1. Introduction

1.1. Purpose of this section

The purpose of this document is to provide guidance and instruction on how Comply users submit Returns for Finland using an API with the Finish Tax Authority. It will cover the steps required for Configuring Comply and for both Successful and Failed Submission flows.

1.2. Overview

An API integration is now available in Comply which allows the submission of returns to the Finnish Tax Authority.

1.2.1. Return Types

The following Return Types only can be submitted via API.

- VAT Returns
- EC Sales

2. External Configuration (Acquiring Certificate)

Comply provides the user with the ability within Comply to file Submissions via an API (Digital Filing). In order for this to be used, a Certificate (Authentication) needs to be issued which allows a Foreign Representative to complete the filing.

There are 3 key components to this configuration:

- The client must Assign/Authorise the TBI Representative to Acquire the Certificate.
- The TBI Rep. completes the application for using the Interface.
- Retrieval of the Certificate

Please note: All of these are completed outside of Comply.

2.1. Assign/Authorise the TBI Representative to Acquire the Certificate

1. The client must Register/Login to <https://vero.fi/en/incomes-register/>
2. Follow the Instructions to Submit an Application for Production Certificate.
3. The client must then go to <https://www.vero.fi/en/incomes-register/companies-and-organisations/Use-our-services-electronically/grant-authorisation/foreign-companies/>
4. Follow the Instructions to authorise the TBI Representative to act on behalf of the client.

TBI Representative Details:

- Name: **First Name, Surname**
- Finnish Foreigners User Identifier (UID): **545310351F**
- Mandate Theme: **Processing log, interface and report data related to income data.**

2.2. TBI Representative Applies for the Certificate

1. Login to:
<https://tunnistautuminen.suomi.fi/sivut/500/?t=2405281128f37f&m=discoveryRender>
2. Select the **Company** applying for the Certificate.
3. On the Companies page, select **Settings > Technical Interface**.
4. Check that the purpose of use of the interface indicated at Valid rights is **“Earnings payment data, organisation reports the wages it has paid and Earnings payment data, organisation reports wages on behalf of another party”**, and that the channel selection is **“Earnings payment data – Web Service”**. Other rights may also be selected.
5. *If the purpose of use is not reporting earnings payment data and the channel selection is not Web Service, then you must submit a replacement application. Select Make a replacement application.*
6. In the replacement application, tick the following options in addition to any other options already selected: at purpose of use of the interface, tick **“Earnings payment data, organisation reports the wages it has paid and Earnings payment data, organisation reports wages on behalf of another party”**, and at channel, tick **“Earnings payment data – Web Service”**. The replacement application replaces all previous selections, so make sure the application contains all the purposes of use and all the channels that the company needs.
7. When your right to access the interface has been verified, make the certificate application: **Certificates > Apply for a new certificate**.
8. Select **“Earnings payment data – Web Service”** as the type of production certificate.
9. Production certificate users must accept and follow the **terms and conditions** of use for the Tax Administration’s and the Incomes Register’s interface services (available in pdf format in Finnish and Swedish, link to Finnish)
10. You must specify a **technical contact person** in the certificate application. The technical contact person retrieves the certificate from the certificate service interface.

2.3. Retrieval of Certificate

A secure email is sent to the Technical Contact Person with instruction for retrieving the Certificate.

The production certificate is retrieved from the production address of the certificate service's Web Service interface: <https://pkiws.vero.fi/2017/10/CertificateServices> (TCP port 443)

1. They will receive a text message on their mobile phone containing a PIN for opening the secure e-mail message.

The PIN will be sent after the contact person has clicked the "Open message" link on the secure e-mail message they received when they applied for the certificate.

The certificate must be retrieved from the certificate service interface within 14 days after you submitted the application.

2. After successful retrieval, the technical contact person specified in the application **imports** the certificate into the software. If the user organisation does not have a valid certificate, Vero API will not transmit the records the organisation requests.

Please Note:

Vero API responds to calls made with production certificates only after the certificate has been retrieved and installed in the organisation's environment. Certificates for Vero API are retrieved from the Incomes Register's certificate service. In general, production certificates generated in the certificate service during office hours (8.00 am to 4.15 pm) will work in Vero API calls at the latest on the following day.

3. Submitting

The API submission process begins when the status on a return is at **"To Submit"** and the **Submit** button is available.

Jurisdiction: **Finland** ✓
 Entity: **FI-1-11**
 Type: **VAT Return**
 Frequency: **Monthly**
 Period: **Jun 2023**
 Status: **To Submit**
 Filing Deadline: **2023-08-14**

Next action due by 2023-08-14

Return Status

The Status of the Return changes to **Submitted to TA for Processing**.

Year	Status
2023	Submitted to TA for Processing

Please Note:

This is an interim status to reflect that the return is being processed by the Tax Authority.

Audit History

A log is added to the Audit History.

The return file has been submitted and now goes through a Tax Authority Data Validation process. Depending on the response from the Tax Authority, the Return will be either Successful or Failed, and Comply will be updated with the relevant response and relevant Status change.

