Overview

Purpose of this document

The purpose of this document is to provide guidance, context, and instruction for users to successfully onboard and configure a new client onto the Comply platform.

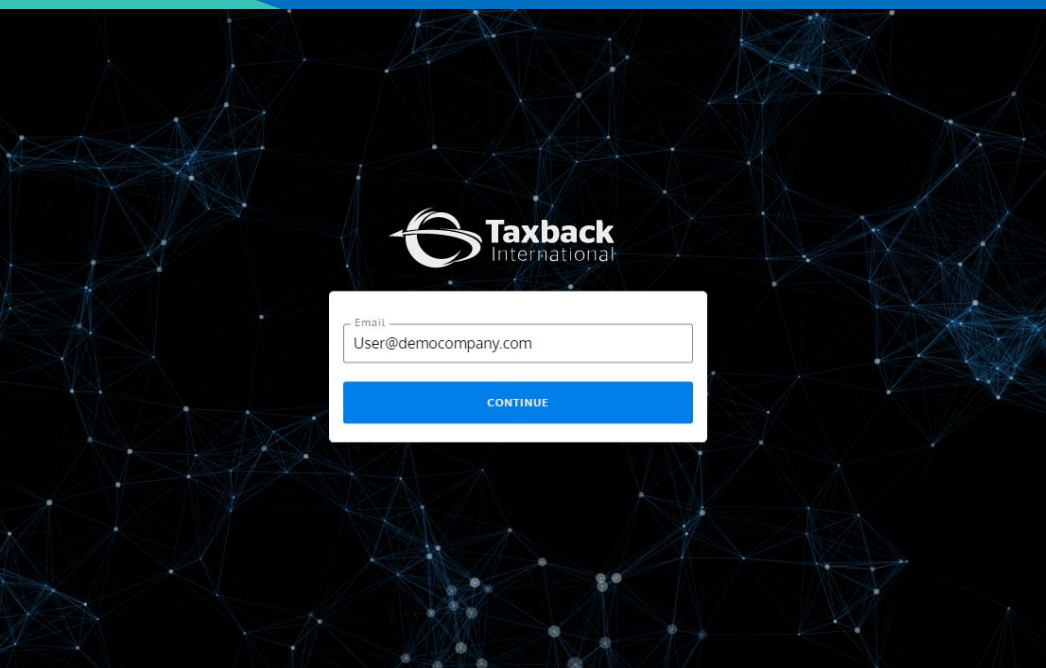

The following Steps are required to successfully complete this process:

Note: This process can only be completed by users who have been assigned Administrator access.

1. Login

To login to the platform, the user is sent an email from Taxback International (TBI) including a link and password for the Vault.

<https://login.taxbackinternational.com/login>

1.1. Login Steps

1. Open the link provided in the email.
2. Enter the username and password.
3. Click **Continue**.

Hi Demo User!

Where do you want to go today?

Comply

VAT Connect

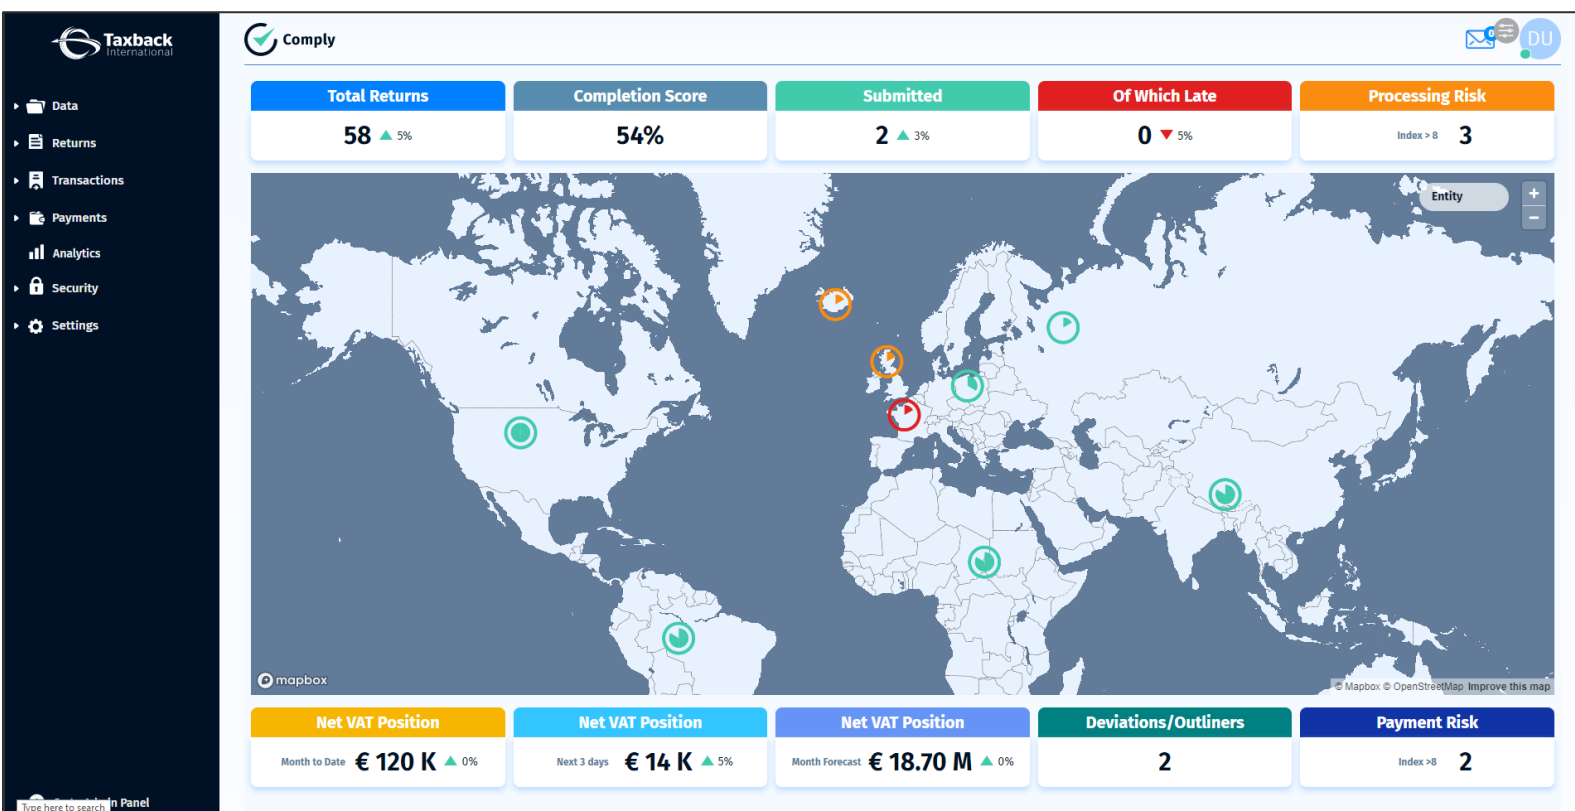

VAT Comply Platform

VAT Reclaim Platform

4. Select VAT Comply Platform

The default landing page after logging in is the Global Dashboard. This can also be found at any point, by navigating to the Analytics menu.

2. User Configuration

2.1. Security Menu

The **Security** menu provides the user with data relating to user profiles, system credentials and permissions.

The sub menus displayed here will depend on the permissions and profile of the user, i.e.

- Standard User
- Administrator

2.1.1.1. Standard User

Personal Details

First Name: Demo

Surname: User

Country: Select Country

Notification Preferences:

Notification Type:

The standard user will see only the **User Details** sub menu.

User Details

This is essentially a read only screen, displaying the system and role credentials for the user, which was predefined at the initial account creation. This will include:

- Personal Details
- Report Role – these are the specific VAT return roles the user has been assigned to for any entities they are responsible for.
- Settings:
 - Access Type – Full or Partial Access.
 - Account Status
 - Account created date
 - Last Log on

- Escalation Trigger – The number of days after which an overdue task will be escalated to the assigned Escalation user (TBI or Client user – if configured).
- Notification Preferences – The frequency the user receives system reminders for tasks assigned to them.

2.1.2. Standard User Notifications

This preconfigured process allows the user to receive system reminders via email for tasks that are assigned to them. I.e. if the user is assigned as **Data Provider, Preparer, Reviewer** or **Approver etc** for certain returns.

If they are assigned tasks based on any of the roles outlined in the return process, then this allows the user to set the frequency of when they receive such reminders.

The screenshot displays the 'User Details' page for Keith O'Sullivan. The page is divided into several sections:

- Personal Details:** Fields for First Name (Keith), Surname (O'Sullivan), Country (Select Country), Phone, E-mail (kosullivan@taxbackinternational.com), Account Role (Administrator), User Category (TBI Staff), and User ID (22).
- Report Role:** A table listing roles assigned to the user.
- Settings:** Includes Access (Full), Account Active (checked), Two Factor Authentication (unchecked), Single Sign On (unchecked), Account Created on (2021-10-19 09:48:12), and Last Logged in (2021-11-04 11:39:07).
- SFTP Details:** Fields for Username (kosullivan9192838179test), Host (sftp.taxbackinternational.com), and Port (22), with an 'EMAIL MY CREDENTIALS' button.

A 'Notification Preferences' modal is open, showing the following options:

Notification Type
Once a day
Once every two days
Once every three days
Once a week
Once a month
No notifications

Note: The reminders will be sent to the email address assigned in the user profile.

Below as a sample of an email reminder:

Dear [REDACTED]

We need your attention and actions on the following returns:

Data Provider - 2 returns

Entity	Country	Type	Frequency	Return Period	Due Date	Status
UK1	United Kingdom	VAT Return	Quarterly	Apr-Jun 2021	2021-08-01	Data Due
UK2	United Kingdom	VAT Return	Quarterly	Apr-Jun 2021	2021-08-01	Data Due

Approver - 2 returns

Entity	Country	Type	Frequency	Return Period	Due Date	Status
UK2	United Kingdom	VAT Return	Quarterly	Oct-Dec 2020	2021-02-07	To Approve
UK2	2021-08-01 United Kingdom	VAT Return	Quarterly	Apr-Jun 2020	2021-05-08	To Approve

Please [log in](#) to your account, and help us move forward with your compliance returns.

Thank you!

Best regards,
TBI Compliance team
[Support at Taxback International](#)

Please do not reply to this email

If the user is responsible for multiple roles and multiple returns, they may be combined and grouped appropriately.

The user is advised to login to Comply and take the necessary action(s).

Notification Type:

What will Comply Send?

Escalation Trigger: Days

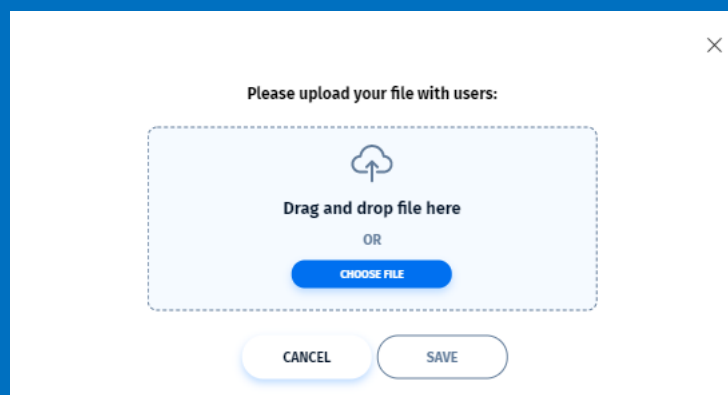

This displays the system and role credentials for the user, which was predefined at the initial account creation. This will include:

- Personal Details
- Report Role – these are the specific VAT return roles the user has been assigned to for any entities they are responsible for.
- Settings:
 - Access Type
 - Account Status
 - Account created date
 - Last Log on
 - Notification Preferences – The frequency the user receives system reminders for tasks assigned to them.
 - Escalation Trigger – The number of days after which an overdue task will be escalated to the user.

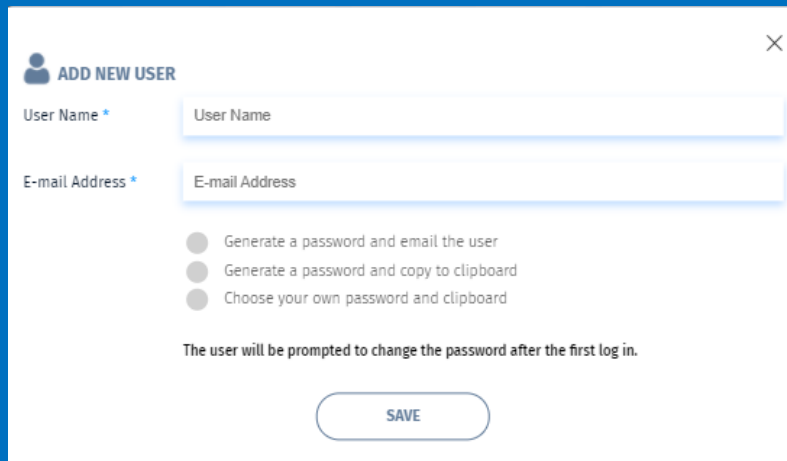

User Management

As an administrator, the user can view, manage and edit all existing users.

1. The Administrator can click the edit button on any existing user to make changes to that profile (*Including Activating and Deactivating user profiles*). This brings them to an editable version of the User Details screen for the selected user.
2. The Administrator can bulk import new members. The user can upload or drag and drop an existing prepopulated file from another location.

