same person, but there are rules built in to prevent the Preparer and Reviewer from being the same person.

Note 2 – The **Reviewer** and **Approver** roles can be assigned to the system user which will automatically approve the return for that stage in the process.

Note 3 – Additional non-mandatory roles are also available for completion, these are:

- Payment Approver – Applies to TBI Pay service.
- Treasurer – Applies to TBI Pay service.
- Escalation TBI – more than one approved user can be appointed here as a point of escalation.
- Escalation Client – more than one approved user can be appointed here as a point of escalation.
