1. Release Overview

This release includes regulatory and maintenance changes for the following:

- France
- Hungary
- Ireland
- Italy
- Luxembourg
- Norway
- Poland

Plus, some minor generic system updates including:

- Data Validation
- Global Filters

2. France

2.1. Nature of Transaction Codes (Intrastat)

Impacts the user when preparing Intrastat Returns (Arrivals/Dispatches) and uploading transactions.

The Nature of Transaction Codes have been updated (New Codes have been added and some removed).

- New codes will pass validation rules.
- Removed codes will flag as an error. These errors cannot be “accepted”.

Example Error

Rule K2.19: Nature of Transaction Intrastat Dispatch

Fix data error in the file below

7 Errors • Invalid Data For Nature of Transaction

	Entry of Arrival	Region of Dispatch	Country of Origin	Nature of Transaction	Mode of Transport	Delivery Terms	Net Mass
	Filter by	Filter by	Filter by	Filter by	Filter by	Filter by	Filter by

☐		FR		29	5		0.252
☐		FR		19	4		1.87

2.2. Remove Additional Statistical Code as a Mandatory Parameter (Intrastat)

Additional Statistical is no longer identified as a Mandatory (the red Asterisk has been removed) across the following screens:

- Create a Template
- Existing Template
- Add Transactions (Transactions Tab)

2.2.1. Examples

Existing Template:

The screenshot displays the 'France Intrastat Arrivals' template mapping interface. The left sidebar shows the 'Settings' menu with 'Templates' expanded, highlighting 'Existing Template'. The main area shows a mapping table with columns from an Excel file being mapped to Taxback International fields. A red dashed arrow points from the 'Existing Template' menu item to the 'Additional Statistical Code' field in the 'Taxback International fields' section. This field is highlighted with a red box, indicating it is no longer mandatory. The 'Additional Statistical Code' field is located under the 'Shipping Details' section, below the 'Port/Airport Code' and 'Special Movement Code' fields. The 'Additional Statistical Code' field is currently empty and has a red asterisk next to it, indicating it is mandatory. The 'Port/Airport Code' and 'Special Movement Code' fields are also empty and have red asterisks next to them, indicating they are mandatory. The 'Country of origin' field is also empty and has a red asterisk next to it, indicating it is mandatory. The 'Regime Code' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Commodity Flow' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Nationality of Transport Vehicle' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Country of dispatch' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Invoice Date' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Posting Date' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Tax Reporting Date' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Entity Code' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Tax Jurisdiction' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Document Number' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Supplier/Customer Name' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Partner VAT ID' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Region of dispatch' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Region of arrival' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Country of arrival' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Nature of Transaction' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Invoice Value' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Quantity in Supplementary Units' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Commodity Code' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Net Mass' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Mode of transport' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Country of origin' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Supplier/Customer Transaction Currency' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Nationality of Transport Vehicle' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Port/Airport Code' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Special Movement Code' field is empty and has a red asterisk next to it, indicating it is mandatory. The 'Additional Statistical Code' field is empty and has a red asterisk next to it, indicating it is mandatory.

2.3. Numerical Boxes (VAT Return)

2.3.1. End Dated

Numerical boxes for 2023 have been end dated and will not appear in 2024 returns.

2.3.2. New Boxes

New numerical boxes have been added for 2024 returns. These will be visible in both English and local language.

2.4. Return Summary

When preparing a VAT Return, and there are values in the respective boxes, then the Return Summary headers will be calculated and visible for:

- Output VAT
- Input VAT
- Net Tax Position
- Tax Payable
- Tax Refundable
- Balance Brought Forward

Jurisdiction	Entity	Type	Frequency	Period	Status	Filing Deadline
France	FR-1-11	VAT Return	Monthly	Jul 2024	To Prepare	2024-08-19
Submission Type	Regular	Is Part of VAT Group	No			
Version	N/A	Is NIL Return	No			
Output VAT	7,883 EUR	Tax Payable	0 EUR	Processing Risk Index	3	
Input VAT	28,384 EUR	Tax Refundable	20,501 EUR	Payment Risk Index		
Net Tax Position	-20,501 EUR	Tax Refund Due Date		Balance Carried Forward	7,310 EUR	
Forecast Net Tax Position	0 EUR	Tax Refund	0 EUR	Balance Brought Forward	20,501 EUR	

Next action due by 2024-08-08

3. Hungary

3.1. Rounding Method In Net Amount in 1000 HUF (VIES)

When preparing a VIES return and Values are displayed in the column **Net Amount in 1000 HUF**, then the values are rounded to the nearest thousand and divided by 1000.