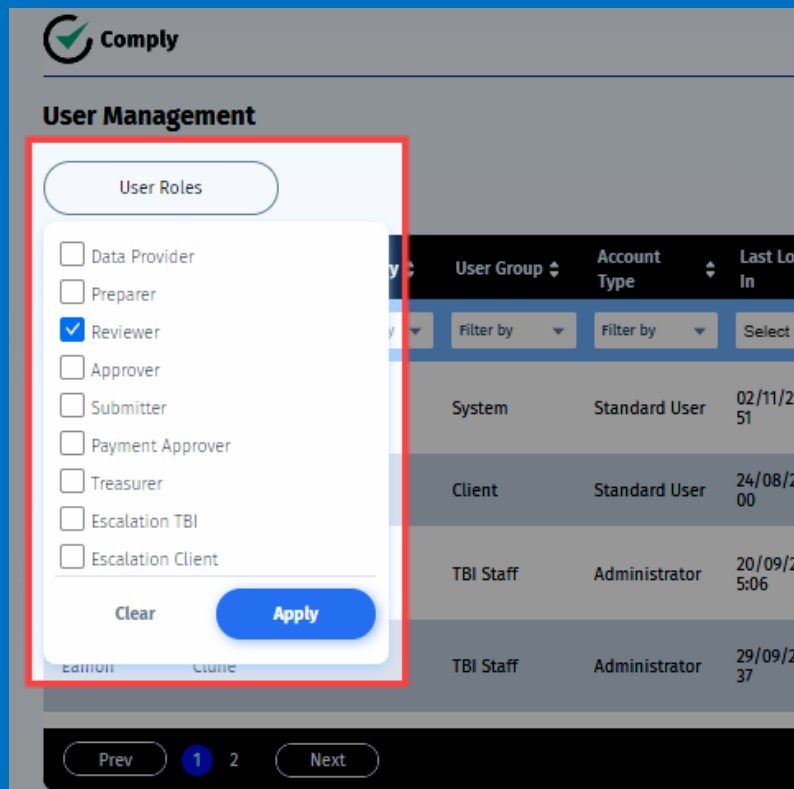

3. The Administrator can Manually add a new user.

The screenshot shows a modal window titled "ADD NEW USER" with a close button (X) in the top right corner. It contains two required text input fields: "User Name *" and "E-mail Address *". Below these fields are three radio button options for password generation: "Generate a password and email the user", "Generate a password and copy to clipboard", and "Choose your own password and clipboard". A note states, "The user will be prompted to change the password after the first log in." At the bottom is a "SAVE" button.

4. Filter the list of existing users to display only those unique to a specific role(s).

The screenshot displays the "User Management" interface. A "User Roles" filter modal is open, showing a list of roles with checkboxes. The "Reviewer" role is selected. The modal includes "Clear" and "Apply" buttons. In the background, a table lists users with columns for "User Group", "Account Type", and "Last Log In".

User Group	Account Type	Last Log In
System	Standard User	02/11/2020 15:51
Client	Standard User	24/08/2020 00:00
TBI Staff	Administrator	20/09/2020 15:06
TBI Staff	Administrator	29/09/2020 15:37

User Roles

Add roles for each user per jurisdiction by selecting in the dropdown under each entity. The role of each user allows them different levels of access to each entities data.

Entity PL 1

Jurisdiction	Data Provider	Preparer	Reviewer	Approver	Submitter	Payment Approver
Apply to All	Select User	Select User	Select User	Select User	Select User	Select User
Poland	✓ Keith O'Sullivan	Keith O'Sullivan	Keith O'Sullivan	Keith O'Sullivan	Keith O'Sullivan	Keith O'Sullivan

Here the administrator can assign/edit roles to each task in the VAT Return process. These tasks may assigned to:

- Client
- Taxback International (TBI) Staff
- System

Note 1: Each Entity could potentially consist of multiple jurisdictions. If so, they will appear here, and roles/users should be assigned to tasks for each jurisdiction as required.

Note 2: If the same roles/users are to be assigned to the same tasks for each jurisdiction, the user can select the roles from the drop-down options beside "Apply to All".

Note 3: Different users can also be assigned to different/multiple deliverables i.e. VAT Return/Intrastat/VIES per 1 VAT Number.

TBI Learning & Development: How to Onboard a Client

To assign a role/user to a task, the user can select the relevant user from the drop-down menu under a specific task.

The screenshot shows the 'Comply' system interface. At the top, there's a header with the 'Comply' logo and a user profile icon labeled 'KO'. Below the header, a text instruction reads: 'Add roles for each user per jurisdiction by selecting in the dropdown under each entity. The role of each user allows them different levels of access to each entities data.'

The main interface features a table with columns for 'Jurisdiction', 'Data Provider', 'Preparer', 'Reviewer', 'Approver', 'Submitter', and 'Payment Approver'. The 'Preparer', 'Reviewer', and 'Approver' columns are highlighted with a red box. The 'Preparer' dropdown menu is open, showing a list of users: 'Keith O'Sullivan', 'Client', 'TBI Staff', and 'System'. A hand cursor is pointing at 'Keith O'Sullivan' in the list.

Jurisdiction	Data Provider	Preparer	Reviewer	Approver	Submitter	Payment Approver
Apply to All	Select User	Select User	Select User	Select User	Select User	Select User
Poland	client	Keith O'Sullivan	Keith O'Sullivan	client	Keith O'Sullivan	Keith O'Sullivan

Note: This is currently sorted alphabetically.

3. Initial Company Configuration

The user must now configure the Company on the Comply platform. This process includes several steps which the system leads the user through.

To complete this process:

1. Go to the Navigation menu.
2. Click the **Settings** sub menu.
3. Click **Onboarding**.

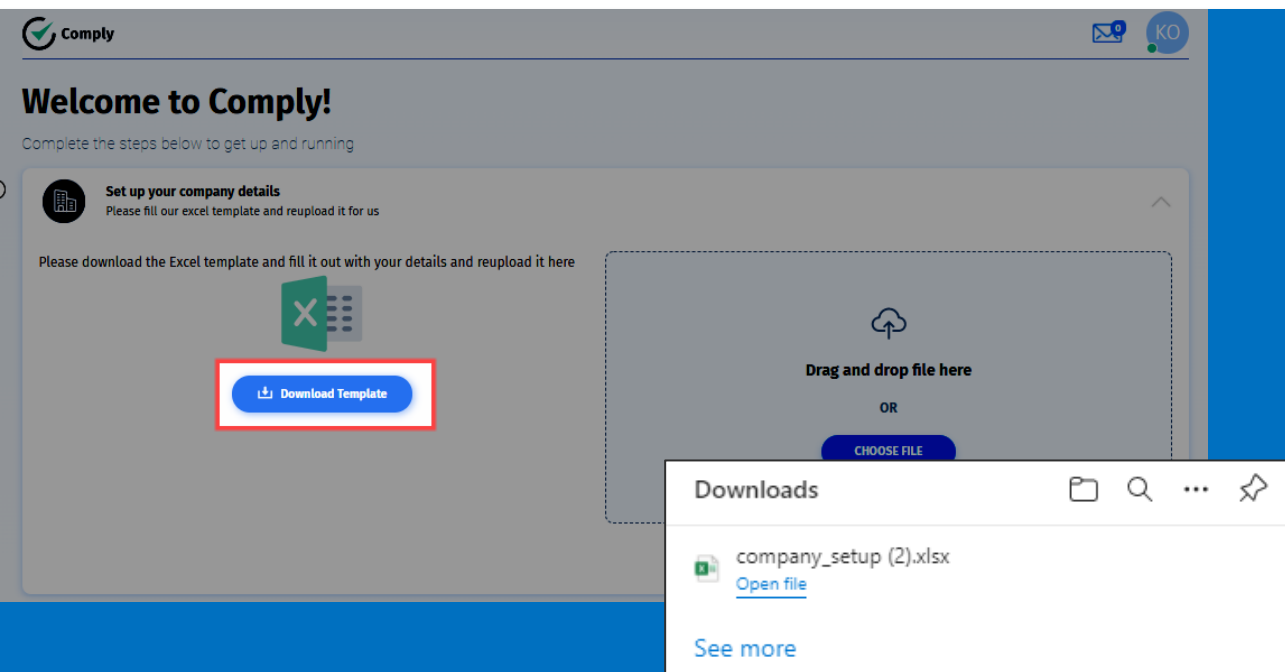

The screenshot displays the Taxback International Comply platform interface. On the left is a dark navigation menu with the Taxback International logo at the top. The menu items include Data, Returns, Transactions, Payments, Analytics, Security, Settings (highlighted with a red box), Onboarding (highlighted with a blue box and a hand cursor), Scheduler, Billing, Validation Rules, Transformations, Submission, Funding Payments, Entity, and Default Values. The main content area is titled 'Welcome to Comply!' and includes the instruction 'Complete the steps below to get up and running'. It lists three numbered steps: 1. 'Set up your company details' (with a building icon) which includes a 'Download Template' button and a 'Drag and drop file here' area with a 'CHOOSE FILE' button; 2. 'Set up your list of users' (with a person icon); and 3. 'Set up user roles' (with a shield icon). A 'Submit' button is at the bottom right of the first step, and 'Next Steps >' is at the bottom right of the entire list. The top right of the interface shows a 'Comply' logo, a notification icon, and a user profile icon labeled 'KO'.

4. Complete the steps numbered above in the screenshot. See below for more details on each step.

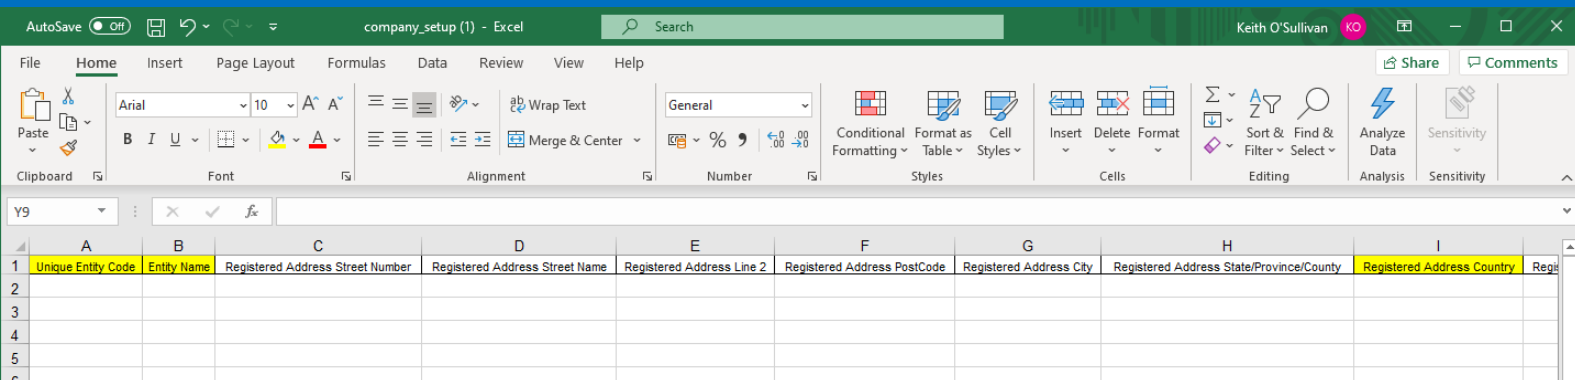

3.1. Set up your Company Details

The user is required to upload the relevant company data to Comply. To do this:

1. Download the Template.

2. Complete the spreadsheet.

Note: All columns highlighted in yellow are Mandatory fields.

Tip: Users should always check if an entity already exists before creating a new one. And in the case where a user is creating a new jurisdiction for an existing Company, they should review and ensure consistency with existing data.

3. Save the completed file.
4. Once complete, the user can:
 - a. Drag and Drop the saved file back into Comply.
 - b. Browse for and upload the file to Comply.

Welcome to Comply!

Complete the steps below to get up and running

Set up your company details
Please fill our excel template and reupload it for us

Please download the Excel template and fill it out with your details and reupload it here

Set up your list of users

Please share your contact list for users

Please download the Excel template and fill it out with your details and reupload it here

Download Template

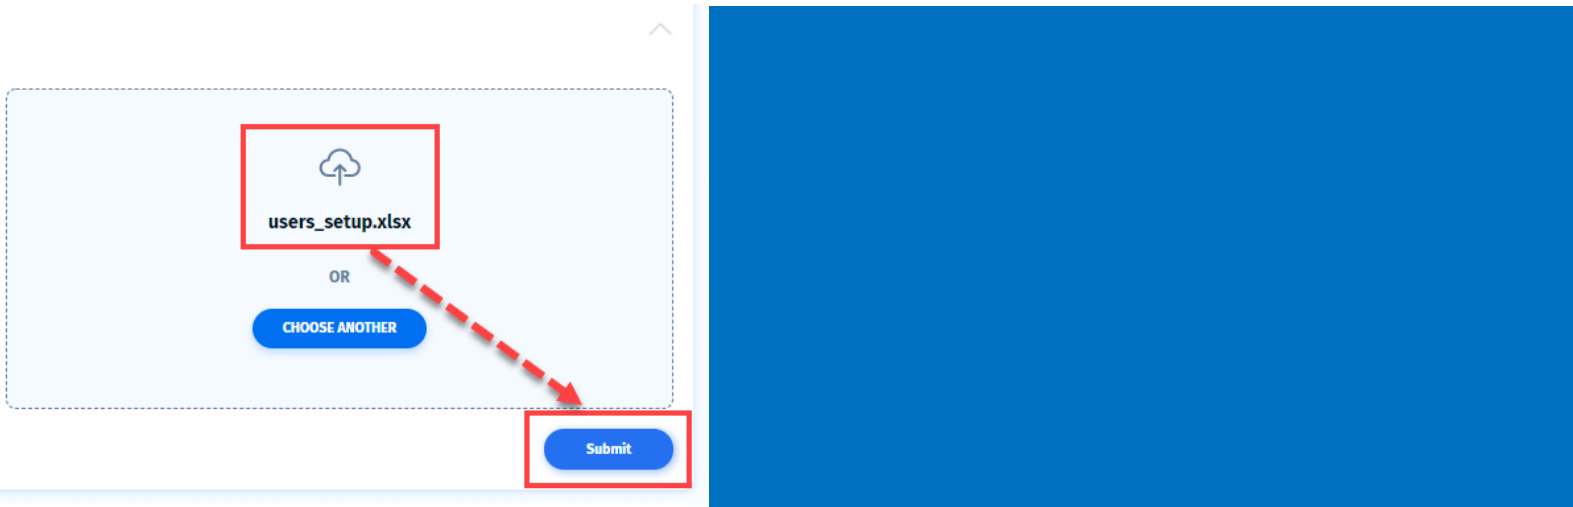

Drag and drop file here

OR

CHOOSE FILE

Submit

5. Click **Submit**.

Note: In the case where users already exist, the Administrator can upload a blank user set up template. This essentially skips this process where required.

3.3. Set up User Roles

The user is now required to assign roles to each task in the VAT Return process. A user must be selected for each mandatory role in Comply per jurisdiction.

The Mandatory roles are:

- Data Provider – person responsible for providing the data for the return.
- Preparer – person responsible for preparing the return.
- Reviewer – person responsible for reviewing the return.
- Approver – person responsible for approving the return.
- Submitter – person responsible for submitting the return.

