# 1. Release Overview

The objective of this release is to focus on the following updates:

- Return Specific:
  - Annual Returns
  - Self Revisions for returns already in Comply.
  - Corrections to VAT returns in Comply (Ireland, Portugal)
- System Specific
  - Transaction Tab
  - Return Review
  - Data Validation

## 2. Croatia

### 2.1. New Mapping

When users upload/add transactions for VAT/VIES returns, then mapping is performed on the latest version and are allocated to the corresponding boxes.

### 2.2. New Subcategory Added

When the user is preparing a Template for Croatia, a new Subcategory has been added to the drop-down menu. This applies to new or existing templates.

## 3. Estonia

### 3.1. VAT – Mapping update (Aug 2022 – 2023)

Changes were made to mappings for the period Aug 2022 – 2023. This applies to Regular VAT/Self Revision returns where **Import Services/Triangulation Goods Purchase** transactions are uploaded.

The transactions will be calculated based on mapping changes and populated in boxes:

- Box 1
- Box 4
- Box 5
- Box 7

### 3.2. VIES (Self Revisions)

For VIES, when preparing a Self Revision, no XML Template will be generated on the Return Review tab.

Return 4247 (Supplementary Return of [Return 4246](#))

Back

This is because on the Estonian Portal, the user can only open (and correct) an existing submitted declaration. There is no functionality to upload a new revision file.

## 4. Germany

### 4.1. New Non-Numerical Box (Annual VAT Return)

The following new Non-Numerical Box has been created for Annual VAT Returns:

- Supplementary Information

When preparing an Annual VAT Return, and the user navigates to the **Non-Numerical Boxes** tab on the **Return Review** screen. Then this new box is available and can be edited to include additional information up to a maximum of 999 characters.

| Section                     | Description                                                                                                                                           | Values                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Audit History |

## 5. Ireland

### 5.1. New Special VAT Rate

New Special VAT Rates have been added for 2022 and 2023.

| Year | VAT Rate |
|------|----------|
| 2022 | 5.5%     |
| 2023 | 5%       |

When preparing a New/Existing Template, the new rates are available in the drop-down option when Mapping Tax Transaction Codes.

The screenshot shows a software interface for mapping tax transaction codes. It features three main columns: 'TRANSACTION CATEGORY', 'GOODS OR SERVICES', and 'GOODS OF'. The 'TRANSACTION CATEGORY' column has a dropdown menu with 'Domestic sale' selected. The 'GOODS OR SERVICES' column has a dropdown menu with 'Goods' selected. The 'GOODS OF' column has a dropdown menu with 'Items For' selected. Below these, there is a 'VAT RATE CODE' dropdown menu with 'Special' selected. To the right of this is a 'VAT RATE' dropdown menu that is open, showing a list of rates: 5.00, 5.50, 5.40, and 5.60. The 5.00 and 5.50 options are highlighted with a red box.

#### 5.1.1. Data Validation

When the user is on the Data Validation Tab of a VAT Return, then the following rules WILL NOT flag errors for these new VAT Rates:

- C1.14 – Valid Input VAT Rate within Range
- C2.14– Valid Output VAT Rate within Range

## 6. Norway

### 6.1. New Non-Numerical Boxes

The following 11 new Non-Numerical Boxes have been added to the Return Review screen:

1, 11, 12, 13, 14, 15, 81, 83, 86, 88 and 9.

These are editable boxes which allow the user to add free text comments to explain the reason when the boxes are populated with **Negative** values.

## 7.2. New Subcategory added to Mapping

When preparing Tax Code Mapping for VAT Returns, the following new Subcategory has been added to the Subcategory drop-down:

- FCP – Forestry and Cork Products

Navigate to: *Settings > Templates > Create/Existing Template*

## 7.3. Numerical Boxes (Annual VAT Return)

When preparing an Annual VAT Return, the Numerical Boxes are available on the Return Review screen. Only non calculation boxes are editable. They will display a pencil icon and manual transactions can be added.

| Cessation Period            | Declaration of cessation period                                                                                                |                          |  |
| Before The Change *         | Before the Change for Declaration with special tax period                                                                      | <input type="checkbox"/> |  |
| After The Change *          | After the Change for Declaration with special tax period                                                                       | <input type="checkbox"/> |  |
| Taxation Beginning *        | Declaration of the exercise of the beginning of taxation                                                                       | <input type="checkbox"/> |  |
| Declaration Type *          | Declaration type                                                                                                               | Replacement declaration  |  |
| Advanced Invoices Annex L * | Annex L - Section 07 - Advanced Invoices - Were there operations of this nature in the year to which this declaration relates? | <input type="checkbox"/> |  |

### 7.5.4. 2 New Non-Numerical boxes

When preparing a VAT Return with a submission date from 01/01/2023, then the following 2 non-numerical boxes are included on the Return Review Tab.

