Overview

Purpose of this document

The purpose of this document is to provide guidance, context, and instruction for processing returns as they relates to VAT, VIES and Control Lists. This process has been updated in the latest version of the Comply platform.

This module will include topics such as:

- Uploading/Editing/Deleting the Data File for Return
- Uploading Data Files for Returns with Longer/Shorter Periods
- Associated Transactions
- Manually Adding Transactions
- Editing Transactions
- Excluding Transactions
- Self Revisions
- Audit History
- Email Alerts and Notifications

Please Note: These changes do not Apply to Slovakia. Associated VAT Transactions for Slovakian Control Lists were covered in a previous release.

1. Uploading the Data File (Same Return Frequency)

Where the user is required to file VAT, VIES and / or Control List returns, Comply allows the user to upload the Data File to any of these individual return types and the relevant transactions will be automatically assigned to each of the other related return types.

E.g. If the User uploads the Data File for Return to the VAT Return, and there are transactions included which are relevant to the VIES and Control List returns, then these transactions will be added to the associated VIES and Control List returns automatically.

1.1. Upload Data File to the VAT Return

1.1.1. Data Upload

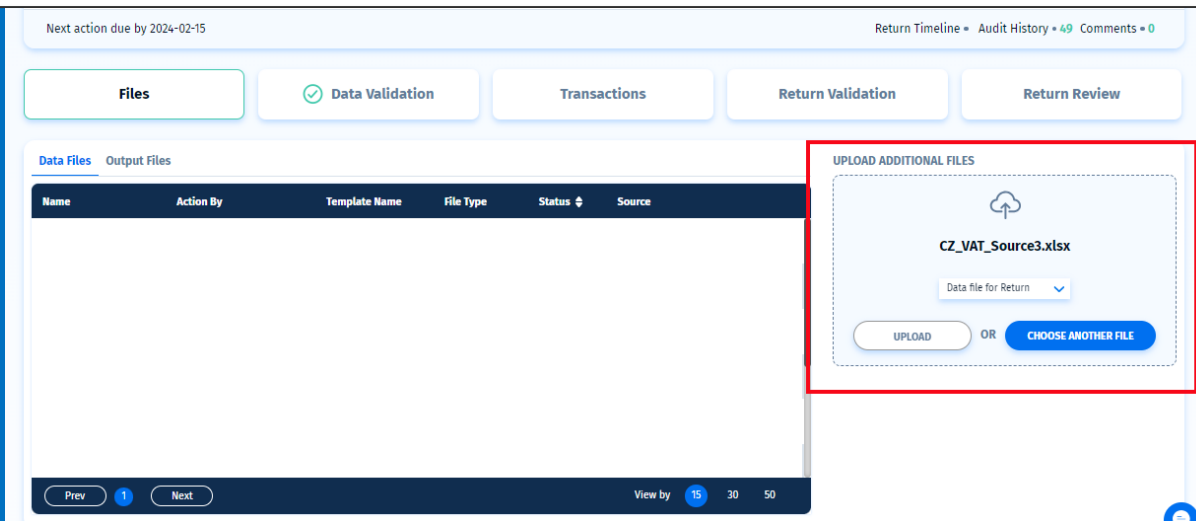

1. Open the All Returns screen.

If you wish, you can filter the All Returns Screen to display the relevant filing requirements you are to process.

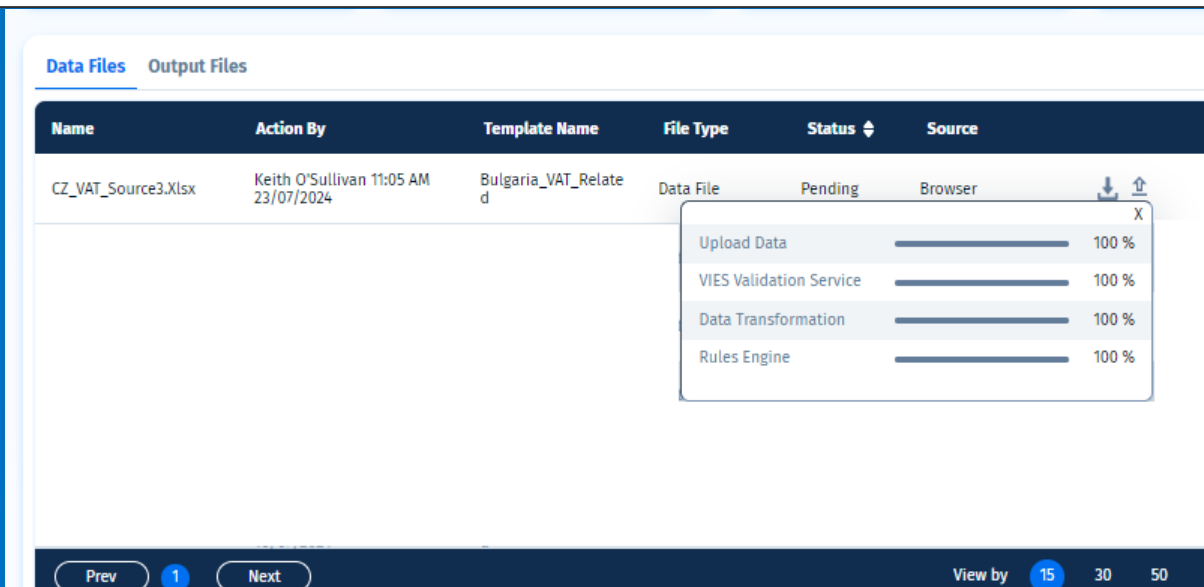

Deadline	Current Return Status	Tax Jurisdiction Name	Entity Name	Return Type	Return Frequency	Current Return Status
range	Data Due	Czech R...	CZ_V...	Filter by	Filter by	Select date range
	Data Due	Czech Republic	CZ_VAT_VIES_Control	VAT Return	Monthly	10-12-2024
	Data Due	Czech Republic	CZ_VAT_VIES_Control	VIES Return	Monthly	10-12-2024
	Data Due	Czech Republic	CZ_VAT_VIES_Control	Control List	Monthly	10-12-2024

Here you can see that for the specific period, the user is required to file each return type for that period.

2. Open the **VAT Return**.
3. Upload the **Data File for Return**.

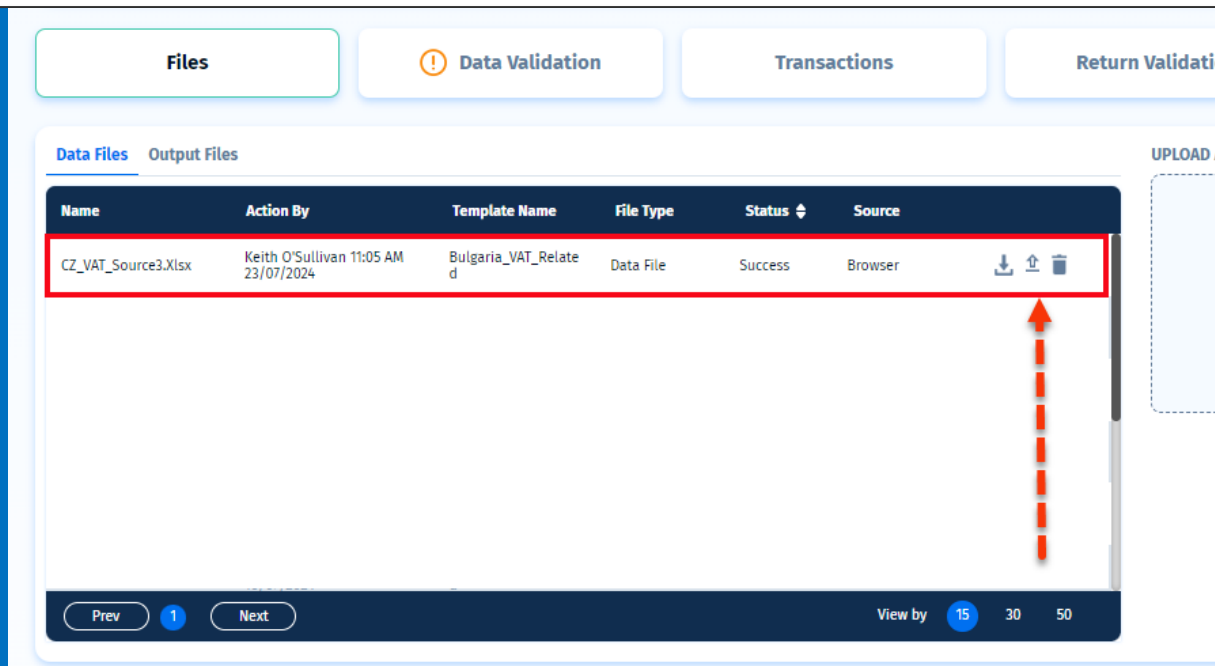

The transformation process begins...

The progress indicators are displayed, and the Data File is displayed as **Pending**.