These roles may be assigned to any of the following groups:

- Client Staff
- Taxback International (TBI) Staff
- System Bots

The screenshot shows the 'Comply' user interface. At the top, there's a 'Welcome to Comply!' message with instructions to complete setup steps. Three steps are listed: 'Set up your company details' (completed), 'Set up your list of users' (completed), and 'Set up user roles' (active). Below the active step, a dropdown menu shows 'Entity PL 1'. A table follows with columns for 'Jurisdiction', 'Data Provider', 'Preparer', 'Reviewer', 'Approver', 'Submitter', and 'Payment Approver'. The first row is 'Apply to All' and the second row is 'Poland'. Each cell in the table contains a 'Select User' dropdown menu. The 'Poland' row has a green checkmark in the 'Data Provider' column.

Jurisdiction	Data Provider	Preparer	Reviewer	Approver	Submitter	Payment Approver
Apply to All	Select User	Select User	Select User	Select User	Select User	Select User
Poland	✓ Select User	Select User	Select User	Select User	Select User	Select User

Note 1: A Company could potentially consist of multiple jurisdictions. If so, they will appear here, and roles/users should be assigned to tasks for each jurisdiction as required.

Note 2: If the same roles/users are to be assigned to the same tasks for each jurisdiction, the user can select the roles from the drop-down options beside “Apply to All”.

To assign a role/user to a task:

1. Select the relevant user from the drop-down menu under a specific task.

The screenshot shows the 'Comply' interface. At the top, there's a header with the 'Comply' logo and a user profile 'KO'. Below the header, a message states: 'Add roles for each user per jurisdiction by selecting in the dropdown under each entity. The role of each user allows them different levels of access to each entities data.' The main area features a table with columns for 'Jurisdiction', 'Data Provider', 'Preparer', 'Reviewer', 'Approver', 'Submitter', and 'Payment Approver'. The 'Preparer' column is highlighted with a red box, and its dropdown menu is open, showing a list of users including 'Keith O'Sullivan', 'Ivan C. Bankov', 'Mag Swan', 'Marc Ventura Meinersen', and 'Nigel O'Donovan'. A hand cursor is pointing at 'Keith O'Sullivan'.

Jurisdiction	Data Provider	Preparer	Reviewer	Approver	Submitter	Payment Approver
Apply to All	Select User	Select User	Select User	Select User	Select User	Select User
Poland	client	Keith O'Sullivan	Keith O'Sullivan	client	Keith O'Sullivan	Keith O'Sullivan

2. Complete for all relevant roles.
3. Click **Submit**.

Note 1 - It may be the case that the **Preparer** and **Submitter** is the same person, but there are rules built in to prevent the Preparer and Reviewer from being the same person.

Note 2 – The **Reviewer** and **Approver** roles can be assigned to the system user which will automatically approve the return for that stage in the process. This can be assigned in situations where the data provided does not require calculations or is ready for submission.

Note 3 – Additional non-mandatory roles are also available for completion

- Payment Approver – Applies to TBI Pay service.
- Treasurer – Applies to TBI Pay service.
- Escalation TBI – more than one approved user can be appointed here as a point of escalation.
- Escalation Client – more than one approved user can be appointed here as a point of escalation.

4. Complete the same process for each Jurisdiction.

Please set up user roles for entities

Add roles for each user per jurisdiction by selecting in the dropdown under each entity. The role of each user allows them different levels of access to each entity.

4. Configure the Scheduler

Overview

The scheduler allows the user to configure the number of days it will take to complete each stage in the return process. It then calculates the completion dates for each step. This ensures that the return is submitted on-time by the submission deadline.

There are 5 stages which must be set, these are:

- Data Due
- To Prepare
- To Review
- To Approve
- To Submit

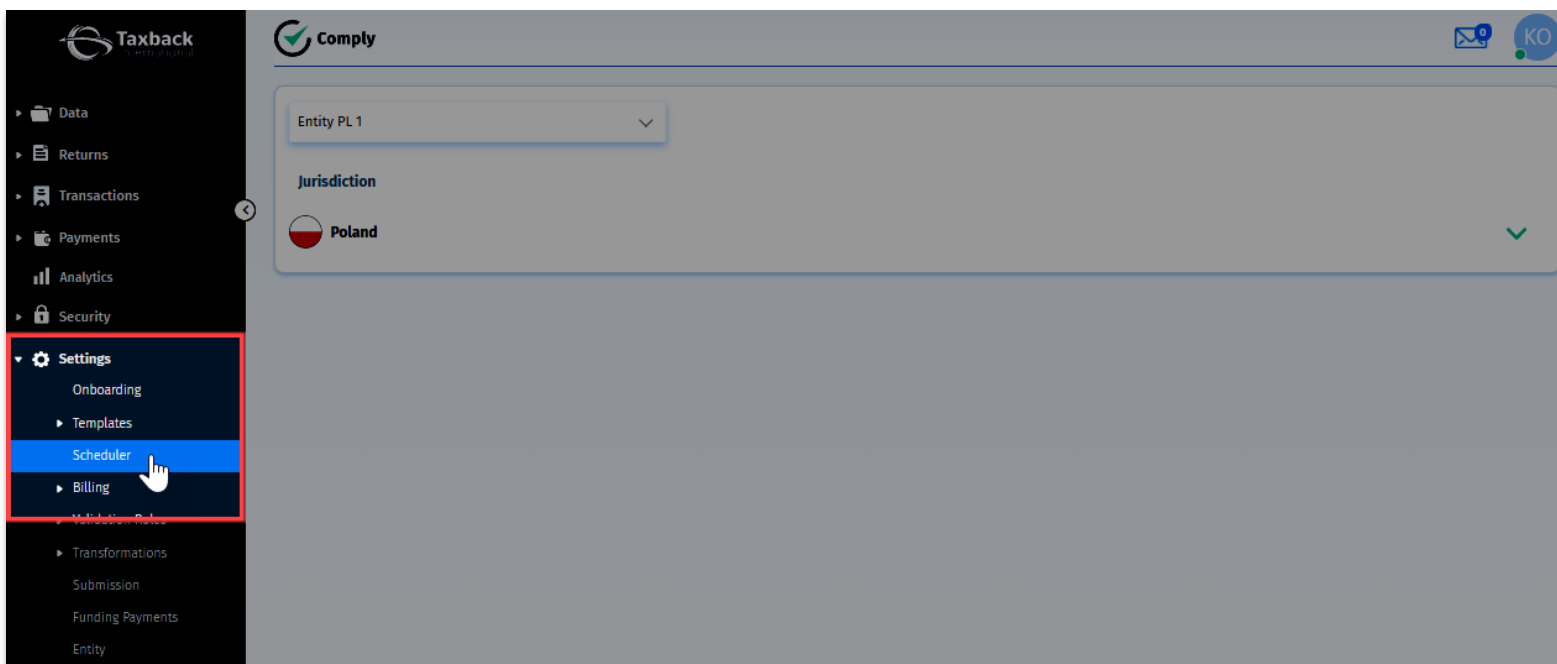

Note: The number of days between each stage is set by default but the user may decide to amend this timeframe.

The screenshot displays the 'Comply' software interface for configuring tax return schedules. The top navigation bar includes the 'Comply' logo, a notification icon, and a user profile icon labeled 'KO'. The main content area is titled 'Entity PL 1' and 'Jurisdiction Poland'. Below this, the 'VAT Return' section is active, showing the 'VAT Return Scheduler' with toggle switches for 'Avoid Weekends' and 'Avoid Holidays'. The scheduler consists of a sequence of stages with arrows indicating the flow: 'Data Due' (15 Nov 2021) with a 3-day interval, 'To Prepare' (18 Nov 2021) with a 1-day interval, 'To Review' (19 Nov 2021) with a 3-day interval, 'To Approve' (22 Nov 2021) with a 3-day interval, 'To Submit' (25 Nov 2021) with a 0-day interval, and 'Submission Due' (25 Nov 2021). A 'View Scheduler' link is provided below the stages. The 'Payment Scheduler' section also has 'Avoid Weekends' and 'Avoid Holidays' toggle switches. It shows a sequence of stages: 'To Approve Payment' (13-01-2021), 'To Book Payment' (16-01-2021) with a 3-day interval, 'To Transfer Funds' (18-01-2021) with a 3-day interval, 'Awaiting Funds' (20-01-2021) with a 3-day interval, 'Payment in Progress' (20-01-2021) with a 1-day interval, 'Funds Sent to Tax Office' (20-01-2021) with a 1-day interval, and 'Paid' (20-01-2021) with a 3-day interval. A 'View Scheduler' link is also present below the payment stages.

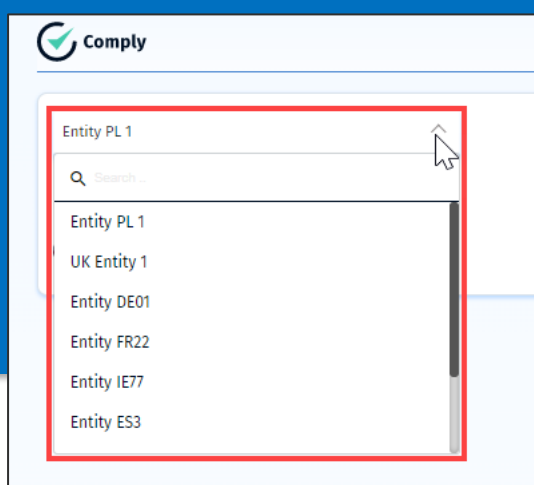

4.2. Setting the Scheduler

To set up the scheduler the user should follow these steps:

1. Go to the Navigation menu.
2. Click the **Settings** sub menu.
3. Click **Scheduler**.

4. Select the Entity drop-down menu to set the scheduler for.

Note: You will need to set a schedule for each entity.

- Click the arrow on the selected jurisdiction to open the scheduler.

View Scheduler

This opens the VAT Return displaying 2 schedule options:

- VAT Return Scheduler
- Payment Scheduler – This relates to TBI Pay and will be covered in a later relevant guide.

For the VAT Return Scheduler, the most important date to consider is the **Submission Date**. This is the date by which the VAT Return must be submitted, anything outside of this, the return will be considered late and may incur penalties.

So when considering the scheduler and each of the stages of the return the user should start with the **Submission Date** and work backwards.

- Click the drop-down option on each of stages of the return and select the number of days the user needs to complete the process.

The screenshot shows the 'VAT Return Scheduler' interface. At the top, there's a 'Comply' logo and a user profile 'KO'. Below, the 'Entity' is set to 'PL 1' and the 'Jurisdiction' is 'Poland'. The 'VAT Return Scheduler' section has two toggle switches: 'Avoid Weekends' and 'Avoid Holidays'. The timeline shows the following stages and their durations (in days):

- Data Due: 15 Nov 2021 (3 days)
- To Prepare: 18 Nov 2021 (1 day)
- To Review: 19 Nov 2021 (3 days)
- To Approve: 22 Nov 2021 (3 days) - This stage is highlighted with a red box, and its dropdown menu is open, showing options from 0 to 5.
- To Submit: 25 Nov 2021 (0 days)
- Submission Due: 25 Nov 2021

Below the VAT Return Scheduler is the 'Payment Scheduler' section, also with 'Avoid Weekends' and 'Avoid Holidays' toggle switches. Its timeline shows:

- To Approve Payment: 13-01-2021
- To Book Payment: 16-01-2021 (3 days)
- To Transfer Funds: 18-01-2021 (3 days)
- Payment in Progress: 20-01-2021 (1 day)
- Funds Sent to Tax Office: 20-01-2021 (1 day)
- Paid: 20-01-2021 (3 days)

Example: Working backwards from the Submission Date of e.g. 25th Nov 2021:

- Once submitted, the status updates immediately.
- It will take 3 days to submit from when it is approved.
- It will take 3 days to approve from when it is reviewed.
- It will take 1 day to review from when it is prepared.
- It will take 3 days to prepare from when the data is received.

- Reminder: Complete this process for each Entity.

Note 1:

The user can choose to filter out Weekends in the scheduler.

E.g. If 2 days are required to complete a stage, the user can set the scheduler to ignore weekends, and will include working days only as part of this 2-day timeframe.

The screenshot shows the 'VAT Return Scheduler' interface. At the top, there is a dropdown menu for 'Entity PL 1' and a 'Jurisdiction' section with a flag for 'Poland'. Below this, the 'VAT Return Scheduler' section contains two toggle switches: 'Avoid Weekends' (which is turned on and highlighted with a red box) and 'Avoid Holidays' (which is turned off). Below the toggles, a timeline shows the following stages: 'Data Due' (15 Nov 2021) with a dropdown of '3', 'To Prepare' (18 Nov 2021) with a dropdown of '1', 'To Review' (19 Nov 2021) with a dropdown of '3', 'To Approve' (22 Nov 2021) with a dropdown of '3', 'To Submit' (25 Nov 2021) with a dropdown of '0', and 'Submission Due' (25 Nov 2021). Blue arrows point from each stage to the next. At the bottom right, there is a 'View Scheduler' link with an upward arrow icon.

Note 2:

The user can also choose to filter out Public Holidays in the scheduler.

E.g. If 2 days or more are required to complete any stage, the user can set the scheduler to ignore public holidays and will include the working days only as part of the timeline.

This screenshot is similar to the one above, showing the 'VAT Return Scheduler' interface. In this instance, the 'Avoid Weekends' toggle is turned off, and the 'Avoid Holidays' toggle (highlighted with a red box) is turned on. The timeline and other UI elements remain the same as in the previous screenshot.

Regarding the public holidays, this is based on the country where the user is based for at stage.

4.2.1. Viewing the schedule

To view the future returns schedule:

1. Click **View Scheduler**.

Return Period	Frequency	Status	Return Type	Data Due	To Prepare	To Review	To Approve	To Submit	Submission Due
Oct 2021	Monthly	Data Due	VAT Return	15/11/2021	18/11/2021	19/11/2021	22/11/2021	25/11/2021	25/11/2021
Nov 2021	Monthly	Data Due	VAT Return	13/12/2021	16/12/2021	17/12/2021	22/12/2021	27/12/2021	27/12/2021
Jan 2022	Monthly	Data Due	VAT Return	11/02/2022	16/02/2022	17/02/2022	22/02/2022	25/02/2022	25/02/2022
Feb 2022	Monthly	Data Due	VAT Return	11/03/2022	16/03/2022	17/03/2022	22/03/2022	25/03/2022	25/03/2022

The scheduler is populated with future returns and has calculated the dates required for each stage of each return.