- Date of Occurrence
- End Date of Impediment

| Return Boxes        |                              |                     |
|---------------------|------------------------------|---------------------|
| Numerical Boxes     |                              | Non-Numerical Boxes |
| Section             | Description                  |                     |
| Month *             | Month                        | 02                  |
| Quarter *           | Quarter                      |                     |
| Period Month From * | Period Month From            |                     |
| Period Month To *   | Period Month To              |                     |
| Box 71 *            | Financial Identification No. |                     |
| Box 72 *            | Reason of Impediment         |                     |
| Box 73 *            | Date of occurrence           |                     |
| Box 74 *            | End date of impediment       |                     |

## 8. Portugal (VIES)

### 8.1. VIES Quarterly

When the user is manually adding a VIES Return and navigates to the Entity > Jurisdiction Details page, then they can choose Quarterly from the Return Frequency drop-down.

The screenshot shows a web form for adding a VIES Return. At the top, there is a field for "Date of VAT Deregistration". Below this is a section titled "Return Type" with a green plus icon. Inside this section is a table with three columns: "Return Type", "Return Subtype", and "Frequency". The first row shows "Intrastat Dispatches", "Simplified", and "Monthly". The second row shows "VIES Return" with a dropdown arrow, "Frequency" with an upward arrow, and an "ADD" button. A red rectangle highlights the "VIES Return" dropdown and the "Frequency" dropdown. The "Frequency" dropdown menu is open, showing options: "Search" (with a magnifying glass icon), "Monthly", and "Quarterly". Below the table is a "VISIT THIS PAGE" button.

| Return Type          | Return Subtype | Frequency |
|----------------------|----------------|-----------|
| Intrastat Dispatches | Simplified     | Monthly   |
| VIES Return          | Frequency      | ADD       |

## 8.7. Hide Duplicate Numerical and Non-Numerical boxes.

When preparing a VIES Return with a status other than Submitted, then on the Return Review screen the following Numerical and Non-Numerical boxes will NOT be displayed.

Numerical:

- Box 02 1A – Declaration Type – Regular
- Box 02 1B – Declaration Type – Amendment

Non-Numerical:

- Box 03 2 - Period of the Declaration – Month
- Box 03 3 - Period of the Declaration - Quarter
- Box 03 4 - Period of the Declaration – Month Included NOT Quarter
- Box 03 5 - Period of the Declaration - Month Included NOT Quarter

## 9. Portugal (Intrastat)

### 9.1. Region of Arrival/Region of Dispatch Parameter

When preparing an Intrastat Arrival/Dispatch, “Region of Arrival/Region of Dispatch” are no longer mandatory parameters for Simplified/Detailed Returns.

#### 9.1.1. Template Screen

This applies to when preparing a Template and mapping Tax Transaction Codes.

Example:

The screenshot displays the 'Taxback International fields' template screen, labeled 'Step 1 of 4'. A red box highlights the 'Region of Arrival' field, which is currently empty. The screen also shows a search bar and a list of fields including 'Country of Dispatch', 'Mode of Transport', 'Country of Origin', 'Invoice Value', 'Supplier/Customer Name', and 'Invoice Date'. A notification at the top right indicates '0 mandatory fields missing'.

h them up with ours.

### 9.1.3. [Return Review Screen](#)

When reviewing the return Review Screen, transactions uploaded are grouped accordingly and does not consider Region of Arrival/Dispatch when grouping.

## 10. Portugal (Validation Rules)

This is linked to the removal of Region of Arrival/Dispatch as mandatory fields.

### 10.1. Portugal removed from Data Validation Rule for Region

When a user uploads data for Portugal, the following Validation Rules when run, **will not** flag errors as Region of Arrival/ Dispatch is no longer a Mandatory field.

- K1.15 (Region of Arrivals)
- K2.15 (Region of Dispatch)

### 10.2. Portugal removed from Null Validation Rule for Region

When a user uploads data for Portugal, the following Null Validation Rules when run, **will not** flag errors as Region of Arrival/ Dispatch is no longer a Mandatory field.

- I1.16 (Region of Arrivals)
- I2.16 (Region of Dispatch)

### 10.3. Add New Data Validation Rules

The following new Data Validation rules have been added and will be run against the uploaded data:

#### 10.3.1. Intrastat Arrivals

- K1.26 – Data Validation Port/Airport Code Intrastat Arrival when mode of transport code is Sea/Air.
- Type: Error
- Error Message: Missing Port/Airport Code

### 10.3.2. [Intrastat Dispatches](#)

- K2.26 – Data Validation Port/Airport Code Intrastat Dispatch when mode of transport code is Sea/Air.
- Type: Error
- Error Message: Missing Port/Airport Code

## 10.4.Add New Null Validation Rules

The following new Data Validation rules have been added and will be run against the uploaded data:

### 10.4.1. [Intrastat Arrivals](#)

- I1.24 – Null Port/Airport Code Intrastat Arrival when mode of transport code is Sea/Air
- Type: Error
- Error Message: Missing Port/Airport Code

### 10.4.2. [Intrastat Dispatches](#)

- I2.24 – Data Validation Port/Airport Code Intrastat Dispatch when mode of transport code is Sea/Air.
- Type: Error
- Error Message: Missing Port/Airport Code

# 11. Spain (Annual VAT)

## Numerical Boxes and Mapping

When preparing Annual VAT Return for Spain and transactions have been uploaded from 2023, the transactions are successfully included in the relevant Numerical boxes.