E.g., Supplier Net Amount in Transactions Screen is **7700988.2**

Invoice Number	Invoice Date	Invoice Posting Date	Net Amount	VAT Amount	VAT number	VAT Rate
ABC908449	01/05/2023	02/02/2023	7700988.2	2079266.81	HR73255090	27.00

- This value rounded to the nearest thousand is **7,701,000**.
- Divided by 1000 is **7701**

This value of 7701 is displayed in the **Net Amount in 1000 HUF** column in the relevant Numerical Box.

Country ISO Code	VAT Number of Supplier	Net Amount in 1000 HUF	VIES Indicator
HU	702362150	-137.00	V
HU	473314175	157.00	C
HU	129734084	7701.00	V
HU	506304975	8.00	V
HU	294586632	30.00	V
HU	140839644	-4.00	V

3.2. Numerical Boxes (VAT Return)

3.2.1. End Dated

Numerical boxes for 2023 have been end dated and will not appear in 2024 returns.

3.2.2. New Boxes

New numerical boxes have been added for 2024 returns. These will be visible in both English and local language.

4. Ireland

4.1. Change Box Values when VAT on Sales/Purchases is Negative

This applies to both VAT and Amendment VAT Returns.

VAT On Sales

When preparing a VAT Return/Amendment VAT Return, and the VAT on Sales is Negative, then the Absolute value is added to the VAT on Purchases value. This combined value is then displayed in Box 2. Box 1 will display "0"

E.g., VAT on Sales = -50

VAT on Purchases = 200

T1 = 0

T2 = 250

VAT On Purchases

When preparing a VAT Return/Amendment VAT Return, and the VAT on Purchases is Negative, then the Absolute value is added to the VAT on Sales value. This combined value is then displayed in Box 1. Box 2 will display "0".

E.g., VAT on Sales = 150

VAT on Purchases = -200

T1 = 350

T2 = 0

5. Italy (Quarterly VAT Return)

5.1. Box VP12 – Calculation

Applies to when the user is preparing a Quarterly VAT Return (and there are no monthly advanced payments for that period).

Box VP6 1 > 0

Return Boxes English ☒ Local language

Numerical Boxes		Non-Numerical Boxes					
Section	Description	Original Value ⓘ	Submitted Value ⓘ		Previous Period ⓘ	Deviations ⓘ	Previ
Box VP4	VAT payable	0.00	400.00	👁	0		
Box VP5	VAT deducted	0.00	200.00	👁	0		
Box VP6 1	VAT due	200.00	200.00		0		
Box VP6 2	or on credit	0.00	0.00		0		
Box VP7	Prior period debt not exceeding 25.82 euros	0.00	0.00	👁	0		
Box VP8	Credit previous period	0.00	0.00		0		
Box VP9	Previous year credit	0.00	0.00	👁	0		

Then Box VP12 is calculated as $VP6\ 1 * 0.01$

E.g., $200 * 0.01 = 2.00$

Return Boxes English ☒ Local language

Numerical Boxes		Non-Numerical Boxes					
Section	Description	Original Value ⓘ	Submitted Value ⓘ		Previous Period ⓘ	Deviations ⓘ	Previ
Box VP9	Previous year credit	0.00	0.00	👁	0		
Box VP10	EU car payments	0.00	0.00	👁	0		
Box VP11	Tax credits	0.00	0.00	👁	0		
Box VP12	Interest on this quarter 1%	2.00	2.00		0		
Box VP13 1	Deposit due Method	0.00	0.00	👁	0		
Box VP13 2	Deposit due	0.00	0.00	👁	0		

If Box VP6 1 is equal to 0, then Box VP12 is also equal to 0.

6. Luxembourg

6.1. New Numerical Boxes for 2023

New numerical boxes were added with a start date of 01/01/2023. These will be available/visible on the return review screen for returns for any period after 01/01/2023.

Example: Below is a snapshot of some of the new boxes.