4.2.2. Manually Change Specific Future Dates

The user can choose to manually amend a specific date, for a specific stage, for a specific return.

E.g. Change the To Approve date, on the Jan 2022 return.

To do this:

1. Open the Scheduler.
2. Click View Scheduler.

3. Click on the date box of the To Approve stage of the required return.

Note: This change will trigger a recalculation of the dates in the previous stages for that return.

5. Configure the Data Transformation Template

5.1. Why is a Data Transformation Template Required?

Clients onboarding to Comply, in most cases use Excel files downloaded from their own ERP systems to file returns. Each of these files contain transactional data with vast numbers of Columns. The naming convention and meanings of these columns of data may differ to what TBI looks for. So Comply needs to “understand” the clients data, and process it accurately.

5.2. What is a Data Transformation Template?

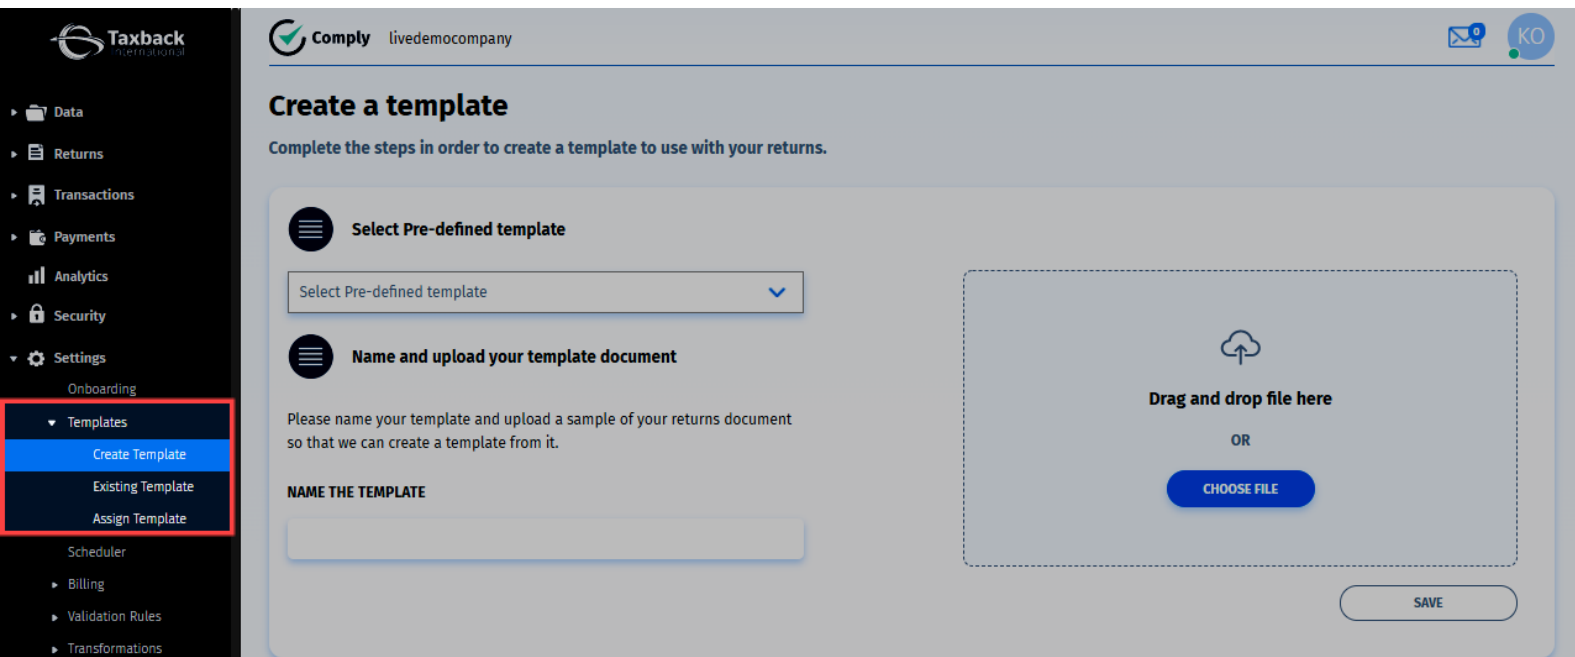

A **Data Transformation Template** allows the user to upload a sample file from their system, and map the relevant fields to the relevant TBI fields and create rules which define the meaning of values in certain fields.

Once configured, every time their data is imported to TBI via an API, Comply uses the template to auto transform their data without the need for manual intervention

To do this, the user must complete the following processes:

- Create a Data Template.
- Map the data to the TBI fields.
- Assign a Template to a Return.

To complete this configuration Comply has a specific Templates are on the Menu.

There are 3 sub menus:

- Create Template
- Existing Template
- Assign Template

Create a Template

The user must define how the Comply platform should recognize the fields of information in the client's data file which are required to upload to a return.

5.2.1. Create the new template:

1. Extract a sample report of the data from the client's ERP system (this should be the report normally used by the client when preparing VAT returns).
2. In Comply, click on **Templates** on the Menu.
3. Click the **Create Template** sub-menu.

Create a template
Complete the steps in order to create a template to use with your returns.

6. Chose a file or simply drag and drop a file from wherever the file is located locally.

7. Click Save.

Once the new template has been created, the user must map the data uploaded to the mandatory fields/columns required by TBI. Comply will lead you through the relevant screens to complete the following:

- Map the fields.
- Map the Codes.
- Identify additional File Name Information.
- Set Data Transformation Rules/Tax Treatments/Other Transformation Rules/Date & Number Formats.

5.2.2. Map the Data to the TBI fields

Comply displays the list of the column headers uploaded from the client file on the left and the pre-defined TBI fields on the Right.

There are a number of screens to complete. On each one, match up the required column headers by dragging and dropping them into the TBI fields. This instructs Comply which columns hold the required data.

1. This displays the progress of the template creation process.
2. This is a list view of the users imported fields.
3. You can use the **Search** feature to locate specific fields when mapping them to TBI fields. This is useful when you have imported a large number of fields.

4. This is a list of the required TBI fields. You will need to match your imported fields to these if required.

5. Where mandatory fields are missing, you will be prompted here. Clicking this link will open a list of Mandatory fields you will need to map.

Note: The user should map as many TBI fields as possible, however Mandatory fields are marked with a red Asterix.

1. Tax Data

This first screen requires the user to match Tax specific data fields.

5.2.3. 1 to Many Mapping

Comply also allows the user, to map fields in the Client data to a TBI field more than once (where the TBI field is a required field in more than one mapping screen).

After dragging and dropping a client field, the header remains in the “All Columns From Your Excel” section to be used again if necessary. It also displays a numerical icon identifying how many times the header has been mapped.

5.2.4. Map the Tax Transaction Codes

The user must now define/configure the Tax Transaction Codes.

 **Comply** livedemocompany

PLTemp

Mapping tax transaction codes

Map transaction type codes	2 CODES MAPPED SUCCESSFULLY	✓
Map transaction category codes		✓
Map goods and services codes		✓
Map tax transaction codes	3 CODES MAPPED SUCCESSFULLY	✓
VAT Breakdown in Multiple Columns mapping		✓

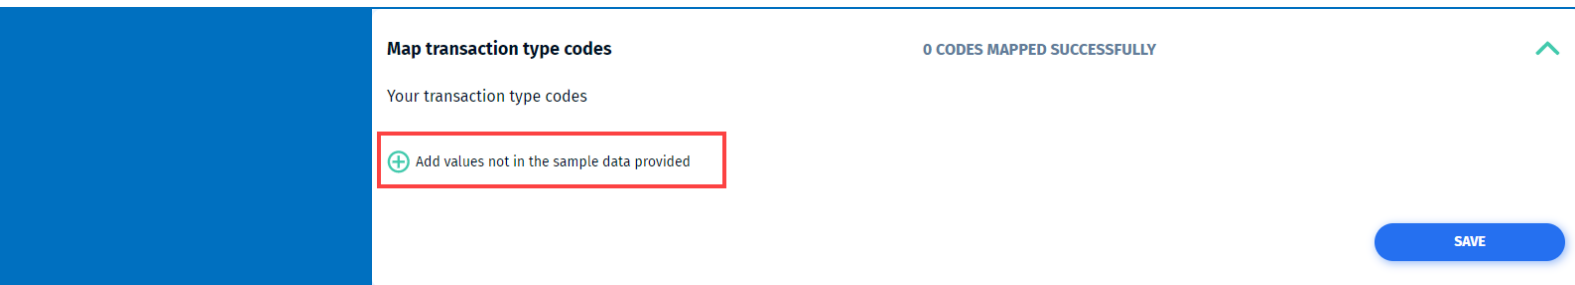

Please Note:

If the user accesses this screen via "Existing Template", any current values and mappings will be displayed here and can be edited accordingly (depending on the users profile).

The user can configure/define each of these codes by clicking the green arrow beside section.

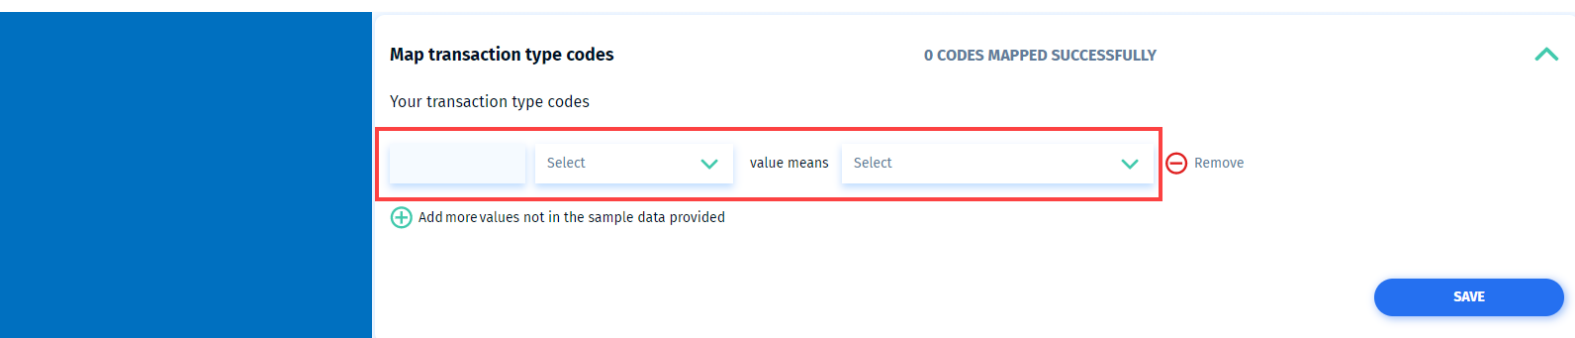

Map Transaction Type Codes

1. Click the green arrow on **Map Transaction Type Codes**.
2. Click the green + button to add new codes.

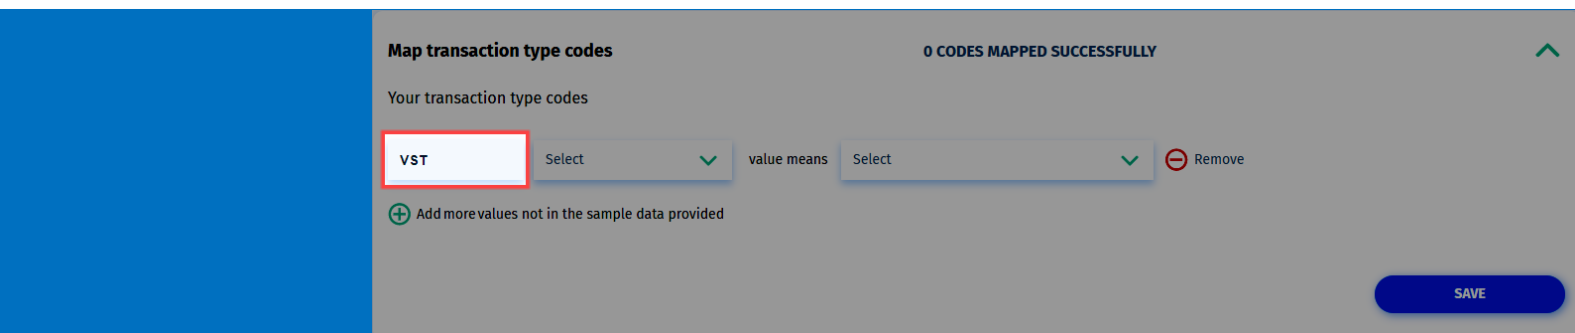

The screenshot shows the 'Map transaction type codes' interface. At the top, it says '0 CODES MAPPED SUCCESSFULLY' with a green upward arrow. Below this, the text 'Your transaction type codes' is displayed. A red box highlights a green plus button with the text 'Add values not in the sample data provided'. At the bottom right, there is a blue 'SAVE' button.

3. Define the code values.

The screenshot shows the 'Map transaction type codes' interface. A red box highlights a new row where a code value is being defined. It consists of a text input field, a 'Select' dropdown menu with a green checkmark, the text 'value means', another 'Select' dropdown menu with a green checkmark, and a 'Remove' button with a red minus sign. Below this row, there is a green plus button with the text 'Add more values not in the sample data provided'. At the bottom right, there is a blue 'SAVE' button.

4. Enter a Transaction Type Code.

The screenshot shows the 'Map transaction type codes' interface. A red box highlights the text input field in the first row, which now contains the value 'VST'. The rest of the interface, including the 'Select' dropdowns, 'value means' text, 'Remove' button, and 'SAVE' button, remains the same as in the previous screenshot.