Download

### 11.1.TXT File to be Generated for Filing.

On the Return Review screen, when the user clicks “View Return”, a TXT file will be available to view/open/download.

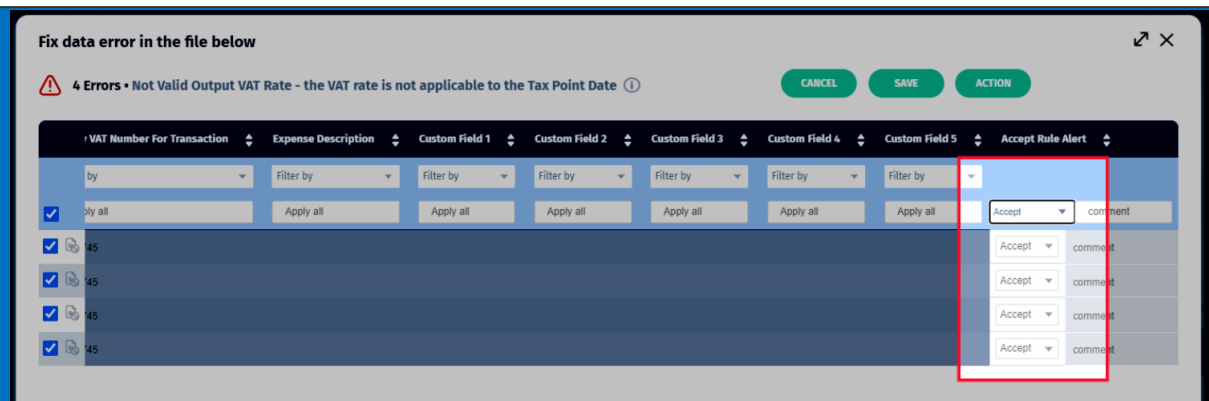

## 12. Data Validation Rules

### 12.1. Rules C1.14 and C2.14

#### 12.1.1. Accepting failed rules

Applies to VAT/VIES/Control Lists

When the user uploaded transactions and during data validation errors are flagged, the user can “Accept” them in the error pop-up.

#### 12.1.2. C2.14 Logic Update

The logic for C2.14 is now checking Valid Tax Point Date (instead of Invoice Date) of a transaction.

|       |                                                                        |   |   |   |   |
|-------|------------------------------------------------------------------------|---|---|---|---|
| A2.16 | Null Data Output Transaction To Tax Jurisdiction Currency Fx           | 4 | 0 | 4 | 0 |
| D2.02 | Duplicated OU Invoice Nr With Transaction In Return For Another Period | 4 | 0 | 4 | 0 |
| Q1.01 | Check for unmapped Tax Codes                                           | 4 | 2 | 2 | 0 |
| C2.14 | Valid Output VAT Rate Within Date Range                                | 4 | 2 | 2 | 0 |
| C2.15 | Output Tax Point Date in the Past                                      | 4 | 2 | 2 | 0 |
| H1.71 | Check Output Invoice Date Different From Tax Point Date                | 4 | 1 | 0 | 3 |

## 12.2. Rule C1.19 and C1.20

The logic for this rule is to identify and flag if an **Input** transaction falls either:

- **Before** the start date of the return period. (C1.19)
- **After** the end date of the current return period. (C1.20)

Example: C1.19

The screenshot displays the Taxback International software interface. A table lists validation rules, with Rule C1.19 highlighted. A popup window titled 'Fix data warning in the file below' shows 6 warnings for 'Tax Point Date is in the past.' Below the popup, a table lists transaction details.

| Rule ID | Validation                                                          | Total | OK | Error | Warning | Fixed |
|---------|---------------------------------------------------------------------|-------|----|-------|---------|-------|
| A1.11   | Null Data Input Supplier Ship To Country Iso Code                   | 12    | 4  | 0     | 8       | 0     |
| D1.03   | Duplicated Input Invoice Nr Same Vat Rate Or Same Vat Amount Return | 12    | 5  | 0     | 7       | 0     |
| C1.19   | Input Tax Point Date in the Past                                    | 12    | 6  | 0     | 6       | 0     |
| H1.62   | Check VAT De                                                        |       |    |       |         |       |
| A2.21   | Null Data Ou                                                        |       |    |       |         |       |
| A2.11   | Null Data Ou                                                        |       |    |       |         |       |

**Fix data warning in the file below**

6 Warnings • Tax Point Date is in the past. ⓘ

| Interim Transaction Id | Tax Period | Transaction Type | Transaction Category |
|------------------------|------------|------------------|----------------------|
| 235287                 |            | Purchase         |                      |
| 235288                 |            | Purchase         |                      |
| 235293                 |            | Purchase         |                      |

## 12.3.Rule C2.19 and C2.20

The logic for this rule is to identify and flag if an **Output** transaction falls either:

- **Before** the start date of the return period. (C2.19)
- **After** the end date of the current return period. (C2.20)