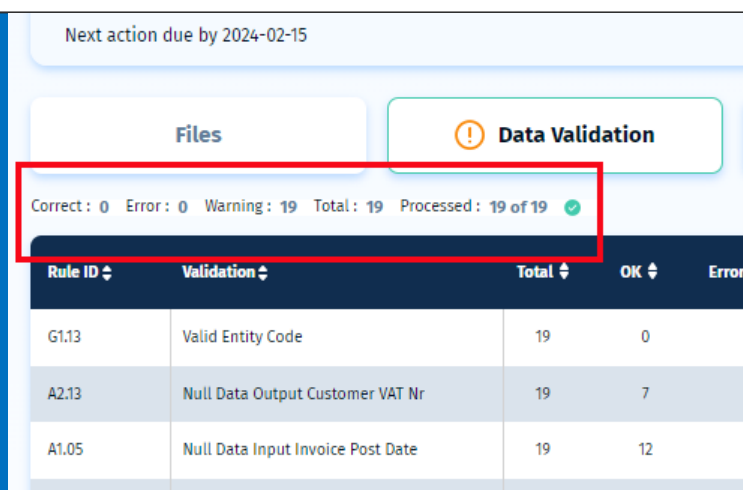

Upon successful upload, the Data File is displayed in the **Files** tab as successful, and the file can be downloaded/ deleted as required.

The status of the Return now moves to **To Prepare**, and the Data Validation tab will display the results of the Rules validating the data which was uploaded.

The Data Validation Tab will show all transactions as:

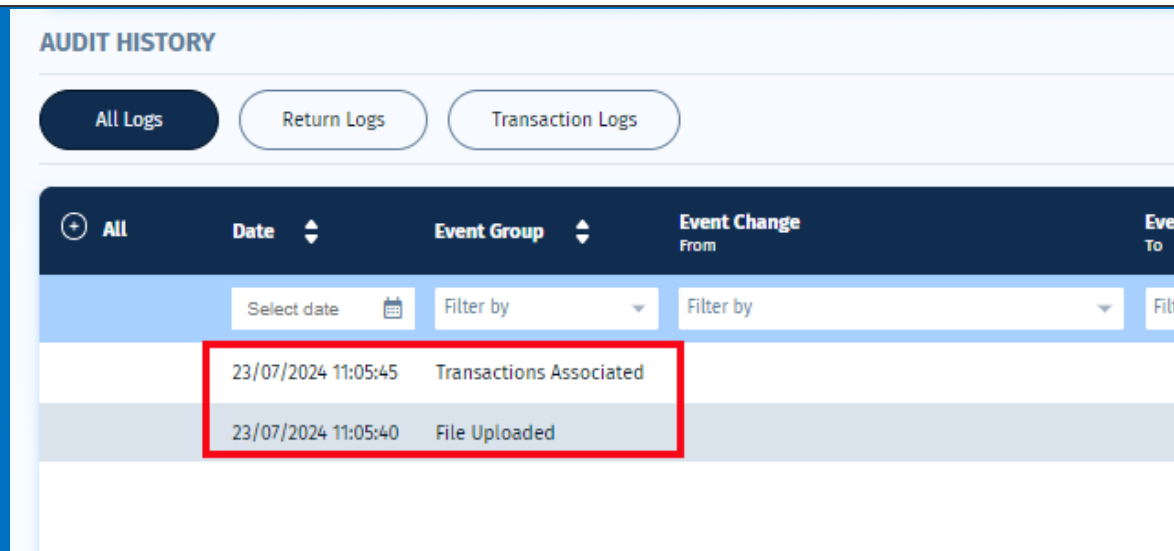

- Success
- Error
- Warning

The preparer is required to review any Warnings/Errors at this step to ensure all Data uploaded is correct and in good order for filing. If there are any, these need to be actioned before filing.

1.1.2. Audit History

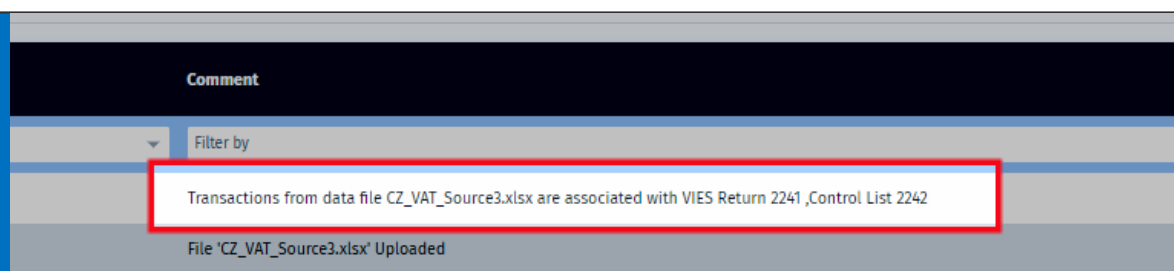

The successful upload triggers the following in the Audit History.

AUDIT HISTORY				
All Logs Return Logs Transaction Logs				
+	All	Date	Event Group	Event Change From To
		Select date	Filter by	Filter by
		23/07/2024 11:05:45	Transactions Associated	
		23/07/2024 11:05:40	File Uploaded	

- Log of the **File upload**.
- Log of the **Transactions Associated**.

This log includes a comment outlining the Return IDs for the associated transactions.

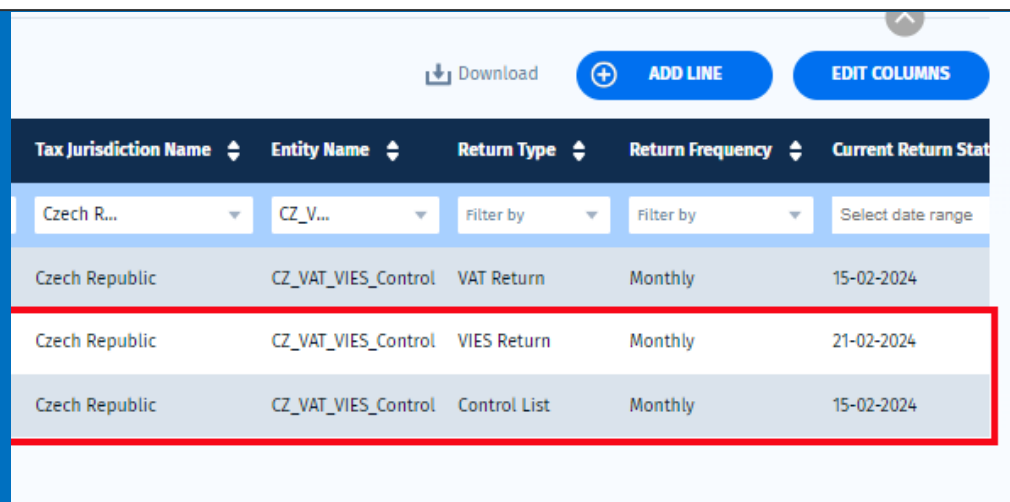

Comment
Filter by
Transactions from data file CZ_VAT_Source3.xlsx are associated with VIES Return 2241 ,Control List 2242
File 'CZ_VAT_Source3.xlsx' Uploaded

1.1.3. Associated Transactions

Once the Data File has been uploaded to the VAT Return, Comply now looks at the uploaded Transactions and automatically adds the relevant ones to the associated VIES/Control List for the same Period.

To see this, the user can go back to the All Returns screen and locate the associated VIES/Control List.

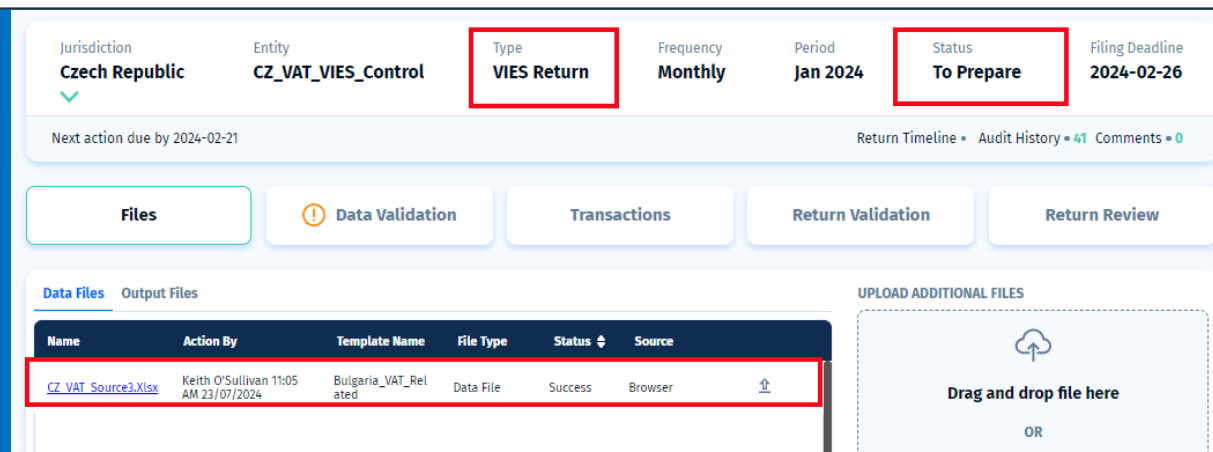

Tax Jurisdiction Name	Entity Name	Return Type	Return Frequency	Current Return Stat
Czech R...	CZ_V...	Filter by	Filter by	Select date range
Czech Republic	CZ_VAT_VIES_Control	VAT Return	Monthly	15-02-2024
Czech Republic	CZ_VAT_VIES_Control	VIES Return	Monthly	21-02-2024
Czech Republic	CZ_VAT_VIES_Control	Control List	Monthly	15-02-2024

1. Open the associated **VIES Return**.

The following have been automatically triggered in the VIES Return:

- The Status has moved to **To Prepare** in-line with the Associated VAT Return.
- The **Files Tab** has been populated with a link to the Data File for Return which was uploaded to the VAT Return.