5. Click the drop-down menu to define if the value should be Positive or Negative.

7. Click **Save**.

Map Goods and Services

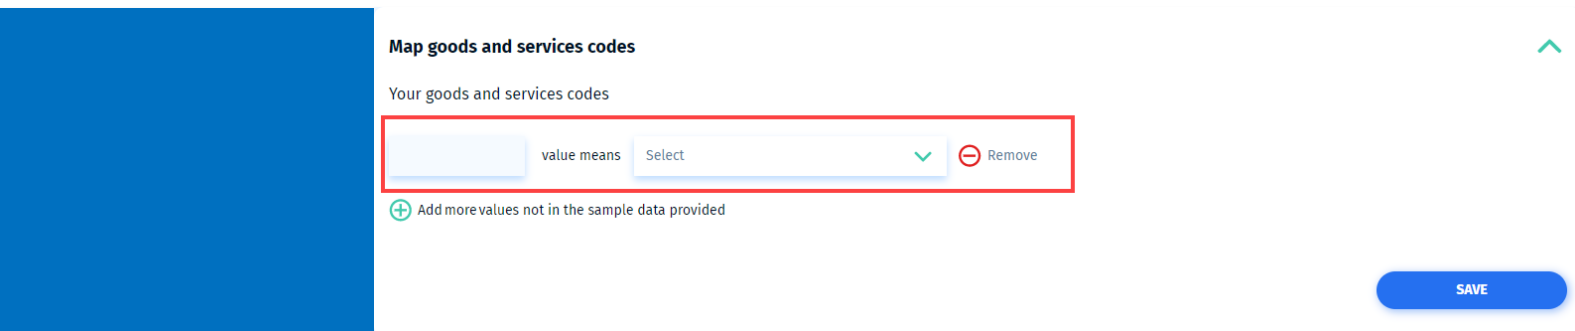

The user should configure the list of Goods and Services and define what each one represents.

1. Click the green arrow on **Map Goods and Services Codes**.
2. Click the green + button to add new codes.

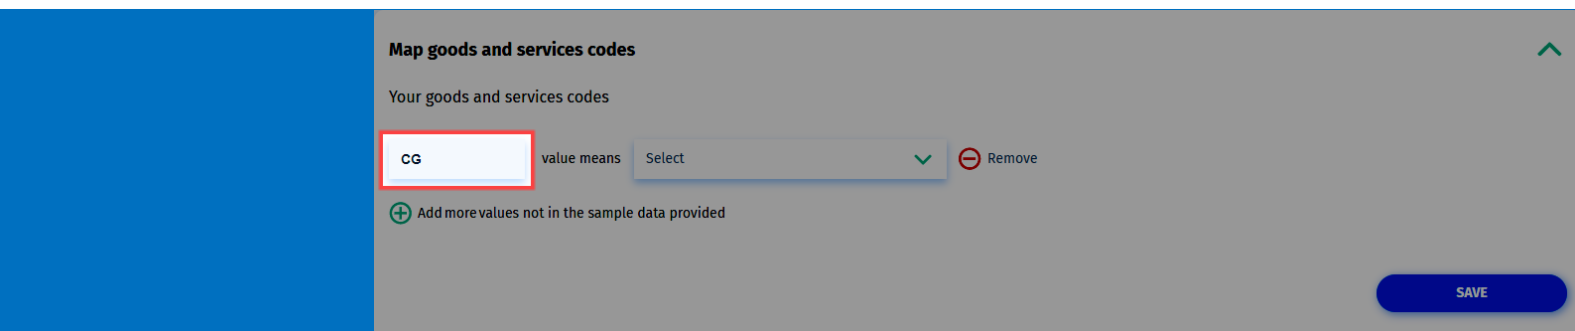

The screenshot shows the 'Map goods and services codes' interface. The title 'Map goods and services codes' is at the top right with a green up arrow. Below it is the subtitle 'Your goods and services codes'. A red box highlights a green plus icon followed by the text 'Add values not in the sample data provided'. At the bottom right is a blue 'SAVE' button.

3. Define the code values.

The screenshot shows the 'Map goods and services codes' interface. The title 'Map goods and services codes' is at the top right with a green up arrow. Below it is the subtitle 'Your goods and services codes'. A red box highlights a text input field containing 'value means', a dropdown menu with 'Select' and a green checkmark, and a red minus icon followed by the text 'Remove'. Below the red box is a green plus icon followed by the text 'Add more values not in the sample data provided'. At the bottom right is a blue 'SAVE' button.

4. Enter a Goods/Services Code.

The screenshot shows the 'Map goods and services codes' interface. The title 'Map goods and services codes' is at the top right with a green up arrow. Below it is the subtitle 'Your goods and services codes'. A red box highlights a text input field containing 'CG'. To the right of the input field is the text 'value means', a dropdown menu with 'Select' and a green checkmark, and a red minus icon followed by the text 'Remove'. Below the red box is a green plus icon followed by the text 'Add more values not in the sample data provided'. At the bottom right is a blue 'SAVE' button.

5. Click the drop-down menu to select a value for the code.

The screenshot shows the 'Map goods and services codes' section of a software interface. A dropdown menu is open, displaying a list of options: 'Capital assets - goods', 'Capital assets - services', 'Commodities', 'Investment Goods', 'Miscellaneous goods', and 'Miscellaneous services'. The 'CG' code is selected, and the text 'value means' is visible. A green plus button is labeled 'Add more values not in the sample'. A 'Remove' button is also present. A 'SAVE' button is at the bottom right. A status message at the bottom right says 'CODES MAPPED SUCCESSFULLY'.

6. Click the green + button to add more codes as required.

The screenshot shows the 'Map goods and services codes' section after four codes have been mapped. The status message at the top right says '4 CODES MAPPED SUCCESSFULLY'. The table below shows the mapped codes:

Code	Value Means	Selected Code	Action
CG	value means	Capital assets - g...	Remove
CS	value means	Capital assets - se...	Remove
TG	value means	Trade goods	Remove
TS	value means	Trade services	Remove

A green plus button is labeled 'Add more values not in the sample data provided'. A 'SAVE' button is at the bottom right.

7. Click **Save**.

Map Tax Transaction Codes

The user should map/configure the list of relevant Tax Transaction Codes required.

1. Click the green arrow on **Map Tax Transaction Codes**.
2. Define the code values.

Deleting a Transformation Rule:

A pop-up notification is displayed in the case where a user deletes a rule using the trash icon.

DELETING TRANSFORMATION RULE

Are you sure you want to delete?

Yes No

5.2.5. Date and Number Format

The user can configure how the client wishes the Dates and Numbers should be read.

The screenshot shows the 'Date and Number Format' configuration page. At the top, the 'Comply' logo and 'livedemocompany' are visible. A notification icon with '0' and a user profile icon 'KO' are in the top right. The page title is 'Date and Number Format'. A message states '4 fields are still missing'. Below this is a table with three columns: 'Tax Period', 'Tax Treatment', and 'Transaction Fields'. The 'Tax Treatment' column contains 'Transaction Category' and 'Goods Services Category'. The 'Transaction Fields' column contains 'Sales/Purchase Transaction' and 'Currency'. The main configuration area has a 'Date Format' dropdown menu with 'Please select' and a blue arrow. Below it are three 'Number Format' dropdown menus: 'Decimal Separator', 'Thousands Separator', and 'Negative Separator', each with 'Please select' and a blue arrow. A blue 'SAVE' button is at the bottom right.

Tax Period	Tax Treatment	Transaction Fields
Tax Jurisdiction ISO Code	Transaction Category	Sales/Purchase Transaction
	Goods Services Category	Currency

Date Format

Please select

Number Format - Decimal Separator

Please select

Number Format - Thousands Separator

Please select

Number Format - Negative Separator

Please select

SAVE

1. Select a relevant option from the **Date Format** drop-down menu.

This close-up shows the 'Date Format' dropdown menu open. The menu lists five options: 'DD/MM/YYYY', 'MM/DD/YYYY', 'DD.MM.YYYY', 'MM.DD.YYYY', and 'YYYY-MM-DD'. A hand cursor is pointing at the 'MM/DD/YYYY' option, which is highlighted. The background shows the same configuration page as the previous screenshot, but with the dropdown menu open.

Date Format

Please select

DD/MM/YYYY

MM/DD/YYYY

DD.MM.YYYY

MM.DD.YYYY

YYYY-MM-DD

Number Format - Thousands Separator

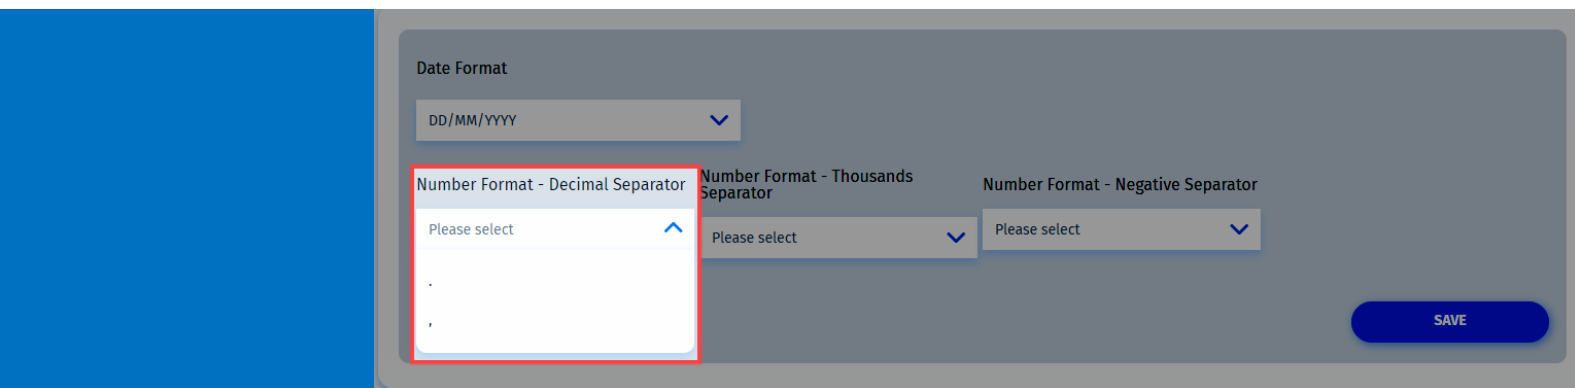

Please select

Number Format - Negative Separator

Please select

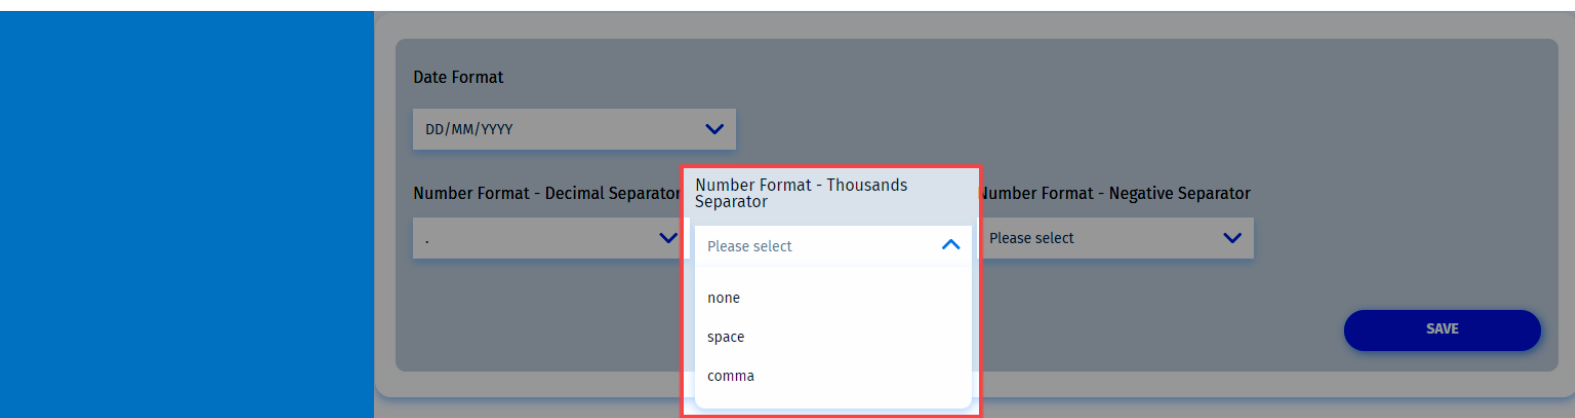

SAVE

2. Select a relevant option from the **Number Format – Decimal Separator** drop-down menu.

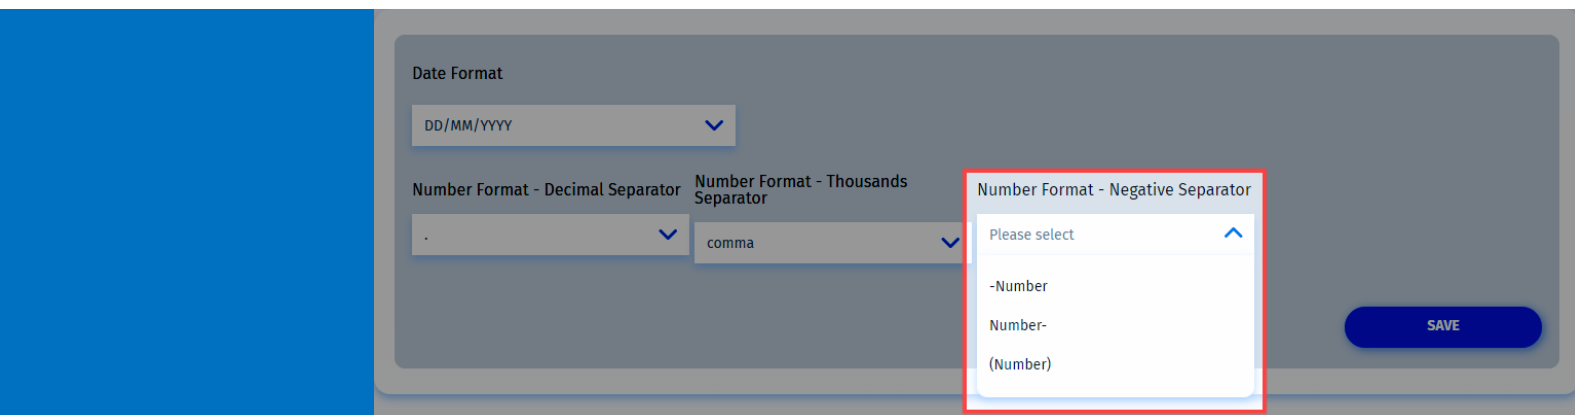

The screenshot shows a configuration panel for 'Date Format' and 'Number Format'. The 'Date Format' dropdown is set to 'DD/MM/YYYY'. The 'Number Format - Decimal Separator' dropdown is open, showing a list of options with a red box highlighting it. The other two dropdowns, 'Number Format - Thousands Separator' and 'Number Format - Negative Separator', are both set to 'Please select'. A blue 'SAVE' button is located at the bottom right of the panel.