Example: C2.20

The screenshot displays the Comply software interface. At the top, a table lists various validation rules. The row for rule C2.20, 'Output Tax Point Date in the Future', is highlighted with a red box. Below this, a modal window titled 'Fix data warning in the file below' is shown, indicating '2 Warnings • Tax Point Date is in the future.' with a warning icon. Below the modal, a table lists transactions with columns for Interim Transaction Id, Tax Period, Transaction Type, and Transaction Category. Two transactions are listed: 235292 and 235297, both categorized as 'Sale'.

| Rule ID | Validation                                                           | Total | OK | Error | Warning | Errors |          |
|---------|----------------------------------------------------------------------|-------|----|-------|---------|--------|----------|
|         |                                                                      |       |    |       |         | Fixed  | Accepted |
| D2.03   | Duplicated Output Invoice Nr Same Vat Rate Or Same Vat Amount Return | 12    | 10 | 0     | 2       | 0      | 0        |
| C2.20   | Output Tax Point Date in the Future                                  | 12    | 10 | 0     | 2       | 0      | 0        |
| C2.05   | Valid Output Net Amount                                              | 12    | 11 | 0     | 1       | 0      | 0        |
| C2.11   | Valid Output VAT Amount                                              | 12    | 11 | 0     | 1       | 0      | 0        |
| H1.78   | Check Input DF Currency                                              |       |    |       |         |        |          |

| Interim Transaction Id | Tax Period | Transaction Type | Transaction Category |
|------------------------|------------|------------------|----------------------|
| 235292                 |            | Sale             |                      |
| 235297                 |            | Sale             |                      |

## 12.4. Rules D1.02 & D2.02

### 12.4.1. Error Visualisation Updates

When these rules are triggered and the user opens the error/warning pop-up, the following functionality is available:

- Sort/Filter - The user can Sort/Filter the displayed results as required.
- Eye Icon – The eye icon allows the user to open that row and view more detail.