3.1. Successful Submission Flow

When the response is received from the Tax Authority, and the response is processed the following are triggered simultaneously.

Status Change

The status of the return changes to **Submitted**.

Status
Submitted

Submission Results

The **Submission Confirmation** is added to the Submission Results tab on the Return Review screen. This includes the **Acceptance Timestamp** and **Unique ID** for the submission.

DISCLAIMER
Any delays in the provision of data or approval of summaries may result in penalties from the Tax Authorities. We cannot guarantee timely processing where data, invoices or approvals are late.
Any returns, summaries or reports prepared by Taxback International are based on the information provided to us. Any assumptions or adjustments made are based on previous agreement in this e-mail or set out in our working papers. Whilst we may perform a review of the data and highlight potential issues, we do not accept any responsibility for the completeness and accuracy provided.

Please do not reply to this email

3.2. Failed Submission Flows

The submission may fail for different reasons. These could include:

- Server/API Error
- Validation
- Tax Authority Data Validation

3.2.1. Server/API Error

The following are triggered if the API fails (server error etc).

- Error Pop-Up
- Email Notification
- Submission Status changes to **Submission Failed**

3.2.2. Return Validation

The following are triggered where the API response from the Tax Authority is:

- Expired
 - Error Pop-Up
 - Email Notification
 - Submission Status changes to **Submission Failed**
 - Log added to Audit History
- Missing (E.g. No Reg)
 - Error Pop-Up
 - Submission Status changes to **Submission Failed**
 - Log added to Audit History

In any case where the Submission Status changes to Submission Failed, the user can:

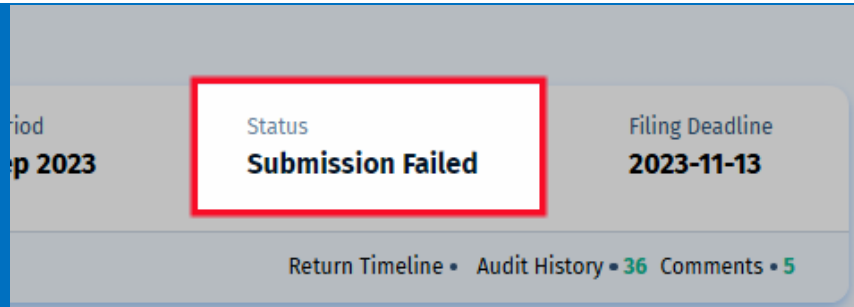

- Make the relevant changes and click **Submit**.
- Or
- Click **Return to To Prepare**, make the changes, process through workflow, and resubmit.

3.2.3. Tax Authority Data Validation

The following are triggered simultaneously where the Tax Authority data validation finds errors in/missing data.