3. Select a relevant option from the **Number Format – Thousands Separator** drop-down menu.

The screenshot shows the same configuration panel. The 'Number Format - Decimal Separator' dropdown is now set to '.'. The 'Number Format - Thousands Separator' dropdown is open, showing a list of options: 'Please select', 'none', 'space', and 'comma'. A red box highlights this dropdown. The 'Number Format - Negative Separator' dropdown remains set to 'Please select'. The blue 'SAVE' button is still visible at the bottom right.

4. Select a relevant option from the **Number Format – Negative Separator** drop-down menu.

The screenshot shows the configuration panel with the 'Number Format - Thousands Separator' dropdown now set to 'comma'. The 'Number Format - Negative Separator' dropdown is open, showing a list of options: 'Please select', '-Number', 'Number-', and '(Number)'. A red box highlights this dropdown. The 'Number Format - Decimal Separator' remains set to '.'. The blue 'SAVE' button is at the bottom right.

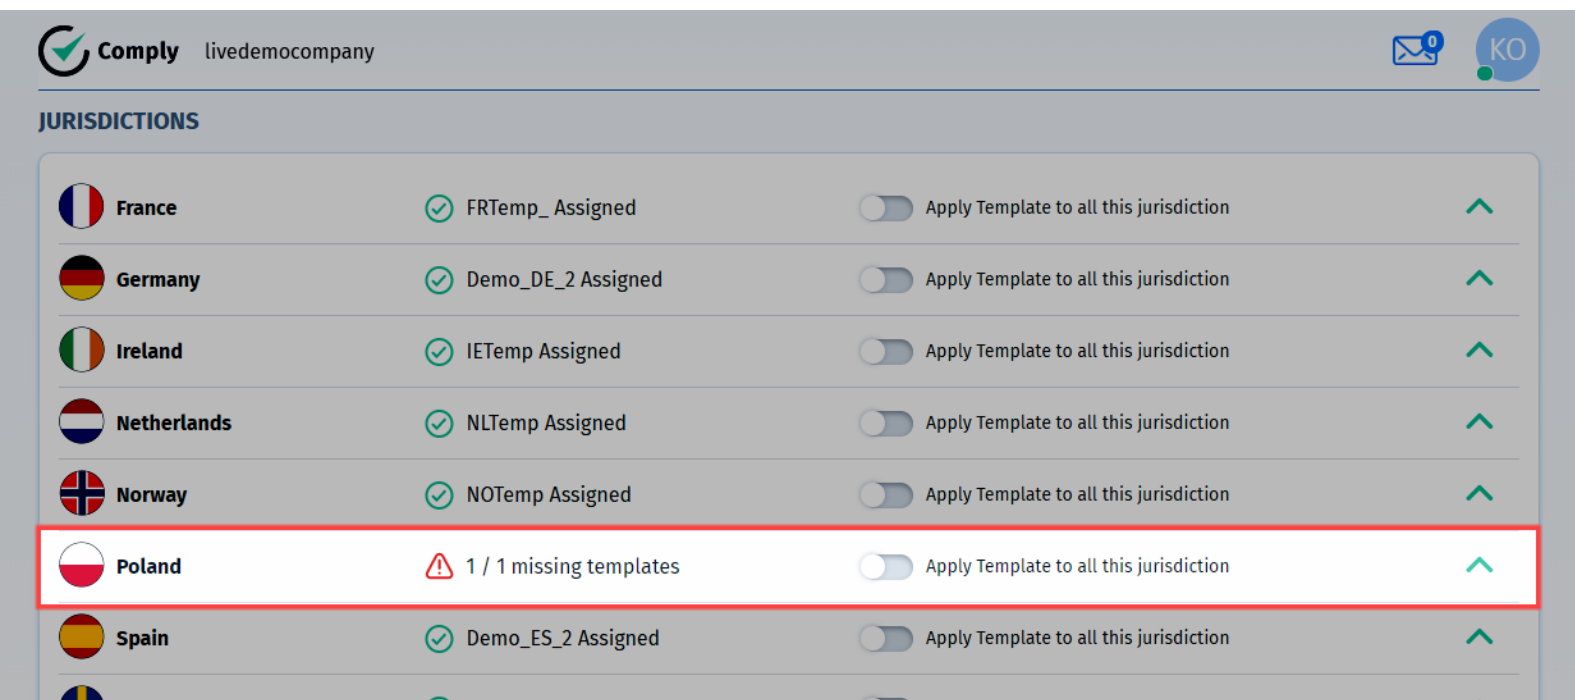

5. Click **Save**.

At this point, when the user clicks **Next**, they will be asked to review the file mapping completed using all the above steps. If they are satisfied with the template, then the user clicks **Save**.

5.2.6. Assign the Template

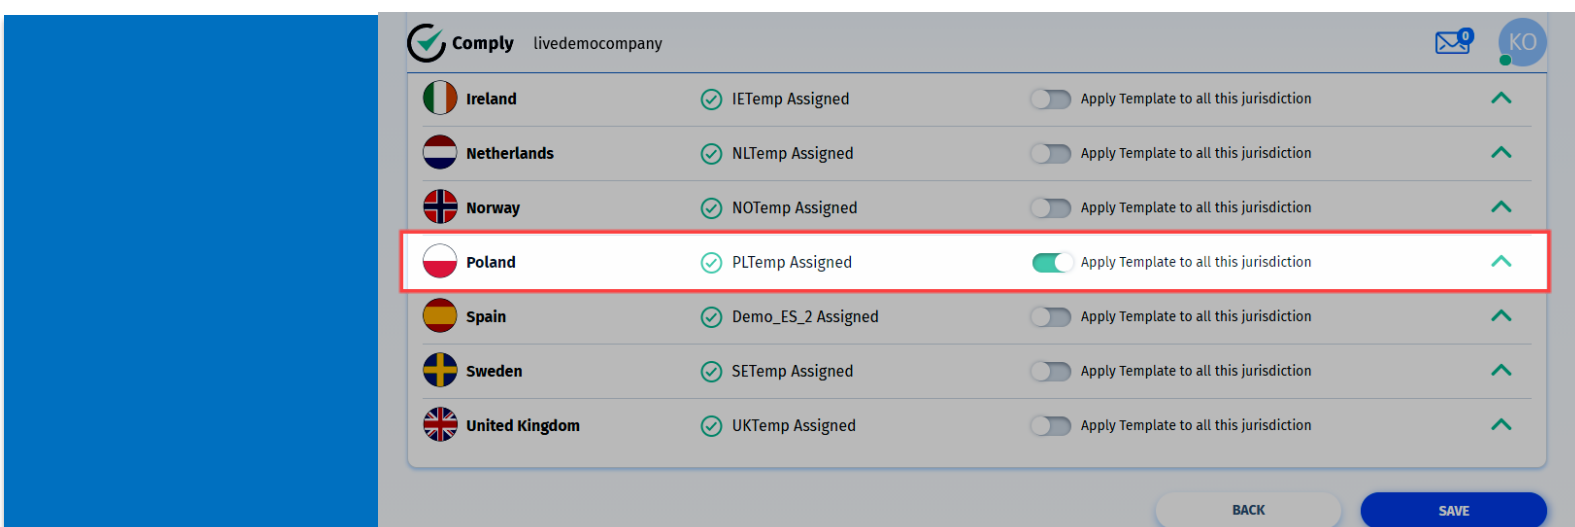

Once the user has created the Template, it needs to be assigned.

E.g. The user creates a template for Poland. The need to assign that to the jurisdiction of Germany.

Jurisdiction	Template Status	Apply Template to all this jurisdiction	Action
France	FRTemp_ Assigned	☐	Up Arrow
Germany	Demo_DE_2 Assigned	☐	Up Arrow
Ireland	IETemp Assigned	☐	Up Arrow
Netherlands	NLTemp Assigned	☐	Up Arrow
Norway	NOTemp Assigned	☐	Up Arrow
Poland	⚠️ 1 / 1 missing templates	☐	Up Arrow
Spain	Demo_ES_2 Assigned	☐	Up Arrow

1. Click the **Toggle Button** to assign the new template to the relevant jurisdiction.

Jurisdiction	Template Status	Apply Template to all this jurisdiction	Action
Ireland	IETemp Assigned	☐	Up Arrow
Netherlands	NLTemp Assigned	☐	Up Arrow
Norway	NOTemp Assigned	☐	Up Arrow
Poland	PLTemp Assigned	☒	Up Arrow
Spain	Demo_ES_2 Assigned	☐	Up Arrow
Sweden	SETemp Assigned	☐	Up Arrow
United Kingdom	UKTemp Assigned	☐	Up Arrow

Please note: By turning this on, it will assign the template to all entities within that jurisdiction. If you wish to choose which entities it is to be assigned to, complete the following steps.

2. (Optional) Click the green arrow to expand the jurisdiction option.
3. Turn on the toggle button for the relevant Entity(s).

The screenshot shows the 'Comply' interface for 'livedemocompany'. It lists several jurisdictions with their assigned templates and options to apply the template to all entities in that jurisdiction. The 'Poland' row is highlighted with a red box, showing 'Entity PL 1' with 'PLTemp Applied' toggle turned on and 'VAT Return' selected under 'Return Types'.

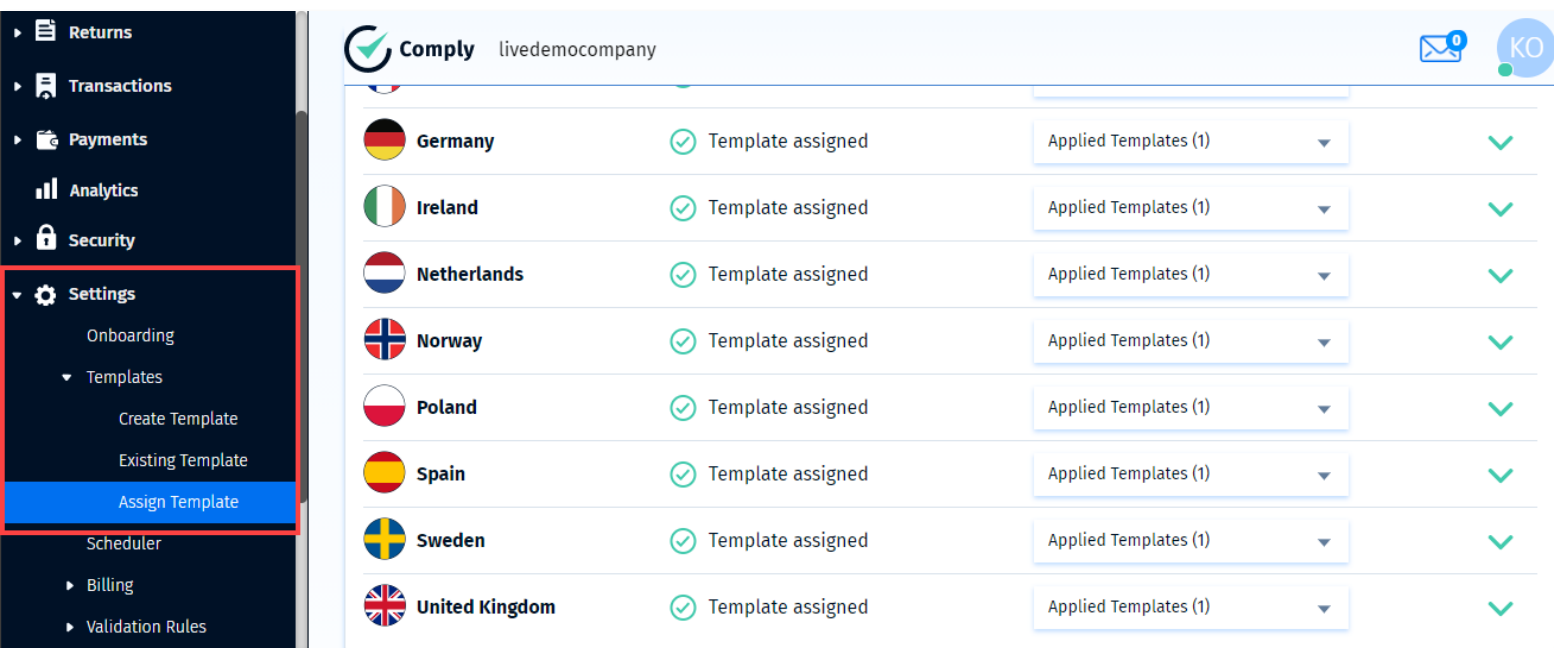

Jurisdiction	Assigned Template	Apply Template to all this jurisdiction	Expand Arrow
Ireland	IETemp Assigned	☐	^
Netherlands	NLTemp Assigned	☐	^
Norway	NOTemp Assigned	☐	^
Poland	PLTemp Assigned	☐	v
Entity PL 1			
	☒ PLTemp Applied	Return Types: ☒ VAT Return	
Spain	Demo_ES_2 Assigned	☐	^
Sweden	SETemp Assigned	☐	^
United Kingdom	UKTemp Assigned	☐	^

4. Click **Save**.

5.2.7. Changing an Assigned Template

The user can at a future date, change the template which has been assigned to a jurisdiction. To this:

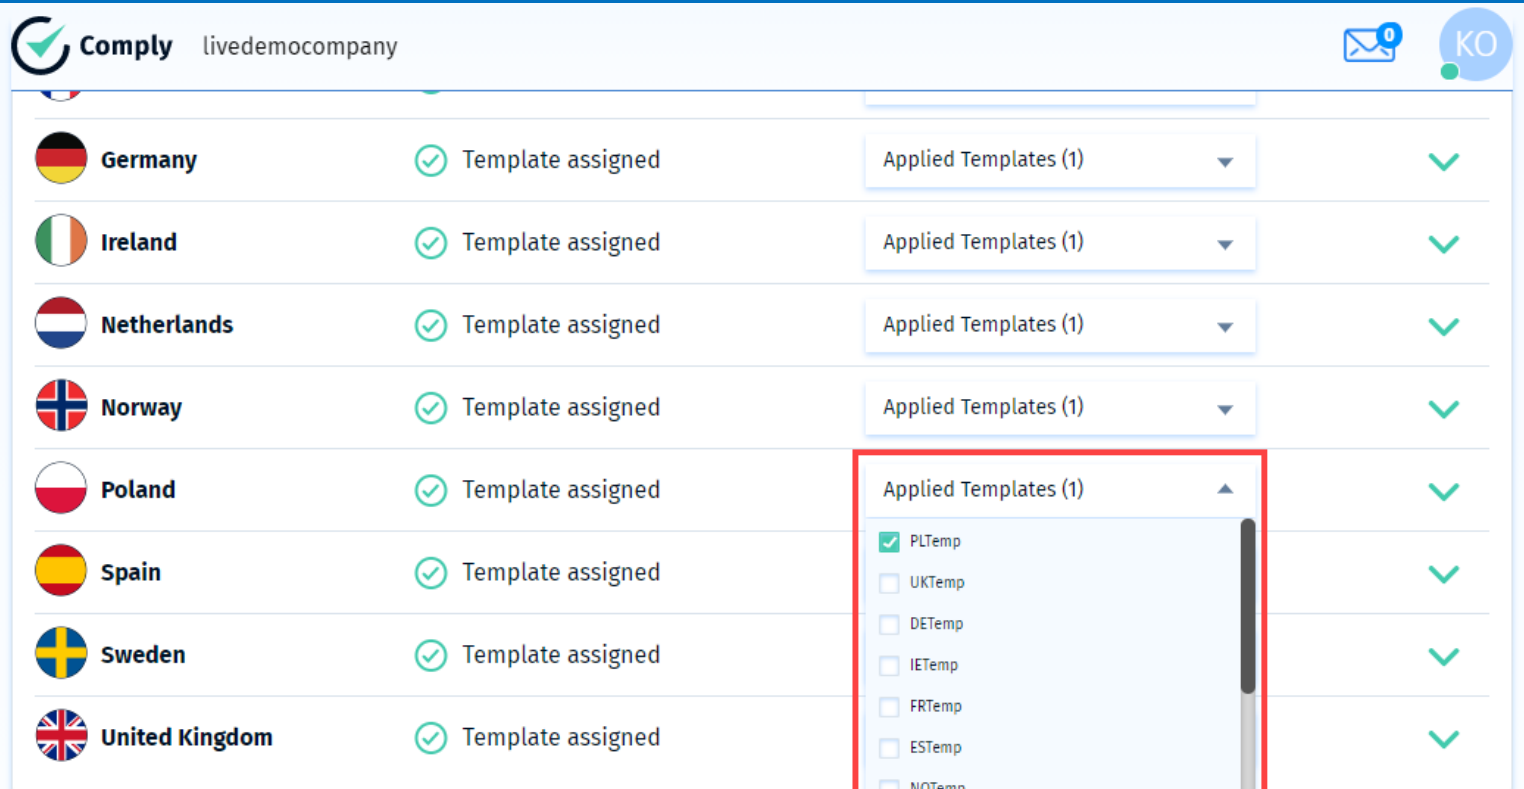

1. Click the **Settings** menu.
2. Click **Templates**.
3. Click **Assign Template**.

The screenshot shows the Comply interface for 'livedemocompany'. The left sidebar is open, and the 'Settings' menu is expanded. The 'Assign Template' option is highlighted in blue. The main area displays a table of jurisdictions with their respective template assignment status.

Jurisdiction	Status	Applied Templates
Germany	Template assigned	Applied Templates (1)
Ireland	Template assigned	Applied Templates (1)
Netherlands	Template assigned	Applied Templates (1)
Norway	Template assigned	Applied Templates (1)
Poland	Template assigned	Applied Templates (1)
Spain	Template assigned	Applied Templates (1)
Sweden	Template assigned	Applied Templates (1)
United Kingdom	Template assigned	Applied Templates (1)

4. Click the **Applied Templates drop-down menu** on the required jurisdiction.

The screenshot shows the Comply interface for 'livedemocompany'. The 'Applied Templates' drop-down menu is open for the 'Poland' jurisdiction, showing a list of templates. The 'PLTemp' template is selected.

Jurisdiction	Status	Applied Templates
Germany	Template assigned	Applied Templates (1)
Ireland	Template assigned	Applied Templates (1)
Netherlands	Template assigned	Applied Templates (1)
Norway	Template assigned	Applied Templates (1)
Poland	Template assigned	Applied Templates (1)
Spain	Template assigned	Applied Templates (1)
Sweden	Template assigned	Applied Templates (1)
United Kingdom	Template assigned	Applied Templates (1)

Applied Templates (1)

- ☒ PLTemp
- ☐ UKTemp
- ☐ DETemp
- ☐ IETemp
- ☐ FRTemp
- ☐ ESTemp
- ☐ NOTemp

5. Unselect the Template to be removed.
6. Select the new Template required.
7. Changes are saved automatically.

Please note, the user can also choose to change the template at Entity level only.

To do this:

1. Click the green arrow on the jurisdiction.
2. Click the Applied Templates drop-down menu on the required Entity.
3. Unselect the Template to be removed.
4. Select the new Template.

6. Manage Entities

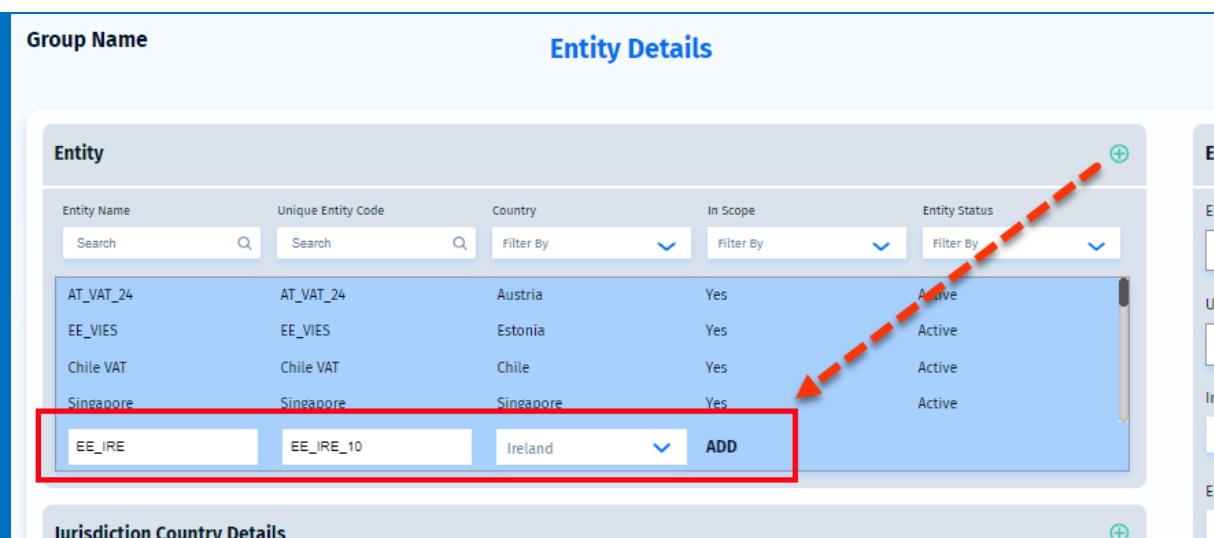

6.1. Add a new Entity

1. Go to **Settings**.
2. Select **Entity**.

In the Entity section of the Entity Details Screen, click the Green + button.

3. In the new Row, add the following:
 - a. **Entity Name**
 - b. **Entity Code**
 - c. **Select the relevant Country**
4. Click **Add**.

5. Go to the **Entity Details** section.
6. Click the **Pencil** Icon to allow editing.
7. Select **Yes** in the In Scope drop-down.
8. Select **Active** in the Entity Status Drop-Down.

The screenshot shows the 'Entity Details' form in a software application. The form is titled 'Entity Details' and is highlighted with a red border. It contains the following fields:

- Entity Name: EE_IJE
- Unique Entity Code: EE_IJE_10
- In Scope: Yes
- Entity Status: Active

The background shows a table with columns for 'Country', 'In Scope', and 'Entity Status'. The table has three rows of data:

Country	In Scope	Entity Status
And	No	
tria	Yes	Active
onia	Yes	Active
e	Yes	Active

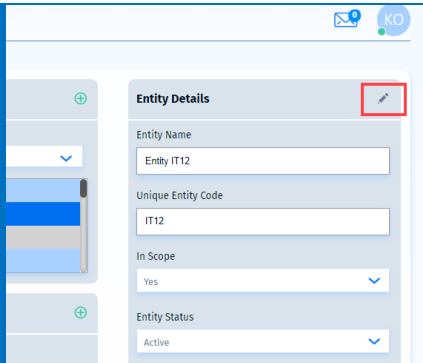

9. Click **Save**.

Please note: It is important to ensure **Jurisdiction Country Details** are configured first in order for the entity to be enabled.

Please see the **Add a Jurisdiction** section below.

6.1.1. [Add/Edit Entity Details](#)

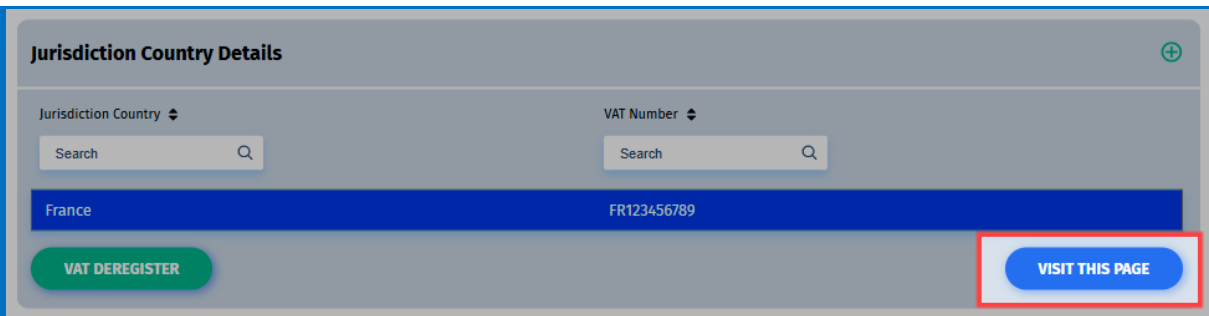

1. Click the  to enable editing on the relevant fields.

2. Edit any of the editable fields:
 - a. Entity Name
 - b. Entity Code
 - c. In Scope – Yes/No – Setting this to No will remove the required returns for this entity.
 - d. Entity Status – Active/Dormant
 - e. Registered Address

6.1.2. [Add/Edit Return Type](#)

1. **Settings**
2. Click **Entity**. This opens the Entity Details screen.
3. Select an Entity.
4. Select the relevant option in the **Jurisdiction Country Details** section.
5. Click **Visit this Page**.

6. In the Return Type section, click the + button to add a new Return Type.

The screenshot shows the 'Return Type' section of a software interface. It includes a 'Country' dropdown menu, a 'City' dropdown menu, a 'State' dropdown menu, and a 'County' dropdown menu. Below these is a table with columns for 'Return Type', 'Return Subtype', and 'Frequency'. The table contains two rows: 'VAT Return' with 'Monthly' frequency, and 'Intrastat Arrivals' with 'Simplified' subtype and 'Monthly' frequency. A red box highlights a green plus button in the top right corner of the 'Return Type' section. A 'VISIT THIS PAGE' button is located at the bottom right of the table.

7. In the new Row, select a Return Type and Frequency (the options available will be based on Jurisdiction).

The screenshot shows the 'Return Type' section of a software interface. It includes a 'Country' dropdown menu, a 'City' dropdown menu, a 'State' dropdown menu, and a 'County' dropdown menu. Below these is a table with columns for 'Return Type' and 'Frequency'. The table contains two rows: 'VAT Return' with 'Monthly' frequency, and 'Control List' with 'Monthly' frequency. A red box highlights a new row with 'VIES Return' selected for Return Type and 'Monthly' for Frequency. An 'ADD' button is next to the row. A 'VISIT THIS PAGE' button is located at the bottom right of the table.

8. Click **Add**.
9. Select the new Return Type and click **Visit this Page**
10. Click to edit the **Return Submission Details** section.

Note: Only the relevant fields by jurisdiction and Return Type can be edited.

11. Click **Save**.

6.1.3. Return Deadlines/Extended Deadlines

12. Settings

13. Click **Entity**. This opens the Entity Details screen.

14. Select an Entity.

15. Select the relevant option in the **Jurisdiction Country Details** section.

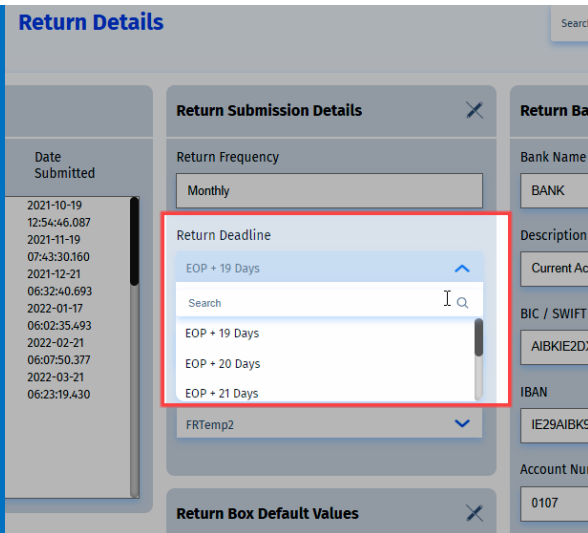

16. Click **Visit this Page**.

17. Click a relevant option in the **Return Type** section.

18. Click **Visit this Page**.

19. Click the  on the **Return Submission Details** section.

20. You can edit the Return Deadline/Choose an Extended Deadline from the Return Deadline field.

The screenshot shows the 'Return Details' form. The 'Return Submission Details' section is highlighted. The 'Return Frequency' is set to 'Monthly'. The 'Return Deadline' dropdown menu is open, showing options: 'EOP + 19 Days', 'EOP + 20 Days', and 'EOP + 21 Days'. The 'Return Box Default Values' section is also visible.