Jurisdiction	Entity	Type	Frequency	Period	Status	Filing Deadline
Czech Republic	CZ_VAT_VIES_Control	VIES Return	Monthly	Jan 2024	To Prepare	2024-02-26

1.3. Upload Data File to the Control List

The screenshot shows the 'Control List' interface. At the top, there is a header bar with the following fields: Jurisdiction (Czech Republic), Entity (CZ_VAT_VIES_Control), Type (Control List), Frequency (Monthly), Period (Jan 2024), Status (To Prepare), and Filing Deadline (2024-02-26). Below the header, there is a section for 'Data Files' and 'Output Files'. The 'Data Files' table has columns: Name, Action By, Template Name, File Type, Status, and Source. A row is highlighted with a red border, showing 'CZ_VAT_Source3.Xlsx' uploaded by 'Keith O'Sullivan' on '23/07/2024' using the 'Bulgaria_VAT_Related' template. To the right of the table is an 'UPLOAD ADDITIONAL FILES' section with a 'Drag and drop file here' area and a 'CHOOSE FILE' button.

If the user uploads the Data File to the Control List, (the steps for uploading the Data File are the same, please see above). Once uploaded, this triggers the following:

1. The Data File is displayed in the **Files Tab** of the Control List. A link back to this will be added to the Files tab on the associated VAT Return and VIES Return.

The screenshot shows the 'Return 2240' interface. At the top, there is a header bar with the following fields: Jurisdiction (Czech Republic), Entity (CZ_VAT_VIES_Control), Type (VAT Return), Frequency (Monthly), Period (Jan 2024), Status (To Prepare), and Filing Deadline (2024-02-26). Below the header, there is a section for 'Data Files' and 'Output Files'. The 'Data Files' table has columns: Name, Action By, Template Name, File Type, Status, and Source. A row is highlighted with a red border, showing 'CZ_VAT_Source3.Xlsx' uploaded by 'Keith O'Sullivan' on '23/07/2024' using the 'Bulgaria_VAT_Related' template. To the right of the table is an 'UPLOAD ADDITIONAL FILES' section with a 'Drag and drop file here' area and a 'CHOOSE FILE' button.

2. The Status of all (VAT, VIES, and Control List) all move to **To Prepare**.
3. The Data Validation has been run on each filing type.
4. The Associated Transactions have been added to the Transactions Tabs on each Filing Type.

2. Upload the Data File with Longer/Shorter Frequencies

The previous section outlined the functionality in Comply in dealing with Associated Transactions, and in particular when the returns (Source Return and Linked Returns) have a frequency of monthly. However, the user may have a Source Return/Associated Return with different frequencies:

For example:

VAT Return Quarterly but with Monthly VIES Returns.

Name	Entity Name	Return Type	Return Frequency	Current Return Status Due Date	Current Return Status Action Owner	Return Period	VAT Group
CZ_Control_VAT_VIES_monquarter		VIES Return	Monthly	25-07-2024	Ani Encheva	Jun 2024	
CZ_Control_VAT_VIES_monquarter		VIES Return	Monthly	25-06-2024	Ani Encheva	May 2024	
CZ_Control_VAT_VIES_monquarter		VIES Return	Monthly	27-05-2024	Ani Encheva	Apr 2024	
CZ_Control_VAT_VIES_monquarter		VAT Return	Quarterly	14-07-2024	Ani Encheva	Apr-Jun 2024	
CZ_Control_VAT_VIES_monquarter		Control List	Monthly	25-07-2024	Ani Encheva	Jun 2024	
CZ_Control_VAT_VIES_monquarter		Control List	Monthly	14-06-2024	Ani Encheva	May 2024	
CZ_Control_VAT_VIES_monquarter		Control List	Monthly	15-05-2024	Ani Encheva	Apr 2024	

This section will outline the functionality in comply used to manage these scenarios. This will include the associated transaction process when a user:

- Uploads a Data File to the Quarterly VAT Return
- Makes Transactional Changes to the Quarterly VAT Return
- Uploads a Data File to a Monthly Associated Return
- Makes Transactional Changes to a Monthly Associated Return
- Makes Changes to Quarterly VAT Return, when associated Returns are Submitted.

2.1. Upload a Data File to a Quarterly VAT Return

Where the user uploads a Data File to a Quarterly VAT Return, Comply reads the transactions based on the **Tax Point Date**. Then the transactions within the Data File will be associated to the relevant Monthly Associated Return.

2.1.1. Example

The Data File uploaded to a Quarterly VAT Return (July – Sept), contains some VIES related Transactions (EUS/EUP/TRS) for July.

Upload the Data File to the VAT Return (Quarterly). This Triggers the following:

1. All transactions are added to the **Transactions tab** on the Source VAT return.
2. The **Audit History** is updated with log of Data File upload and Associated Transactions.
3. **Transactions** are associated with the relevant VIES/Control List.
 - a. Monthly VIES return for July is updated with the relevant transaction (based on Tax Point Date).
 - b. Monthly Control lists updated with relevant associated transactions.

Audit History:

The screenshot displays the 'AUDIT HISTORY' section of a software interface. At the top, there are tabs for 'All Logs', 'Return Logs', and 'Transaction Logs', with 'All Logs' selected. To the right, there are links for 'Download Logs' and 'Back to return', along with a 'Date range' selector. Below the tabs is a table with the following columns: 'Event Group', 'Event Change From', 'Event Change To', 'User', and 'Comment'. The table contains two entries: one for 'Transactions Associated' by 'System Bot' and another for 'File Uploaded' by 'Ani Encheva'. At the bottom of the table, there are 'Prev' and 'Next' buttons, and a 'View by' dropdown set to '15'.

Event Group	Event Change From	Event Change To	User	Comment
24 Transactions Associated			System Bot	Transactions from data file CZ_VIES_Source.xlsx are
18 File Uploaded			Ani Encheva	File 'CZ_VIES_Source.xlsx' Uploaded

Please Note:

If any of the Associated Returns are on status To Review/Approve/Submit, then when the transactions are associated, then the status changes back to To Prepare.

2.2. Upload a Data File to a Monthly VIES Return (Quarterly VAT)

Where the user uploads a Data File to a Monthly VIES Return with a Quarterly VAT Return, Comply reads the transactions based on the **Tax Point Date**. Then the transactions within the Data File will be associated to the relevant Monthly Associated Return.

2.2.1. Example:

The Data File uploaded to a Monthly VIES Return, contains some VIES related Transactions (EUS/EUP/TRS) for July.

Upload the Data File to the VIES Return (Monthly). This Triggers the following:

1. All transactions are added to the **Transactions tab** on the VIES return.
2. The **Audit History** is updated with log of Data File upload and Associated Transactions.
3. **Transactions** are associated with the relevant VAT/Control List.
 - a. Quarterly VAT Return is updated with the relevant transaction (based on Tax Point Date).
 - b. Monthly Control lists are updated with any relevant associated transactions.

Please Note:

If any of the Associated Returns are on status To Review/Approve/Submit, then when the transactions are associated, then the status changes back to To Prepare.

2.3. Data File with Past Date Transactions

If the Data File includes some transactions which were dated before the current Quarter.

2.3.1. Example:

The Data File uploaded to a Quarterly VAT Return (July – Sept) includes some VIES related transactions from June.

Upload the Data File to the VAT Return (Quarterly). This Triggers the following:

1. All relevant transactions are associated to the relevant monthly associated returns.
2. The past dated VIES Transactions (June) are added to the first available monthly return (July).
3. **Transactions** are associated with the relevant Control List.
4. The **Audit History** is updated with log of Data File upload and Associated Transactions.

2.3.2. Statuses:

To Review/Approve/Submit

Where past dated transactions are associated, the transactions are added to the first available monthly return. The return is set back to To Prepare.

Submitted:

Where the past dated transactions are associated, and the first return is submitted, then the transaction are added to the next available regular monthly return.