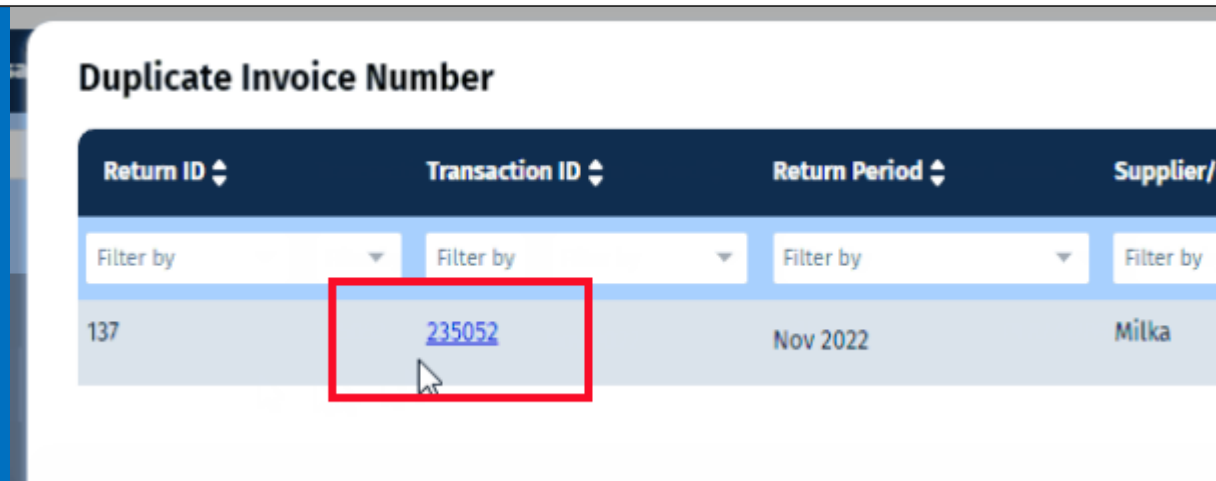

**Fix data warning in the file below**

8 Warnings • Duplicated Input Invoice Number With a Transaction In a Return For Another Period

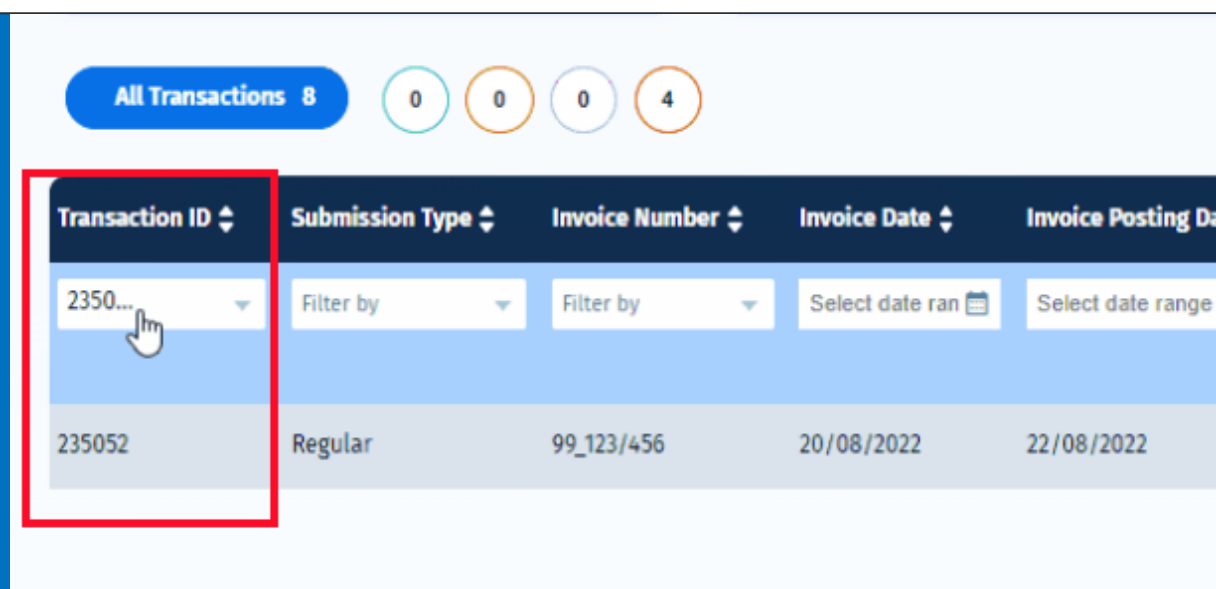

|                          | Interim Transaction Id | Tax Period | Transaction Type | Transaction Category | Goods Or Service |
|--------------------------|------------------------|------------|------------------|----------------------|------------------|
| <input type="checkbox"/> |                        | Filter by  | Filter by        | Filter by            | Filter by        |

| <input type="checkbox"/> | 234776                 |            | Purchase         |                      |                  |
| <input type="checkbox"/> | 234777                 |            | Purchase         |                      |                  |
| <input type="checkbox"/> | 234778                 |            | Purchase         |                      |                  |
| <input type="checkbox"/> | 234779                 |            | Purchase         |                      |                  |
| <input type="checkbox"/> | 234876                 |            | Purchase         |                      |                  |
| <input type="checkbox"/> | 234877                 |            | Purchase         |                      |                  |
| <input type="checkbox"/> | 234878                 |            | Purchase         |                      |                  |

### 12.4.2. [Duplicates Hyperlink](#)

When the user clicks the eye icon on the error pop-up screen, a hyperlink will be available, which will bring the user to the relevant return.

Once the user clicks on the hyperlink, the transactions tab will be auto filtered to display only that Transaction ID.

### 12.4.3. Logic Update

These Rules are checking for Duplicate Sales/Purchase Transactions in returns for other Periods. The rule logic has been updated to include checking:

- Self-Revisions - check the previous twelve months and check from the day of amendment up to present.
- Transactions with the same p\_invoice\_number **except where it says 'BRAK,brak'**

## 12.5. Rule H1.51 – Logic Update

This rule checks the **Transaction Entity Code** matches the **Return Entity Code**.

### New Logic:

- IF the Transaction Entity Code matches the Return Entity Code, then **Pass**.
- If the Transaction Entity Code doesn't match the Return Entity Code, **then check if they are part of the same VAT Group**, if they are, then pass, if they are not, fail.

## 12.7.Rule H1.80 – Logic Update

Check Reversed Transactions. The following new Logic has been included.

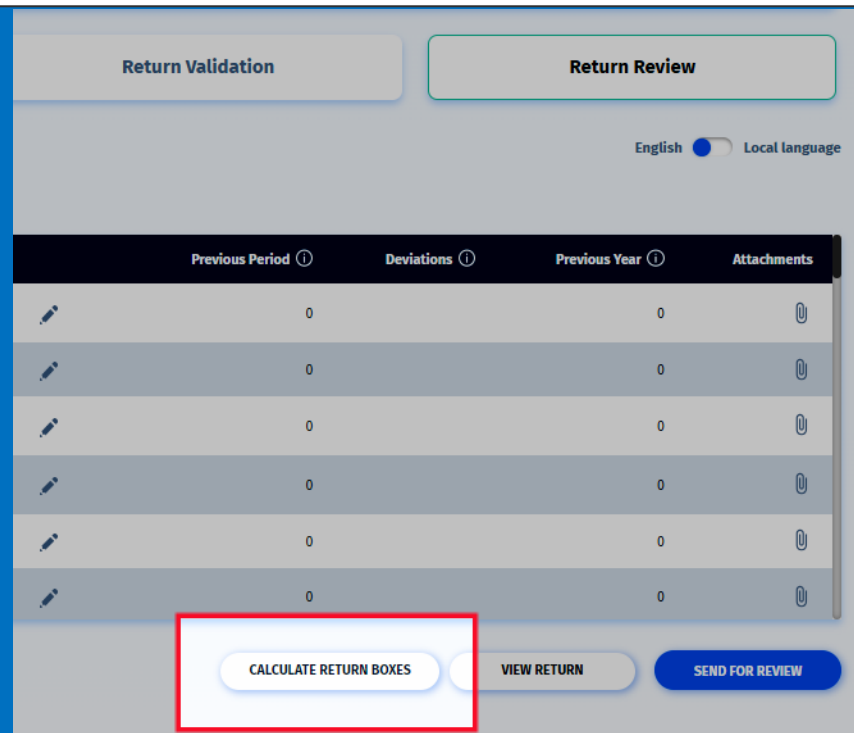

- If TBI Transaction Type is IN (P), search for a (PC) with the same invoice number and p\_supplier\_name and if their P\_net + PC\_net=0 and P\_VAT\_deductible + PC\_VAT\_DEductible=0 fail, else pass
- IF TBI Transaction Type is in (S) search for a (SC) with the same invoice number and s\_customer\_name and if their S\_net + SC\_net=0 and S\_Vat\_Amount + SC\_VAT\_Amount=0 fail, else pass