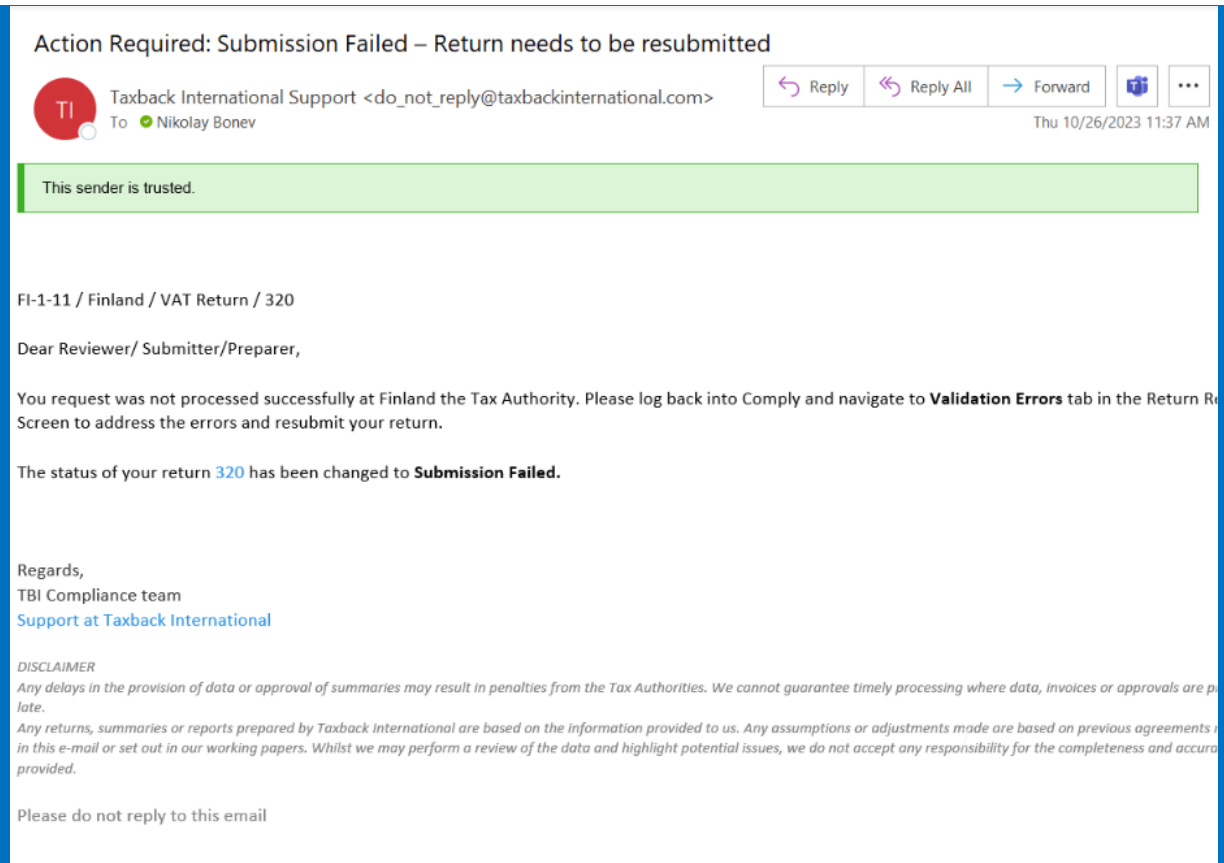

Status Change

The status of the return in Comply changes to **Submission Failed**.

Email Notification

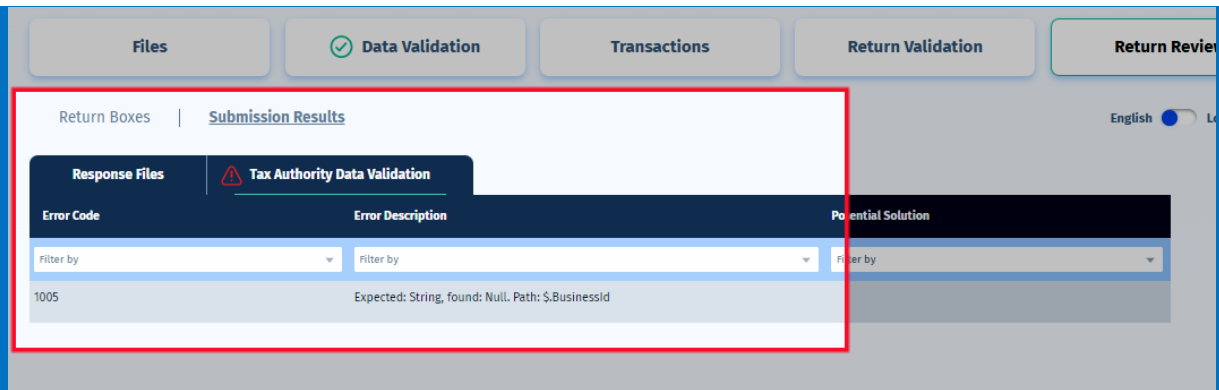

The following Email notification is sent to the Reviewer/Submitter/Preparer.

Submission Results

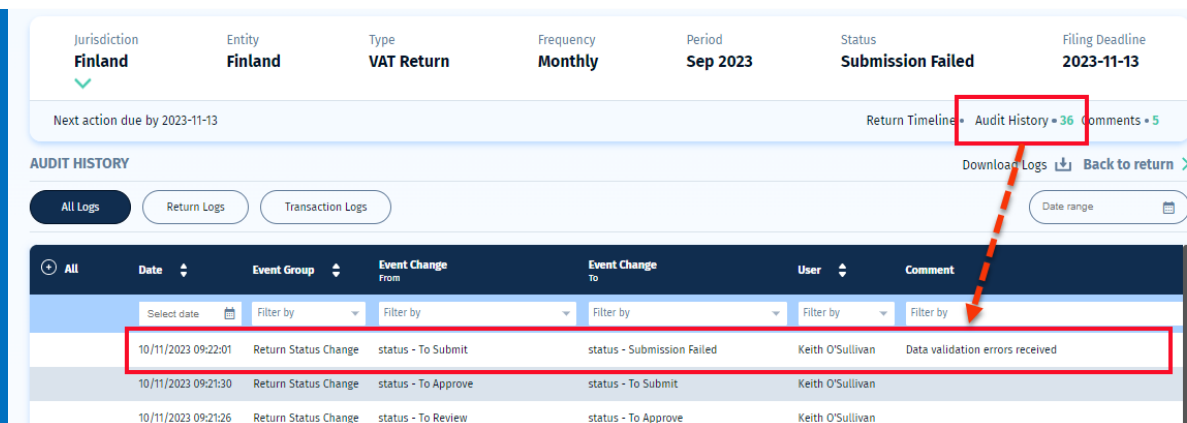

The Submission Results tab on the Return Review screen is updated. This includes:

- Error Icon in the Tax Authority Data Validation tab.
- Error Code and Description are added to the table.

Audit History

A log is added to the Audit History.

Return to "To Prepare" and "Submit" buttons.

Both these buttons are enabled to allow the user to send the return back to prepare and/or resubmit.

Resubmit the updated return.

Once the user has reviewed the data validation errors, they can:

1. Select the Return to "To Prepare" button.
2. With the status at "To Prepare", make the necessary changes.

3. Process the return through the relevant workflow steps (Review/Approve).
4. Click Submit.