Submitted (with Self Revision):

Where the past dated transactions are associated, the transaction are added to the next available Self Revision (monthly) return.

All Returns Submitted:

Where the past dated transactions are associated, and all returns in the period are submitted with no self-revision, then these transactions are added to the next available regular return in the next Quarterly Period.

Please note:

Any past dated transactions that are added to the next available monthly return (In the new quarterly period) will trigger in the Data Validation and the user will need to correct/accept it.

2.4. Data File with Future Date Transactions

If the Data File includes some transactions which are dated after the current Quarter.

2.4.1. Example:

The Data File uploaded to a Quarterly VAT Return (July – Sept) includes some VIES related transactions for October.

Upload the Data File to the VAT Return (Quarterly). This Triggers the following:

1. All relevant transactions are associated to the relevant monthly associated returns.
2. The future dated VIES Transactions (October) are added to the last available monthly return (September).
3. **Transactions** are associated with the relevant Control List.
4. The **Audit History** is updated with log of Data File upload and Associated Transactions.

2.4.2. Statuses:

To Review/Approve/Submit

Where future dated transactions are associated, the transactions are added to the last available monthly return (September). The return is set back to To Prepare.

Submitted:

Where the future dated transactions are associated, and the Last return is submitted, then the transaction are added to the next available regular monthly return outside of the quarter (Monthly VIES October).

Submitted (with Self Revision):

Where the future dated transactions are associated, the transaction are added to the next available Self Revision (monthly) return of the new quarterly period.

All Returns Submitted:

Where the future dated transactions are associated, and all returns in the period are submitted with no self-revision, then these transactions are added to the next available regular return in the next Quarterly Period.

3. Deleting a Data File

The Preparer or Reviewer can choose to delete a Data File providing the Return is at any of the following Statuses:

- To Prepare
- To Review
- To Approve
- To Submit.

3.1. Delete the File

To do this:

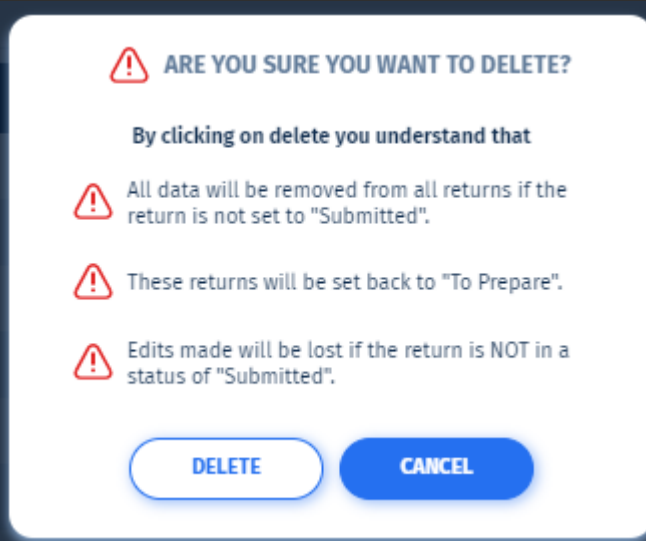

1. Open the Return you wish to Delete the File from.

Please note: As seen above, the actual data file is available on only one of the associated files. If it was uploaded to the VAT Return, then it can only be deleted directly from there. If you are in an open VIES/Control List return, then you will need to click the link in the Files Tab which will bring you back to the correct file.

2. In the Files Tab, click the Trash Icon on the file you wish to delete (There may be more than one file – it is possible also to add Supporting Doc files....the files tab could be populated with numerous files in table format).

The screenshot shows the 'Files' tab in the Taxback International interface. At the top, there are four tabs: 'Files', 'Data Validation', 'Transactions', and 'Return Validation'. Below these, there are two sub-tabs: 'Data Files' and 'Output Files'. The 'Data Files' sub-tab is active, displaying a table with the following columns: Name, Action By, Template Name, File Type, Status, and Source. The table contains one row for the file 'CZ_VAT_Source3.Xlsx', which was actioned by 'Keith O'Sullivan' on '23/07/2024', with a 'Bulgaria_VAT_Related' template, 'Data File' type, 'Success' status, and 'Browser' source. To the right of the table, there are icons for download, upload, and delete (trash). A red dashed arrow points to the trash icon. To the right of the table, there is a section for 'UPLOAD ADDITIONAL FILES' with a 'Drag and Drop' area and a 'Browse' button. At the bottom of the interface, there are 'Prev' and 'Next' buttons, and a 'View by' dropdown set to '15'.

This triggers the following Pop-up message:

3.2. Associated Transactions

If you delete a Data File from a return where there are associated transactions, then those associated transactions will also be deleted from the other return and all files will be sent back to a status of To Prepare.

Example:

A data file has been uploaded to the VAT Return and has associated (EUS/EUP or TRS) transactions in the VIES Return. Then if the Data file is deleted in the VAT Return, it is confirming that those associated transactions in the VIES Return will also be deleted and the status of both VAT and VIES Returns will be set back to **To Prepare**.

4. Uploading Additional Data Files

This section explores the process and steps when uploading additional Data Files.

4.1. Upload Additional Data File (To Prepare)

If the user uploads an additional Data File, and the VAT, VIES and Control List are all on To Prepare, then:

- The additional file is added to the Files Tab of the source return. (E.g. VAT Return).
- The link to the file is added to the File Tabs of the associated VIES/Control List returns.
- The Data Validation runs again.
- The Status of all returns remains at To Prepare.
- If there are new associated transactions (EUS/EUP/TRS for VIES), these will be added to the Transactions Tab on the VIES return.
- The Audit History across all associated returns are updated with the log of the additional data file. And where there are associated transactions, this will also be logged.

For this example, an additional Data File was uploaded to the VAT Return. It included 2 associated EUS transactions.

VAT Return

The additional File is successfully uploaded. Displays in the File Tab.

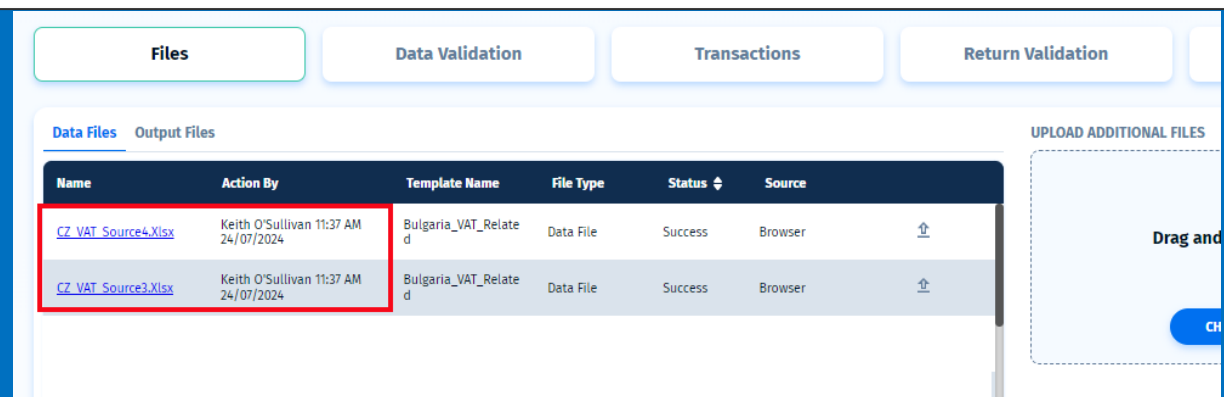

The screenshot shows the 'Files' tab selected in the top navigation bar. Below the navigation bar, there are tabs for 'Data Files' and 'Output Files'. The 'Data Files' tab is active, displaying a table with the following data:

Name	Action By	Template Name	File Type	Status	Source	
CZ_VAT_Source4.Xlsx	Keith O'Sullivan 11:37 AM 24/07/2024	Bulgaria_VAT_Related	Data File	Success	Browser	  
CZ_VAT_Source3.Xlsx	Keith O'Sullivan 11:37 AM 24/07/2024	Bulgaria_VAT_Related	Data File	Success	Browser	  

To the right of the table, there is a section titled 'UPLOAD ADDITIONAL FILES' with a dashed box and the text 'Drag and drop files here'.

VIES Return

The link to the additional file is added to the Files Tab on the VIES (and if necessary, the Control List).