## 13. Return Review Tab

### 13.1. Create Return Boxes

The Create Return Boxes button has been renamed as:

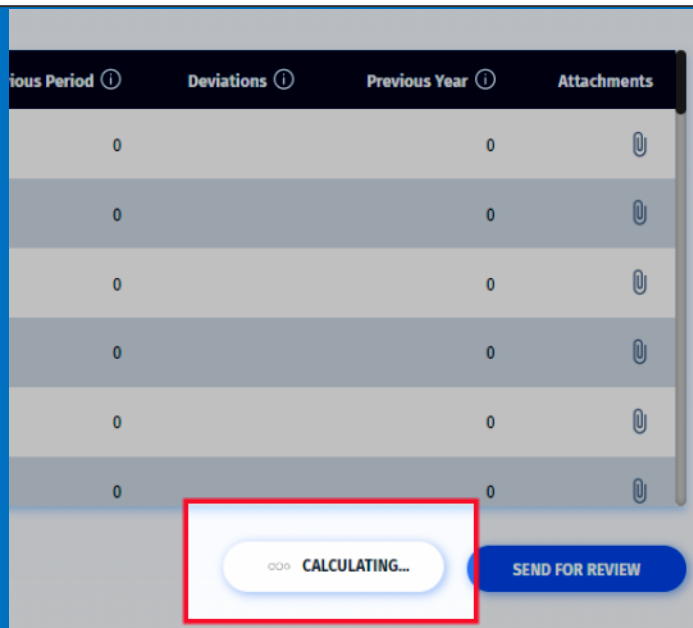

- Calculate Return Boxes

This is to ensure the user (Preparer/Reviewer) knows that this action performs a calculation of the boxes as opposed to creating new boxes.

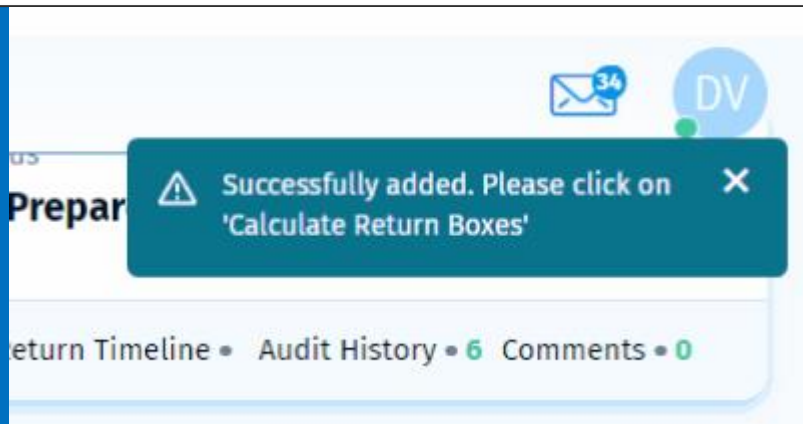

## 13.2.Calculating Button

When a user has made any modifications to transactions and the Data Validation has run, then on entering the Return Review Tab, then the “Calculate Return Boxes” button will display as **“Calculating”** while the calculation is still in progress.

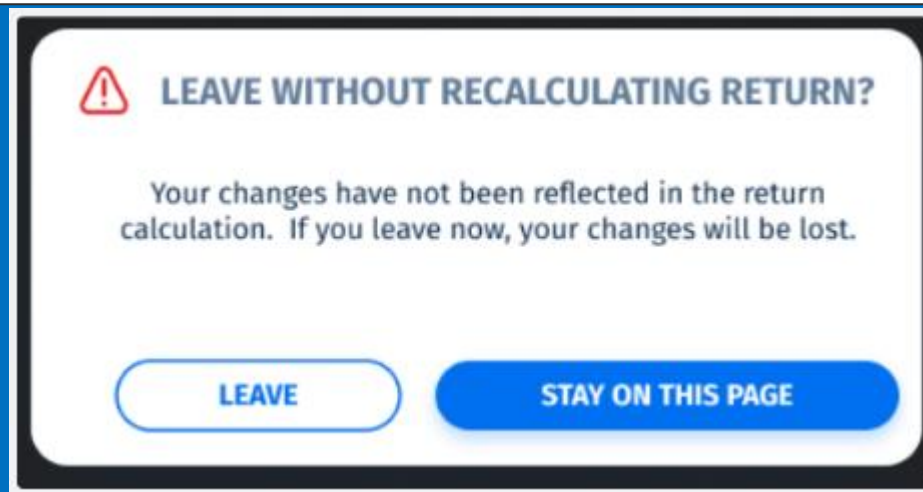

### 13.3. Adding Manual Adjustments

When a user makes a manual adjustment and clicks Save, a pop-up message is displayed to advise the user to click the Calculate Return Boxes.