Comply

Jurisdiction: **Luxembourg** Entity: **Luxembourg Annual VAT** Type: **VAT Return** Frequency: **Monthly** Period: **Feb 2024** Status: **To Prepare** Filing Deadline: **2024-03-15**

Next action due by 2024-03-06 Return Timeline • Audit History • 47 Comments • 0

VIEW RETURN

6.2. Return Summary

When preparing a VAT Return from 2023 onwards, and there are values in the respective boxes, then the Return Summary headers will be calculated and visible for:

- Output VAT
- Input VAT
- Net Tax Position
- Tax Payable
- Tax Refundable
- Balance Brought Forward

The screenshot shows the 'Return 22703' summary in the Comply system. The interface includes a header with the Comply logo and user 'dvtest'. The return details are as follows:

Jurisdiction	Entity	Type	Frequency	Period	Status	Filing Deadline
Luxembourg	Luxembourg Annual VAT	VAT Return	Monthly	Mar 2024	To Prepare	2024-04-15

Below the header, there are submission details and a summary table. The submission type is 'Regular' (N/A) and it is not part of a VAT group. The summary table, highlighted with a red box, contains the following data:

Output VAT	10,508.16 EUR	Tax Payable	0 EUR	Processing Risk Index	
Input VAT	10,875.01 EUR	Tax Refundable	366.85 EUR	Payment Risk Index	
Net Tax Position	-366.85 EUR	Tax Refund Due Date		Balance Carried Forward	0 EUR
Forecast Net Tax Position	0 EUR	Tax Refund	0 EUR	Balance Brought Forward	366.85 EUR

At the bottom, there are navigation buttons: Files, Data Validation, Transactions, Return Validation, and Return Review. The next action is due by 2024-04-04, and there are 24 audit history items and 0 comments.

6.3. Extended Deadline for VAT Return

The following Extended Deadline for VAT Returns has been added.

Entity – Return Details

7.2.1. Return Period Value in Local Language

When the user toggles the Local Language switch, then the values in the Return Period are displayed in Local Language.

8. Poland

8.1. XML Templates

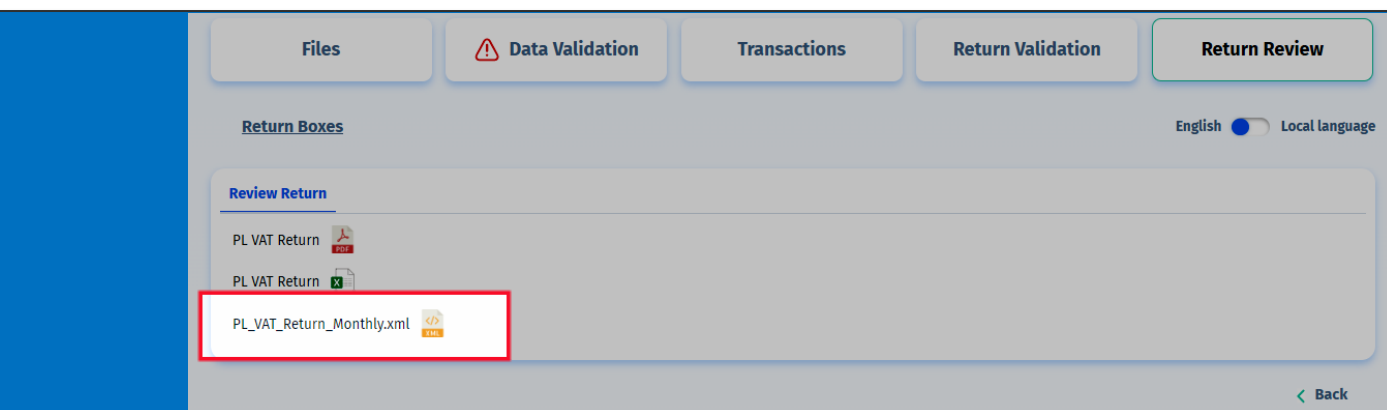

The View Return screen displays different XML Templates depending on if the return is a Regular VAT Return or a Self-Revision VAT Return.

8.1.1. VAT Return

The XML Templates displayed here depend on the frequency of the Return.