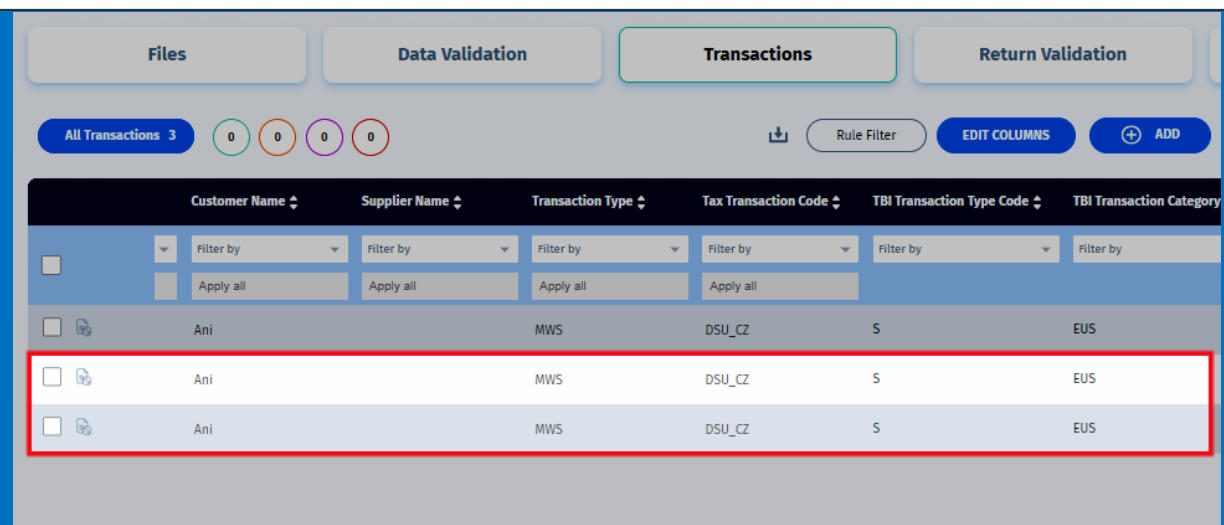

The screenshot shows the 'Files' tab of the VIES Return interface. It features a table with columns: Name, Action By, Template Name, File Type, Status, and Source. Two rows are visible, both for 'CZ_VAT_Source3.Xlsx' and 'CZ_VAT_Source4.Xlsx', both uploaded by Keith O'Sullivan on 24/07/2024, using the 'Bulgaria_VAT_Related' template. A red box highlights the first two rows. To the right, there is an 'UPLOAD ADDITIONAL FILES' section with a 'Drag and Drop' area and a 'CHOOSE FILE' button.

Name	Action By	Template Name	File Type	Status	Source
CZ_VAT_Source4.Xlsx	Keith O'Sullivan 11:37 AM 24/07/2024	Bulgaria_VAT_Related	Data File	Success	Browser
CZ_VAT_Source3.Xlsx	Keith O'Sullivan 11:37 AM 24/07/2024	Bulgaria_VAT_Related	Data File	Success	Browser

VIES Return- Transactions Tab

As the additional File included 2 new associated EUS Transactions, these have been associated to the VIES Return and are added to the Transactions tab on the VIES Return.

The screenshot shows the 'Transactions' tab of the VIES Return interface. It features a table with columns: Customer Name, Supplier Name, Transaction Type, Tax Transaction Code, TBI Transaction Type Code, and TBI Transaction Category. Three rows are visible, all for 'Ani' as the customer and supplier, with 'MWS' as the transaction type and 'DSU_CZ' as the tax transaction code. The first two rows are highlighted with a red box. Above the table, there are filters for each column and a 'Rule Filter' button. Below the table, there are buttons for 'All Transactions 3', '0', '0', '0', and '0'.

Customer Name	Supplier Name	Transaction Type	Tax Transaction Code	TBI Transaction Type Code	TBI Transaction Category
Ani	Ani	MWS	DSU_CZ	S	EUS
Ani	Ani	MWS	DSU_CZ	S	EUS
Ani	Ani	MWS	DSU_CZ	S	EUS

Audit History

The Audit History is updated on each of the Return Types. This includes:

- A log of the File Upload
- A log of the associated transactions.

4.2. Upload Additional Data File (Different Status)

If the user uploads an additional Data File when the linked returns are on To Approve/To Submit, then:

- The additional file is added to the Files Tab of the source return. (E.g. VAT Return).
- The link to the file is added to the File Tabs of the associated VIES/Control List returns.
- The Data Validation runs again.
- If there are new associated transactions (EUS/EUP/TRS for VIES), these will be added to the Transactions Tab on the VIES return.
- If there are NO new associated transactions (EUS/EUP/TRS), then VIES Return remains on its current Status.
- If there are new Transactions, then the status is reset to To Prepare.
- The Audit History across all associated returns are update with the log of the additional data file. And where there are associated transactions, this will also be logged.

4.2.1. Example 1:

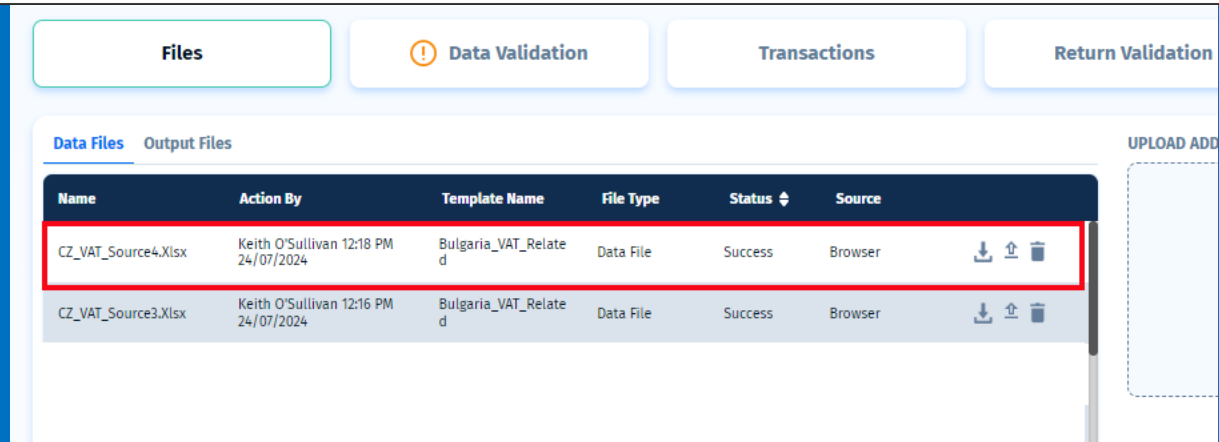

VAT Return is on **To Prepare** and VIES Return are on **To Approve**. An Additional File is uploaded to VAT Return with Associated Transactions for VIES.

All Returns (3)

5. Manually Add Transactions

This section explores the process and steps when the user manually adds new transactions to an existing return. This will include details about the impact on VAT/VIES/Control List returns, depending on which return the transaction was manually added to.

5.1. Manually Add a Transaction (VAT Return).

To do this:

- Open the VAT Return.
- Click on the **Transactions Tab**.
- Click the **Add** button.

The screenshot shows the 'Return 2240' interface. At the top, there's a header with details: Jurisdiction (Czech Republic), Entity (CZ_VAT_VIES_Control), Type (VAT Return), Frequency (Monthly), Period (Jan 2024), Status (To Prepare), and Filing Deadline (2024-02-26). Below this is a navigation bar with tabs: Files, Data Validation, Transactions (selected), Return Validation, and Return Review. Under the Transactions tab, there's a sub-bar with 'All Transactions' (22), a status indicator (1 green, 0 orange, 0 red, 0 grey), and buttons for 'Rule Filter', 'EDIT COLUMNS', 'ADD' (highlighted with a red box and a hand cursor), 'SAVE', 'EDIT', and 'ACTION'. Below the navigation bar is a table with columns: Transaction ID, Submission Type, Invoice Number, Invoice Date, Invoice Posting Date, Net Amount, VAT Amount, VAT Rate, and Customer. The first row shows Transaction ID 328092, Submission Type Regular, Invoice Number 410, Invoice Date 01/01/2024, Net Amount -100.00, VAT Amount 0.00, VAT Rate 0.00, and Customer Ani.

- Complete the **Add Transaction** screen by adding the relevant transaction data.

The screenshot shows the 'Add Transaction' screen. It has a 'Template' dropdown set to 'Bulgaria_VAT_Related'. Below this is a 'Mandatory Fields' section with a table of fields and values:

Field Name	Value	Field Name	Value
TBI Transaction Type *	Input	TBI Transaction Category *	EU supply
TBI Goods Services Category *	GS	Invoice No *	41102
Invoice Date *	03/01/2024	Tax Point Date *	03/01/2024
Net Amount *	1000	Vat Rate *	19
Vat Amount *	0		

At the bottom of the screen, there are tabs for 'Comment', 'Customer/Supplier Details', 'Intrastat', 'Invoice Details', 'Ship To/From', and 'Transaction Amount'.

- Click **Save**.

The transaction has been added to the Transactions list. This now triggers the following automatically:

- The Data Validation runs again.
- The Audit History is updated with a log for the added Transaction.