### 13.4. Leave Without Recalculating Return Message

In the case where manual adjustments were made and the user tries to leave the page without clicking "Calculate Return Boxes", then the following prompt is displayed.

## 13.5. Highlight Manual Adjustment Values

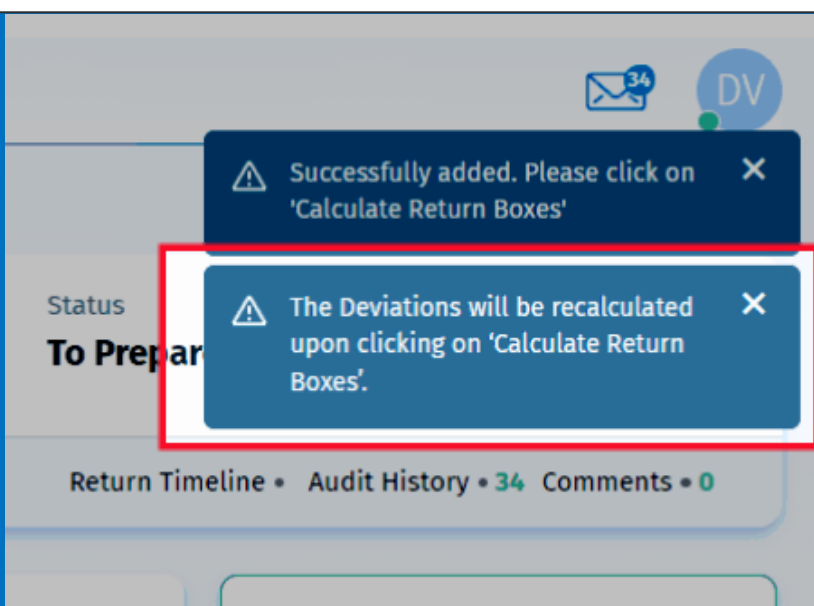

When the user makes manual adjustments, then the value is highlighted until the user clicks the "Calculate Return Boxes button.

Return Boxes

| Numerical Boxes |                                      | Non-Numerical Boxes |                 |                 |
|-----------------|--------------------------------------|---------------------|-----------------|-----------------|
| Box             | Description                          | Original Value      | Submitted value | Previous Period |
| Box 60          | Taxable supplies at a VAT rate of 7% | 850                 | 100             | 50%             |
| Box 70          | Another description                  | 209                 | 209             | 250             |
| Box 70          | Taxable supplies at a VAT rate of 7% | 555                 | 555             | 333             |
| Box 70          | Another description                  | 710                 | 710             | 400             |
| Box 70          | Taxable supplies at a VAT rate of 7% | 310                 | 410             | 205.00          |
| Box 70          | Another description                  | 120                 | 120             | 120             |
| Box 70          | Another description                  | 240                 | 240             | 800             |

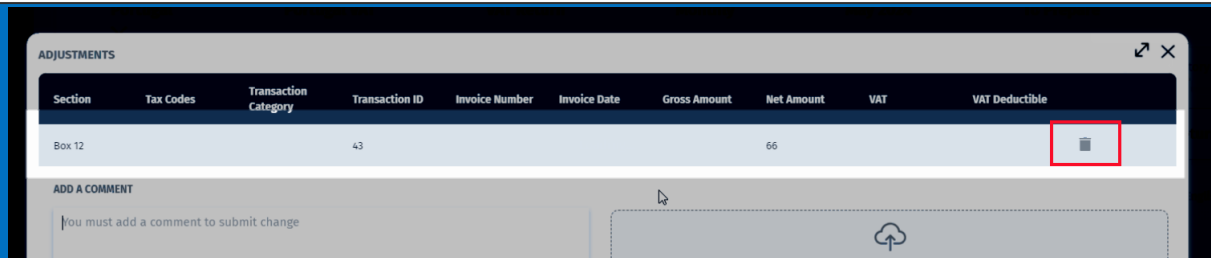

## 13.6. New Message for Deviations

When the user makes Manual Adjustments for the first time, the following Deviations message will be displayed.

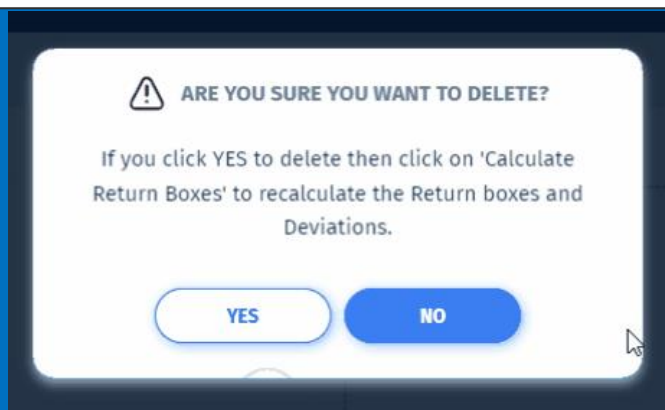

## 13.7. Deleting Manual Adjustments

When the user makes a manual adjustment, a Trash icon is displayed beside the adjustment.