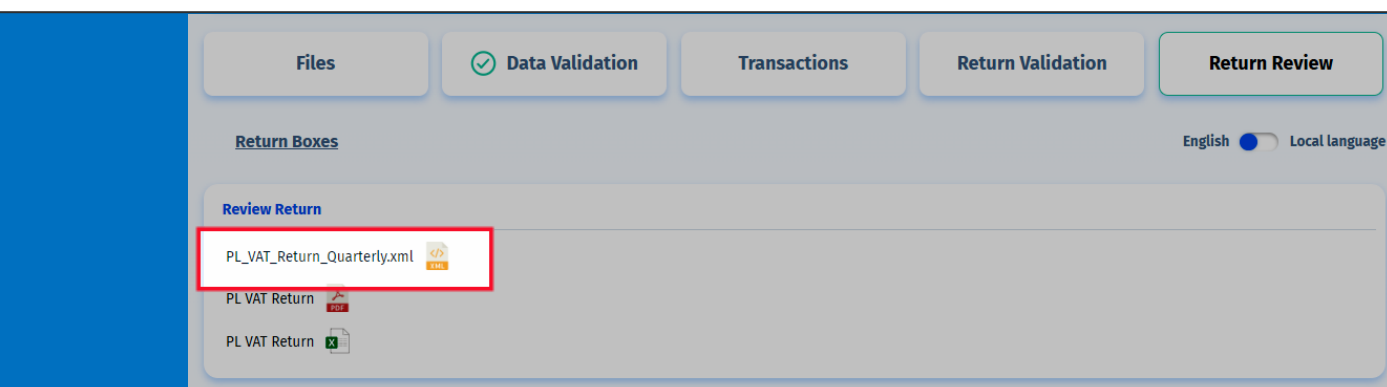

Monthly

PL_VAT_Return_Monthly.xml

Quarterly

PL_VAT_Return_Quarterly.xml

8.1.2. Self-Revision Returns

When preparing an Amendment Return, comply generates 3 XML Templates:

These are:

- Evidence only File
- Full Correction File
- Return Only File

The file to be submitted may differ depending on the amendment/correction.

File Type	Submitted When...
Evidence Only	The Correction results in changes to the evidence component only E.g. The correction impacted the individual records reported in the SAFT (Invoice Dates/Invoice Numbers/Counterpart Details/Additional Codes, etc), but did not change the Net/VAT Amounts (declaration itself is unaffected).
Full Correction	The Correction results only changes to the declaration, and it is not affecting any items included in the evidence component (e.g. changes were made only in non-numerical boxes or boxes, which are not included in the SAFT part like brought forward amount).
Both	The Correction results in changes to both – I.e. values of the particular line items (new transactions, exclusions, modifications of net and VAT amount), which result in changes of the declaration part – In this case it is necessary to submit a correction of both declaration and evidence part of return.

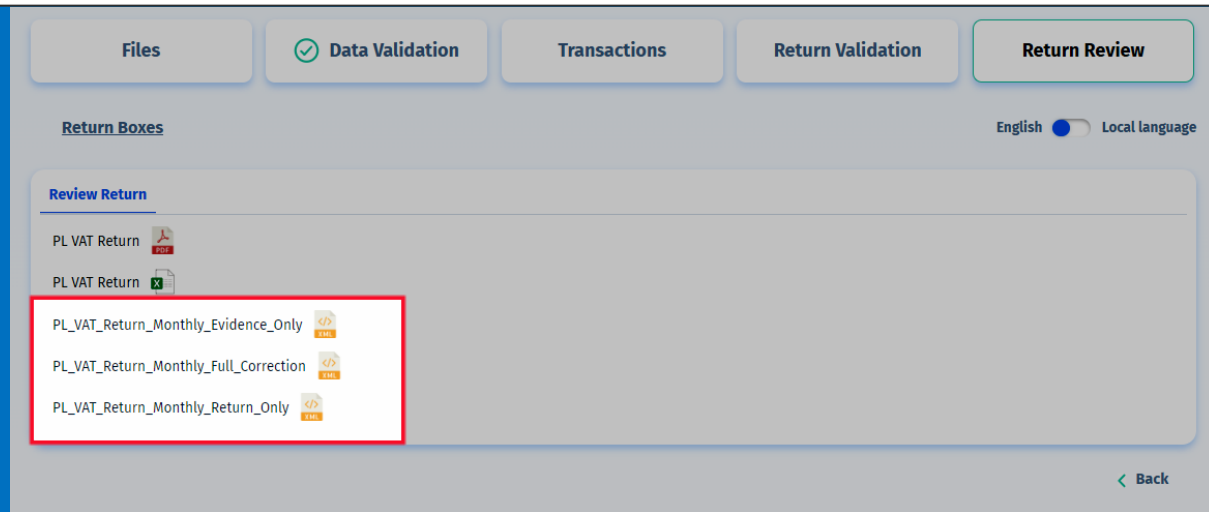

Examples:

Monthly

PL_VAT_Return_Monthly_Evidence_Only.xml

P L_VAT_Return_Monthly_Full_Correction.xml

P L_VAT_Return_Monthly_Return_Only.xml

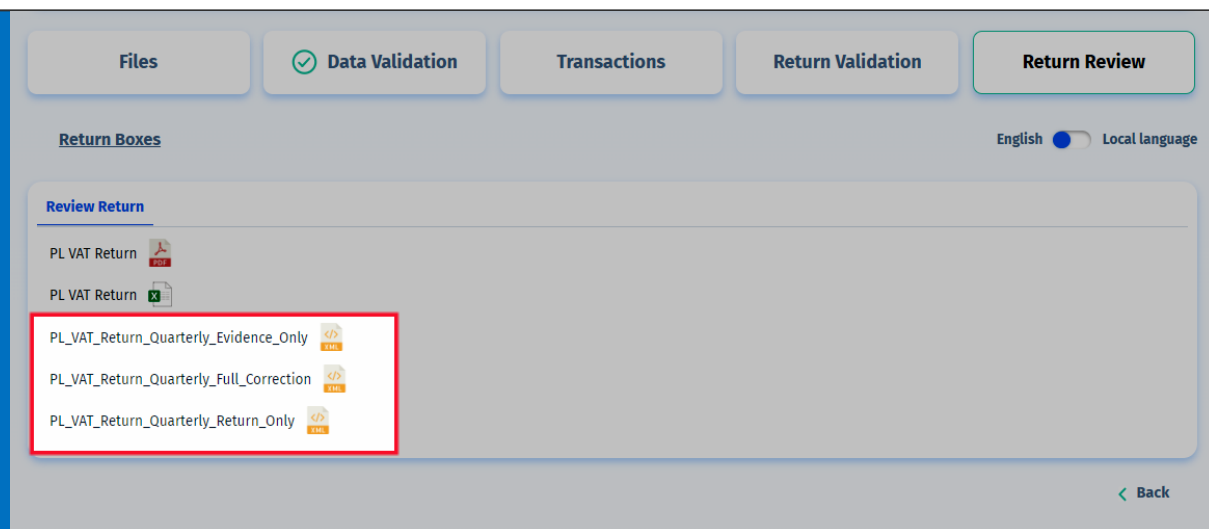

Quarterly

PL_VAT_Return_Quarterly_Evidence_Only.xml

P L_VAT_Return_Quarterly_Full_Correction.xml

P L_VAT_Return_Quarterly_Return_Only.xml

9. Data Validation.

9.1. Sorting in Data Validation Pop-Up

When there is data in the Data Validation pop-up, then the sorting arrows (Up/Down) are available for all columns and can be used to sort the Data Validation by Ascending/Descending.

Files  Data Validation Transactions Return Validation Return Review													
Correct : 0 Error : 4 Warning : 0 Total : 4 Processed : 4 of 4 													
Go to return validation >													
Rule ID	Validation	Total	OK	Error	Warning	Errors		Warning		Reviewer		Approver

9.2. Validation Rules

The following changes are made to rules C1.13 and C2.13:

- Set to Disabled by default.
- Non-Mandatory
- Error Type is now Warning.

Standard Rules Screen

Both rules are set by default to Disabled and Non-Mandatory. The error type is also now change from Error to “Warning”.