AUDIT HISTORY						
All Logs Return Logs Transaction Logs						
All	Date	Event Group	Event Change From	Event Change To	User	Comment
	Select date	Filter by	Filter by	Filter by	Filter by	Filter by
	24/07/2024 14:30:17	Transaction Added			Keith O'Sullivan	
	24/07/2024 14:16:31	Transaction Added			Keith O'Sullivan	

5.1.1. Associated Transactions

If the manually added transaction was for example an Associated transaction (EUS/EUP/TRS) related to VIES, then this will be added automatically to the VIES Return. This will trigger the following in the VIES Return:

- The new Transaction is added to the Transactions Tab in the VIES return.
- If the status of the VIES return was on To Review/To Approve/To Submit, then it will be set back to **To Prepare**.
- The Data Validation runs again.
- The Audit History is updated with a Log of the added transaction Associated from the VAT return.

6. Edit Transactions

This section explores the process and steps when the user Edits a transaction(s).

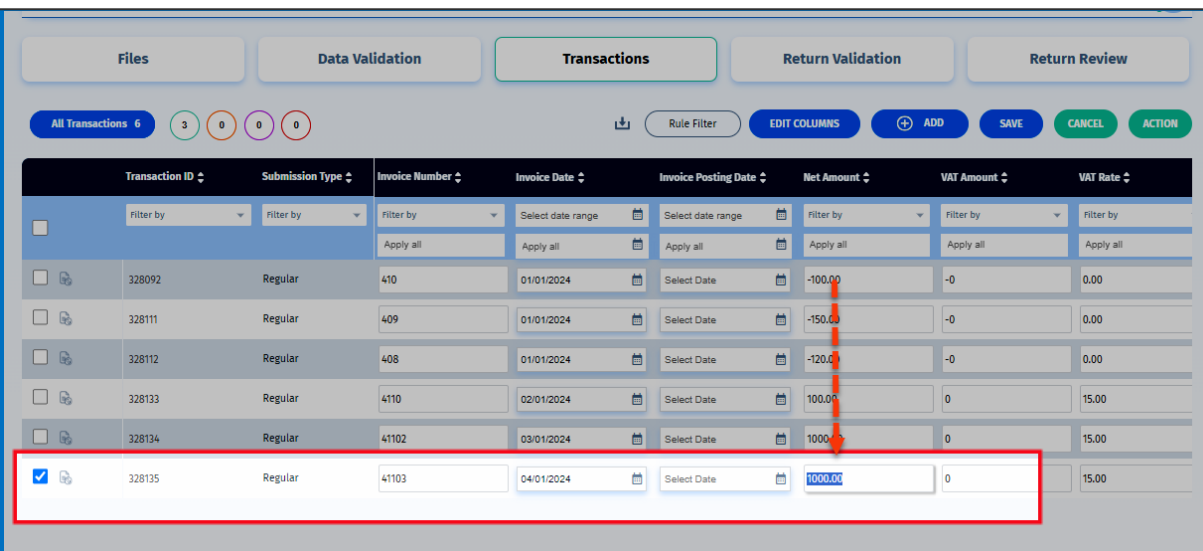

6.1. Edit a Transaction

The user can edit a transaction in any of the Associated Returns (VAT/VIES/Control List), which in turn triggers a list of behaviours across all these returns (Similar to when adding manual transactions above).

6.1.1. Example 1

VAT Return is To Prepare. VIES Return is To Approve. Control List is To Submit. The user edits a transaction in the VIES Return.

1. Open the **VIES** Return.
2. Open the **Transactions Tab**.
3. Select the **Transaction to Edit**.
4. Click **Edit**.

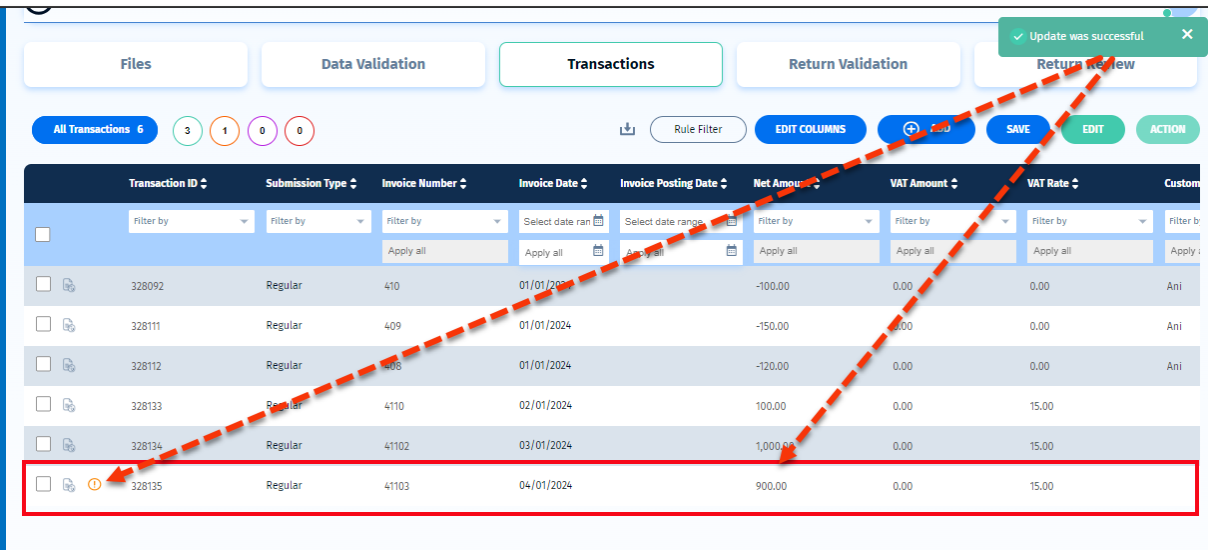

Transaction ID	Submission Type	Invoice Number	Invoice Date	Invoice Posting Date	Net Amount	VAT Amount	VAT Rate
328092	Regular	410	01/01/2024	Select Date	-100.00	-0	0.00
328111	Regular	409	01/01/2024	Select Date	-150.00	-0	0.00
328112	Regular	408	01/01/2024	Select Date	-120.00	-0	0.00
328133	Regular	4110	02/01/2024	Select Date	100.00	0	15.00
328134	Regular	41102	03/01/2024	Select Date	1000.00	0	15.00
328135	Regular	41103	04/01/2024	Select Date	1000.00	0	15.00

For this example, we are going to edit the NET Amount to 900.

5. Click **Save**.

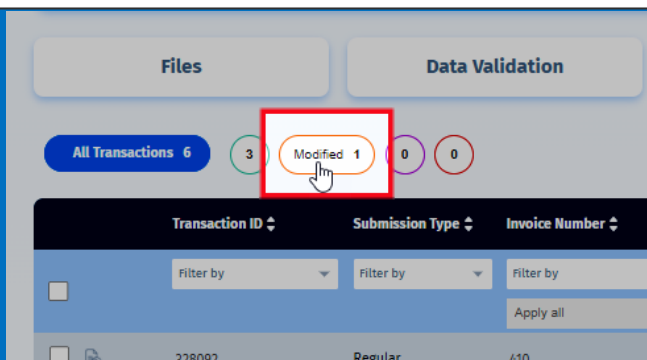

The change is confirmed and can be viewed in detail using the Orange Info button.

Transaction ID	Submission Type	Invoice Number	Invoice Date	Invoice Posting Date	Net Amount	VAT Amount	VAT Rate	Custom
328092	Regular	410	01/01/2024		-100.00	0.00	0.00	Ani
328111	Regular	409	01/01/2024		-150.00	0.00	0.00	Ani
328112	Regular	408	01/01/2024		-120.00	0.00	0.00	Ani
328133	Regular	4110	02/01/2024		100.00	0.00	15.00	
328134	Regular	41102	03/01/2024		1,000.00	0.00	15.00	
328135	Regular	41103	04/01/2024		900.00	0.00	15.00	

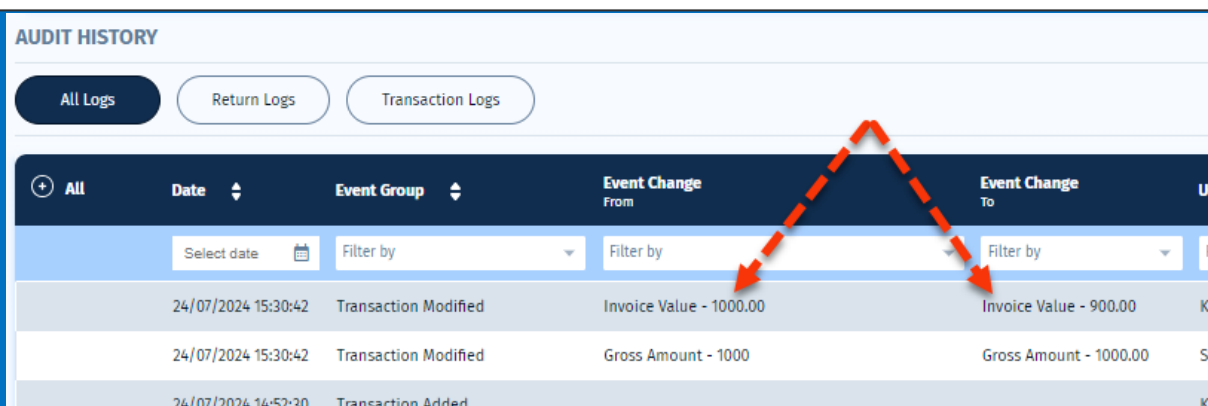

This change now triggers the following:

- The edit transaction is added to the Modified List.