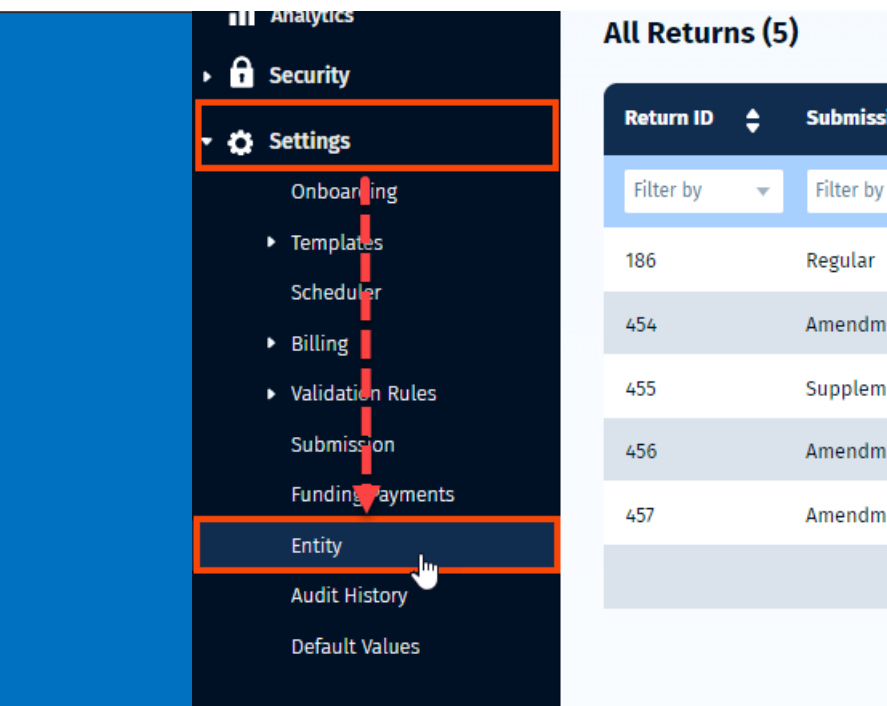

Note: These Extended Deadline options will only appear in the drop-down under certain circumstances.

21. Click **Save**.

6.1.4. VAT Deregistration

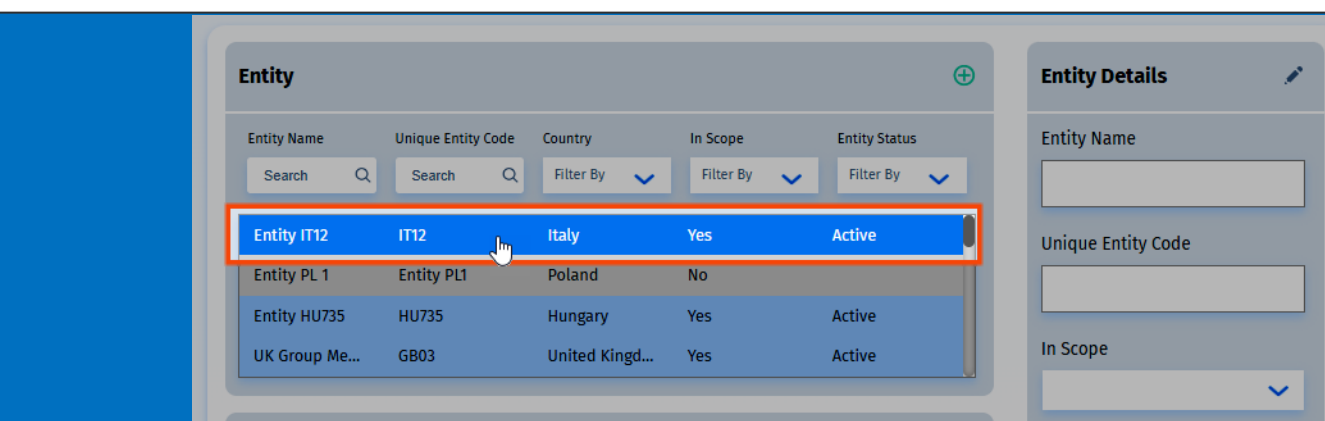

To De-Register an Entity in a particular Jurisdiction:

1. Open the **Settings** menu.
2. Click **Entity**.

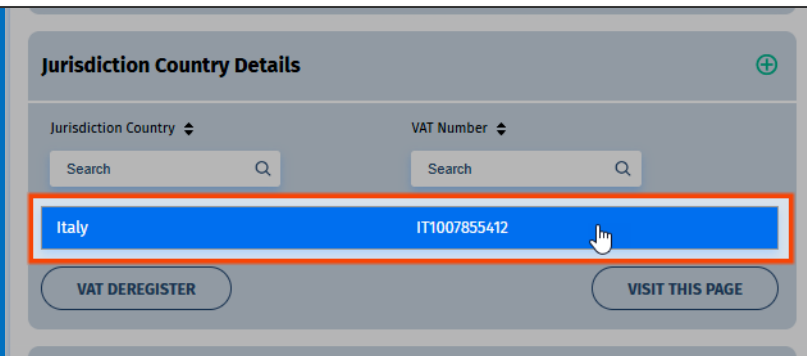

3. In the **Entity** section, select the Entity to be De-Registered.

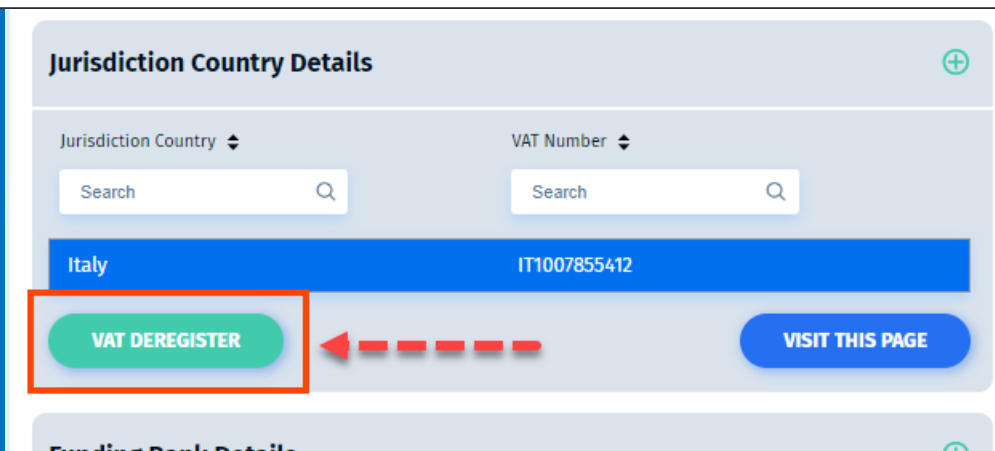

Please note: The Entity must be In Scope.

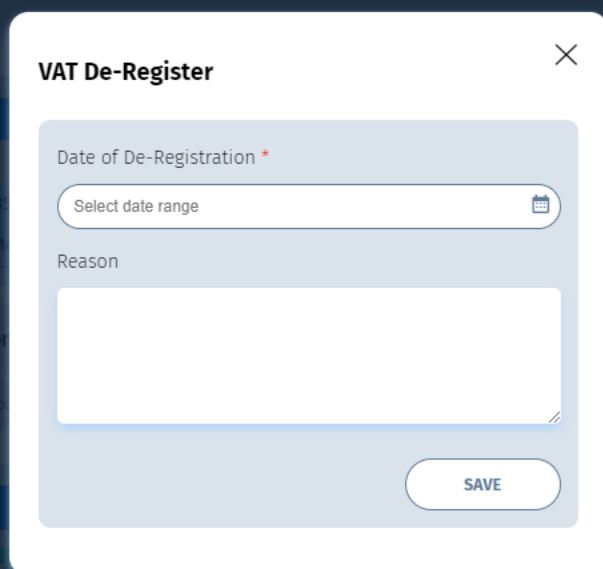

4. In the **Jurisdiction Country Details** section, click the relevant line item.

5. The **VAT DEREGISTER** button will now be enabled and will be displayed in Green.

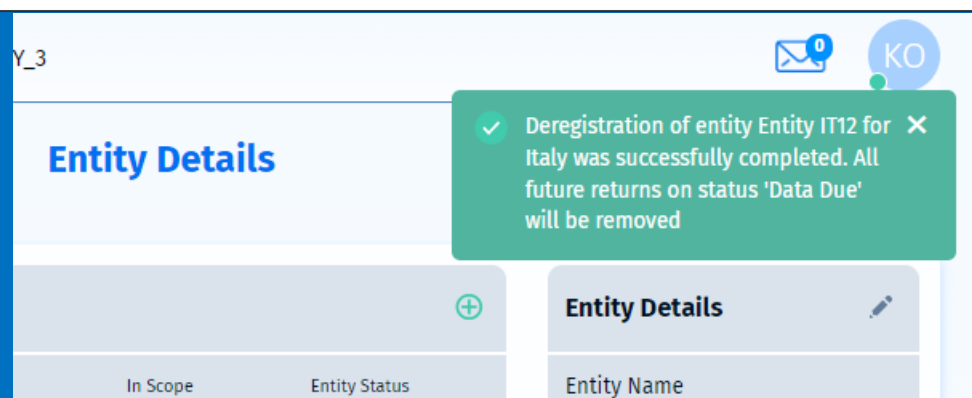

6. Click the **VAT DEREGISTER** button.
7. In the pop-up window, select a relevant Date from the calendar from which you wish the entity to be De-Registered.

A screenshot of a 'VAT De-Register' form. The form has a title bar with a close button (X). It contains two main sections: 'Date of De-Registration *' with a date range selector, and 'Reason' with a large text area. A 'SAVE' button is located at the bottom right of the form.

8. Add a comment (This is non-mandatory – used only as required)
9. Click the **Save** button.

A screenshot of the 'Entity Details' page. A green success message box is overlaid on the page, stating: 'Deregistration of entity Entity IT12 for Italy was successfully completed. All future returns on status 'Data Due' will be removed'. The page shows a table with columns 'In Scope' and 'Entity Status'. A 'Entity Details' sidebar is visible on the right.

Please Note:

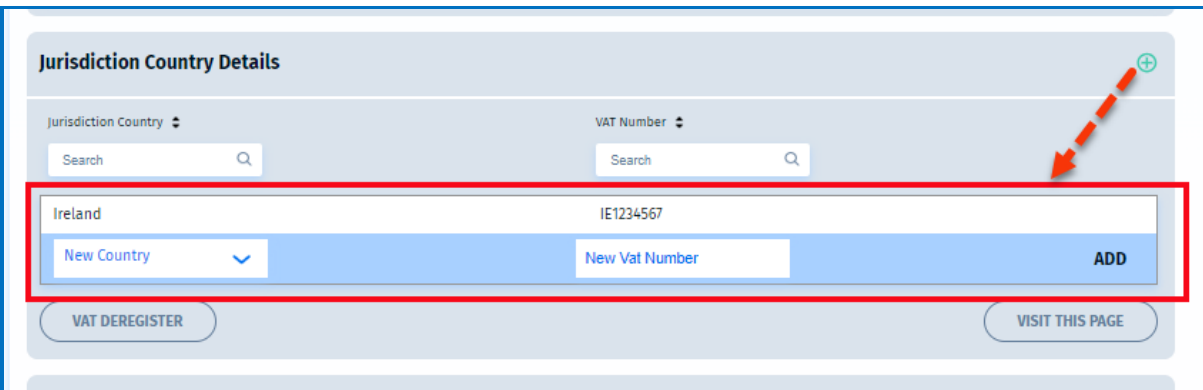

As per the pop up note, all future Returns which are in a status of “Data Due” will be removed.
Any Returns with a status other than “Data Due” (for the current period) should still be processed and submitted.

7. Manage Jurisdictions

Once an Entity has been configured, one or more jurisdictions can be added as required.

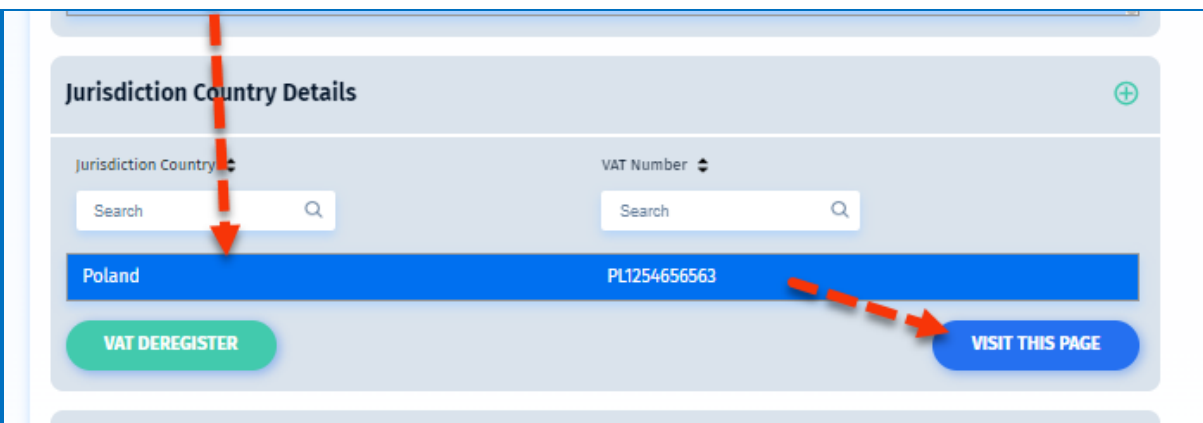

7.1. Add a Jurisdiction

1. Go to **Settings**.
2. Click the **Entity** menu.
3. Click the green + button on the **Jurisdiction Country Details** section.
4. Select the **Country** from the drop-down menu.
5. Enter a **VAT Number**.

The screenshot shows the 'Jurisdiction Country Details' form. At the top right, there is a green plus button. Below it, there are two search fields: 'Jurisdiction Country' and 'VAT Number'. A red box highlights the 'New Country' dropdown menu, which currently shows 'Ireland', and the 'New Vat Number' field, which contains 'IE1234567'. The 'ADD' button is also highlighted within this red box. A red arrow points from the green plus button to the 'ADD' button. At the bottom, there are two buttons: 'VAT DEREGISTER' and 'VISIT THIS PAGE'.

6. Click **Add**.
7. Click the Visit this Page to configure the jurisdiction details.

The screenshot shows the 'Jurisdiction Country Details' form after the 'Add' button was clicked. The 'Jurisdiction Country' dropdown menu now shows 'Poland' and is highlighted with a red arrow. The 'VAT Number' field now contains 'PL1254656563'. A red arrow points from the 'Poland' entry to the 'VISIT THIS PAGE' button. The 'VAT DEREGISTER' button is also visible at the bottom left.

7.2. Edit a Jurisdiction

To edit an existing Jurisdiction:

1. Go to **Settings**.
2. Click the **Entity** menu.
3. In the **Entity section**, select the Entity which includes the Jurisdiction to be edited.
4. In the Jurisdiction Country Details section, select the Jurisdiction to be edited.
5. Click the Visit this Page button.