Standard Rules

VAT Related Returns Intrastat Dispatches Intrastat Arrivals

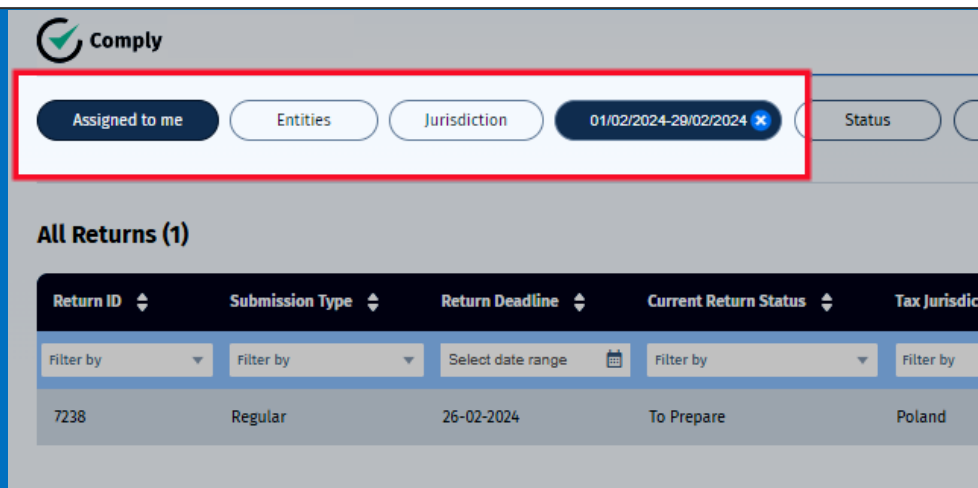

Rule ID	Validation	Error Type	Active
C1.13	Valid Input VAT Percentage	Warning	Disabled
C2.13	Valid Output VAT Percentage	Warning	Disabled

Prev 1 Next View by 15 30 50

Please Note: Neither of these rules will appear in the Data Validation screen unless they are manually enabled.

10. Global Filters

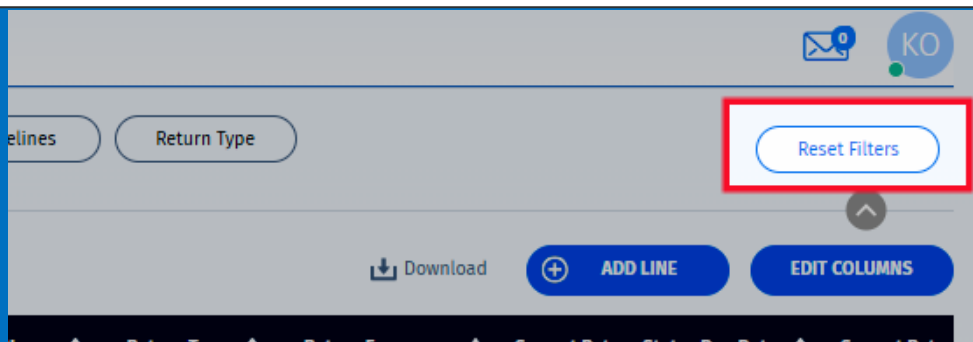

On the Returns screen, the default setting is to filter and display all returns by “Assigned to Me” and “Date Range”.

2 new changes have been made to this.

10.1. Reset Filters

Clicking the Reset Filters button removes the default filters.

This results in displaying all returns.

The screenshot shows the Comply interface with the user 'sstoycheva'. A red box highlights the filter bar at the top, which includes buttons for 'Assigned to me', 'Entities', 'Jurisdiction', 'Submission Date Range', 'Status', and 'Timelines'. Below this, another red box highlights the 'All Returns (10468)' section. A red dashed arrow points from the 'Assigned to me' button down to the 'Current Return Status' column header in the table below.

Return ID	Submission Type	Return Deadline	Current Return Status	Tax Jurisdiction Name	Entity Name
1	Regular	29-07-2022	To Prepare	Netherlands	NL-test-rep
2	Regular	29-07-2022	To Submit	Netherlands	NL-test-rep
3	Regular	31-08-2022	To Prepare	Netherlands	NL-test-rep

10.2.Refresh

Refreshing the screen after clicking the Reset Filters button, will re-enable the “Assigned to Me” filter only.

The screenshot shows the Comply interface after a refresh. The 'Assigned to me' button in the filter bar is now highlighted with a red box, indicating it is the active filter. The table below shows 'All Returns (60)', with only the first row visible.

Return ID	Submission Type	Return Deadline	Current Return Status	Tax Jurisdiction Name
1	Regular	29-07-2022	To Prepare	Netherlands