Transaction ID	Submission Type	Invoice Number
328092	Regular	410

- The Audit History is updated with a log of the changes made.

Date	Event Group	Event Change From	Event Change To
24/07/2024 15:30:42	Transaction Modified	Invoice Value - 1000.00	Invoice Value - 900.00
24/07/2024 15:30:42	Transaction Modified	Gross Amount - 1000	Gross Amount - 1000.00
24/07/2024 14:52:30	Transaction Added		

Associated Returns:

The change also triggers actions in the associated returns (VAT and Control List).

VAT Return:

	24/07/2024 15:30:42	Transaction Modified	Gross Amount - 1000	Gross Amount - 1000.00

6.2. Edit Transactions (Amendment Self-Revision)

Following the same steps for Editing Transactions, if the user does so directly from the Self - Revision VAT/VIES Return then the following actions are triggered:

- The transaction is updated automatically in the relevant associated returns (VAT/Annual VAT/Annual Client Listing).
- A Log is added to the **Audit History** of all associated returns.
- If any of the associated returns are on a status of To Approve/To Submit, then these will return to **To Prepare**.

7. Exclude Transactions

This section explores the process and steps when Excluding transactions from a return. This will outline how it impacts associated returns and the actions it triggers in each return.

7.1. Exclude a Transaction (VAT Return)

To Exclude a transaction :

1. Open the **VAT Return**.
2. Click on the **Transaction Tab**.
3. Select the transaction to be excluded.
4. Click the **Action** button.

The screenshot shows the VAT Return interface for the Czech Republic. The top bar displays metadata: Jurisdiction (Czech Republic), Entity (CZ_VAT_VIES_Control), Type (VAT Return), Frequency (Monthly), Period (Jan 2024), Status (To Prepare), and Filing Deadline (2024-02-26). Below this, a navigation bar includes tabs for Files, Data Validation, Transactions (active), Return Validation, and Return Review. The Transactions tab shows a table of transactions with columns: Transaction ID, Submission Type, Invoice Number, Invoice Date, Invoice Posting Date, Net Amount, VAT Amount, VAT Rate, and Customer. Transaction 328157 is selected. A red dashed arrow points from the 'ACTION' button in the top right to the 'Exclude From Return' option in the dropdown menu.

Transaction ID	Submission Type	Invoice Number	Invoice Date	Invoice Posting Date	Net Amount	VAT Amount	VAT Rate	Customer
328156	Regular	410	01/01/2024		-100.00	0.00	0.00	Ani
328157	Regular	411	01/01/2024		-100.00	-15.00	15.00	Ani
328158	Regular	412	01/01/2024		-100.00	-15.00	15.00	Ani

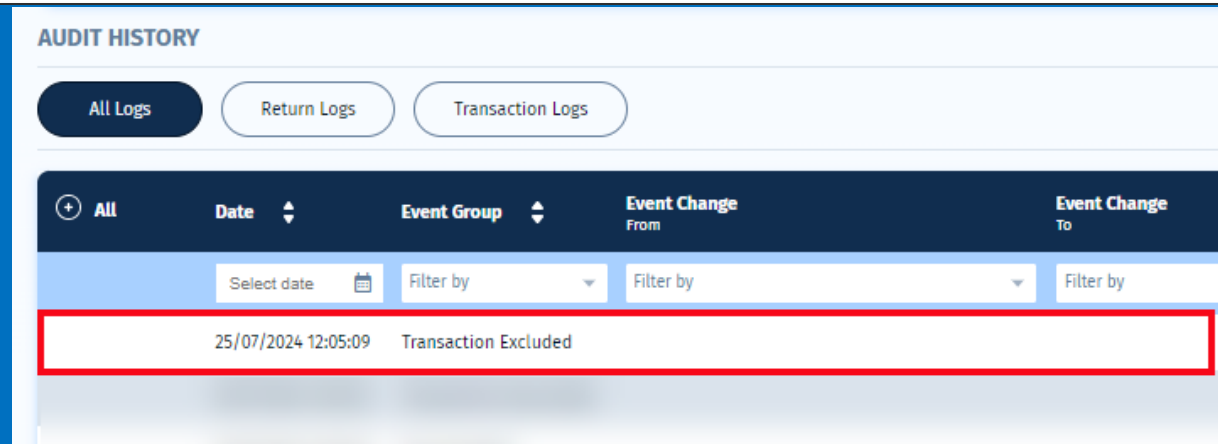

5. Click **Exclude from Return**.

The screenshot shows the 'ACTION' dropdown menu open, with 'Exclude From Return' selected. The menu options are: Send for Correction, Exclude From Return, Move to a Different Return, and Include In Return. A red dashed arrow points from the 'ACTION' button to the 'Exclude From Return' option.

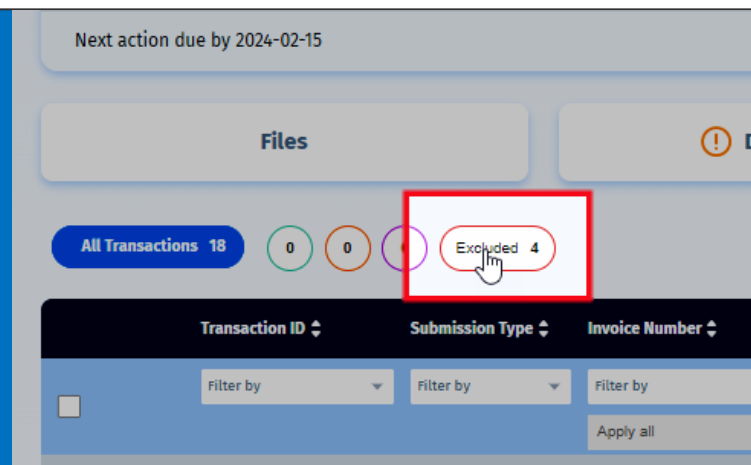

6. Click **Save**.

This triggers the following:

- Audit History is updated with a log of the excluded transaction.

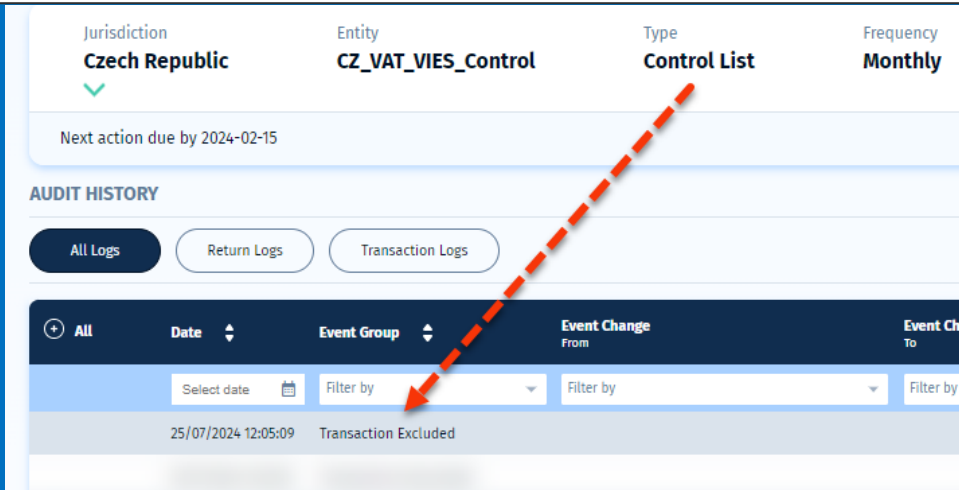

- The transaction is added to the Excluded Transactions list:

7.1.1. Associated Returns:

The excluded transaction triggers the following actions for any associated returns (VIES/Control List):

- The associated Transaction will be removed from the relevant return. (In this example the transaction was associated with the Control List, so this is shown as removed from there).

As the excluded transaction was not associated with the VIES, the VIES Return remains unchanged.

- If the Control List was on To Approve/To Submit, then the status would return to **To Prepare**.
- If the Control List/VIES returns were on **Submitted**, the transaction is only excluded from the VAT Return and the associated returns remain on Submitted.

7.2. Exclude Transaction (VIES)

Following the same steps for excluding transactions, if the user excludes a transaction directly from the VIES Return, then the following actions are triggered:

- The transaction is added to the **Excluded Transactions** list For all associated returns.
- A Log is added to the **Audit History** of all associated returns.

The screenshot displays the VIES Return interface. At the top, a header bar contains fields for Jurisdiction (Czech Republic), Entity (CZ_VAT_VIES_Control), Type (VAT Return), Frequency (Monthly), Period (Jan 2024), Status (To Prepare), and Filing Deadline (2024-02-26). Below this, a section titled 'AUDIT HISTORY' is visible, with tabs for 'All Logs', 'Return Logs', and 'Transaction Logs'. The 'Transaction Logs' tab is selected, showing a table with columns: Event Group, Event Change From, Event Change To, User, and Comment. A red box highlights a row in the table with the following details:

Event Group	Event Change From	Event Change To	User	Comment
Transaction Excluded			System Bot	Transaction with id 328176 has been excluded from VIES Return 2241 by Keith O'Sullivan for the reason Dumm
Transactions Associated			System Bot	Transactions from data file CZ_VAT_Source4.xlsx are associated with VIES Return 2241 ,Control List 2242

- If any of the associated returns are on a status of To Approve/To Submit, then these will return to **To Prepare**.
- If any of the associated returns are on a status of **Submitted**, the transaction is only excluded from the VIES return, and the associated returns remain on Submitted.

7.3. Exclude Transaction (Control List)

Following the same steps for excluding transactions, if the user excludes a transaction directly from the Control List, then the following actions are triggered:

- The transaction is added to the **Excluded Transactions** list the relevant associated returns.
- A Log is added to the **Audit History** of all associated returns.

The screenshot displays the Taxback system interface. At the top, the 'Type' field is set to 'VAT Return' and is highlighted with a red box. Below this, the 'AUDIT HISTORY' section is visible, showing a log entry for 'Transaction Excluded' with a comment: 'Transaction with id 328176 has been excluded from VIES Return 2241 by Keith O'Sullivan for the reason Dumm'. The interface also shows filters for 'Event Group', 'Event Change From', 'Event Change To', 'User', and 'Comment'.

- If any of the associated returns are on a status of To Approve/To Submit, then these will return to **To Prepare**.
- If any of the associated returns are on a status of **Submitted**, then the transaction is only excluded from the Control List, and the statuses of the VAT/VIES returns will remain on Submitted.

7.4. Exclude Transaction (Annual VAT Return)

Following the same steps for excluding transactions, if the user excludes a transaction directly from the VAT/VIES Return, then the following actions are triggered:

- The transaction is added to the **Excluded Transactions** list the relevant associated returns.
- A Log is added to the **Audit History** of all associated returns.
- The transaction is automatically removed from the Annual VAT Return.
- If the associated Annual VAT return is on a status of To Approve/To Submit, then this will return to **To Prepare**.

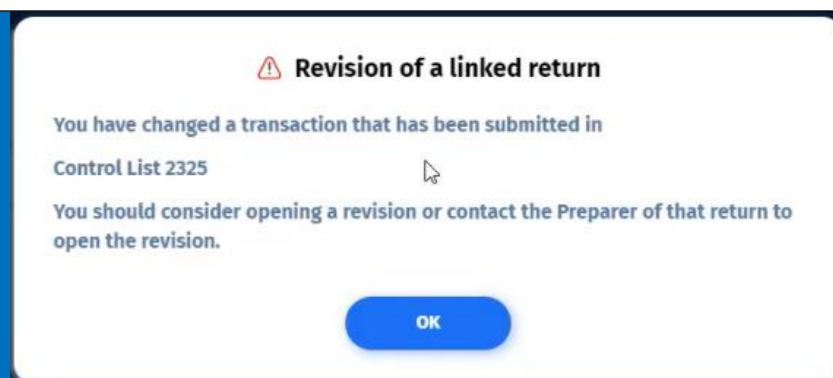

7.5. Exclude Transactions (Amendment Self-Revision)

Following the same steps for Excluding Transactions, if the user does so directly from the Self - Revision VAT/VIES Return then the following actions are triggered:

- The transaction is added to the **Excluded Transactions** list the relevant associated returns (VAT/Annual VAT/Annual Client Listing).
- A Log is added to the **Audit History** of all associated returns.
- If any of the associated returns are on a status of To Approve/To Submit, then these will return to **To Prepare**.

7.6. Exclude Transactions (All Associated Returns are Submitted)

If the user tries to exclude a transaction from a Quarterly VAT Return, and all the associated returns are Submitted, then the following pop-up is displayed:

The user should consider opening a self-revision return or choose to disregard it.

8. Transactions Sent for Correction

This section explores the process and steps for sending transactions for correction and includes guidance on the action triggered when related to Associated Returns.

8.1. Send a Transaction for Correction (VAT)

To do this:

1. Open the **VAT Return**.
2. Select the transaction to be sent for correction.
3. Click **Action**.
4. Click **Send for Correction**.

Next action due by 2024-02-15

	25/07/2024 12:20:07	File Uploaded	Ke

8.1.1. Associated Transactions:

This also triggers the following actions in any Associated Returns, which include:

- This is included in the **Sent for Correction** list on all associated Returns.
- A log is added to the **Audit History** of each of the Associated Returns.

Example: From associated VIES Return.

AUDIT HISTORY			
All Logs Return Logs Transaction Logs			
Event Group	Event Change From	Event Change To	
Filter by Filter by Filter by			
	Transaction Sent For Correction		

- The transaction is removed from the Associated Returns.
- If any of the Associated Returns are on To Approve/To Submit, then these will be returned to **To Prepare**.

8.2. Send Transaction for Correction (VIES)

Following the same steps for Sending transactions for correction, if the user does so directly from the VIES Return, then the following actions are triggered:

- The transaction is added to the **Sent for Correction** list the relevant associated returns.
- A Log is added to the **Audit History** of all associated returns.
- If any of the associated returns are on a status of To Approve/To Submit, then these will return to **To Prepare**.
- If any of the associated returns are on a status of **Submitted**, then the transaction is only sent for correction from the VIES Return, and the statuses of the VAT/Control List returns will remain on Submitted.

8.3. Send Transaction for Correction (Control List)

Following the same steps for Sending transactions for correction, if the user does so directly from the Control List Return, then the following actions are triggered:

- The transaction is added to the **Sent for Correction** list the relevant associated returns.
- A Log is added to the **Audit History** of all associated returns.
- If any of the associated returns are on a status of To Approve/To Submit, then these will return to **To Prepare**.
- If any of the associated returns are on a status of **Submitted**, then the transaction is only sent for correction from the Control List Return, and the statuses of the VAT/VIES returns will remain on Submitted.

8.4. Send Transaction for Correction (Annual VAT Return/Annual Client Listing)

Following the same steps for Sending transactions for correction, if the user does so directly from the VAT Return, then the following actions are triggered:

- The transaction is added to the **Sent for Correction** list the relevant associated returns (VAT/Annual VAT/Annual Client Listing).
- A Log is added to the **Audit History** of all associated returns.
- If any of the associated returns are on a status of To Approve/To Submit, then these will return to **To Prepare**.
- If any of the associated returns are on a status of **Submitted**, then the transaction is only sent for correction from the VAT Return, and the statuses of the Annual VAT Return/Annual Client Listing returns will remain on Submitted.

8.5. Send Transaction for Correction (Amendment Self-Revision)

Following the same steps for Sending transactions for correction, if the user does so directly from the Self -Revision VAT/VIES Return then the following actions are triggered:

- The transaction is added to the **Sent for Correction** list the relevant associated returns (VAT/Annual VAT/Annual Client Listing).
- A Log is added to the **Audit History** of all associated returns.
- If any of the associated returns are on a status of To Approve/To Submit, then these will return to **To Prepare**.

9. Files Tab

The Files Tab consists of a table of all Files uploaded to the return. This includes:

- All Data Files for Upload
- All Supporting Documents

It also keeps a record of older deleted files.

9.1. Data Files (Source Return)

The Source return is the Return to which the user uploads a Data for Return file. These files will appear here and can be viewed/downloaded/deleted directly from here.

These can be sorted using the Arrows on the Status column. This will sort the column using the statuses:

- Success
- Pending
- Deleted

9.3.1. Source Return

If the user downloads the output file from the Source return, this will display all transactions.

9.3.2. Associated Return

If, however the user is on the VIES return, and there are VIES related transaction (EUP/EUS/TRS), then only these transactions will be displayed in the downloaded Output file.

10. Email Alerts and Notifications

Email notifications are automatically sent to the Preparer anytime the status of a Return/Associated Return is set back to **To Prepare**.

This is an automated process triggered by Editing, Adding, Excluding or Sending a transaction where a Return/Associated Return is on **To Review/To Approve/To Submit**.

Example:

Action Required: Return 2241 reverted from "To Approve" back to "To Prepare"

11. Return Review & XML

The user once happy with all Transactions and associated returns, they can review the Return Boxes and the generated return files by visiting the Return Review Screen. The Return can be processed through To Approve > To Submit.

12. Submit

Finally, if all is in good order and the user is happy with the return. They can click **Submit**.

(For Digital Submission, this is only available in Germany and the UK).

For the majority of Jurisdiction, the user can then download the return Submission file from the Return Review Tab, and upload to the relevant Tax Authority portal.