When the user clicks on the Trash Icon, the following message is displayed.

## 14. Templates – Mandatory Fields

When preparing an existing/creating a new Template for VAT Return, the following are considered as Mandatory Fields when mapping. Each will be displayed with a Red Asterix to identify it as mandatory.

- Transaction type
- Tax Transaction Code
- Supplier VAT Number
- Customer VAT Number
- Supplier Invoice No
- Input Tax Point Date
- Customer Invoice No
- Output Tax Point Date
- Input Net Amount
- Input VAT Deductible Amount
- Output Net Amount
- Output VAT Amount
- Supplier Transaction Currency Name
- FX Conversion from local input curr to tax jur curr
- Customer Trans Currency
- FX conversion from local output curr to tax jur curr

The screenshot shows the 'Taxback International fields' form, Step 1 of 9. The form is divided into two columns. The left column contains fields for 'Entity Code', 'Tax Period', 'Tax Month', 'Transaction Category', and 'Tax Transaction Code'. The right column contains fields for 'Tax Jurisdiction ISO Code', 'Tax Year', 'Transaction Type', and 'Goods Or Services Category'. The 'Transaction Type' field is marked with a red asterisk, and the 'Tax Transaction Code' field is also marked with a red asterisk. Red arrows point to these two fields.

Please Note: NO Action is required for existing Templates (unless you navigate to the Existing Template menu – in this case you will see the new Mandatory fields and mapping will be required)

## 15. Transactions Tab

### 15.1. Editing Transactions

This update applies to Editing Transaction on both the Transactions Tab and on the Data Validation Pop-up.

#### 15.1.1. Transactions Tab

When the user clicks the Edit button on the Transaction Tab, all editable cells are open for editing (The user does not need to manually select a transaction to edit using the check boxes). Instead when the user types in an editable cell, that transaction is automatically selected (Check box is checked).

The screenshot shows the 'Transactions' tab in a software interface. At the top, there are three tabs: 'Files', 'Data Validation' (with a warning icon), and 'Transactions' (which is active). Below the tabs, there's a summary bar showing 'All Transactions 36' and four circular progress indicators. A 'Rule Filter' button is on the right. The main area is a table with columns: Transaction ID, Submission Type, Invoice Number, Invoice Date, and Invoice Posting. The table has several rows. The row with Transaction ID 234312 is highlighted. In this row, the 'Invoice Number' field contains the text 'pass' and is being edited. A red dashed arrow points from the 'pass' text to the checkbox in the first column of the same row, which is also highlighted with a red box. Other rows show Transaction IDs 234300, 234310, and 234305, all with 'Regular' submission types and 'pass' in the 'Invoice Number' field.

| Transaction ID | Submission Type | Invoice Number | Invoice Date | Invoice Posting |
|----------------|-----------------|----------------|--------------|-----------------|
| 234300         | Regular         |                | Select Date  | Select Date     |
| 234312         | Regular         | pass           | 11/09/2022   | 11/09/2022      |
| 234310         | Regular         | pass           | 11/09/2022   | 11/09/2022      |
| 234305         | Regular         | pass           | 11/09/2022   | 11/09/2022      |

### 15.1.2. Data Validation Pop-up

When the user clicks an Error/Warning on the data validation screen, and opens the Pop-up and clicks the Edit button, all editable cells are open for editing (The user does not need to manually select a transaction to edit using the check boxes). Instead when the user types in an editable cell, that transaction is automatically selected (Check box is checked).

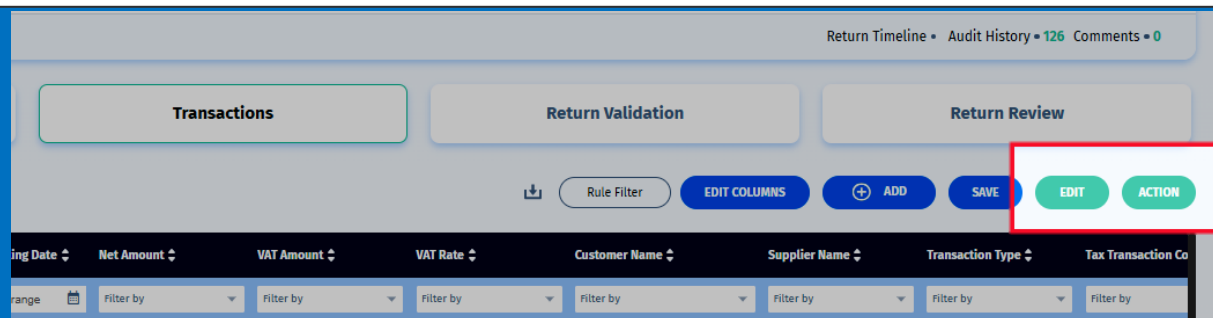

**Fix data warning in the file below**

! 15 Warnings • VAT Deductible on Output transaction ⓘ

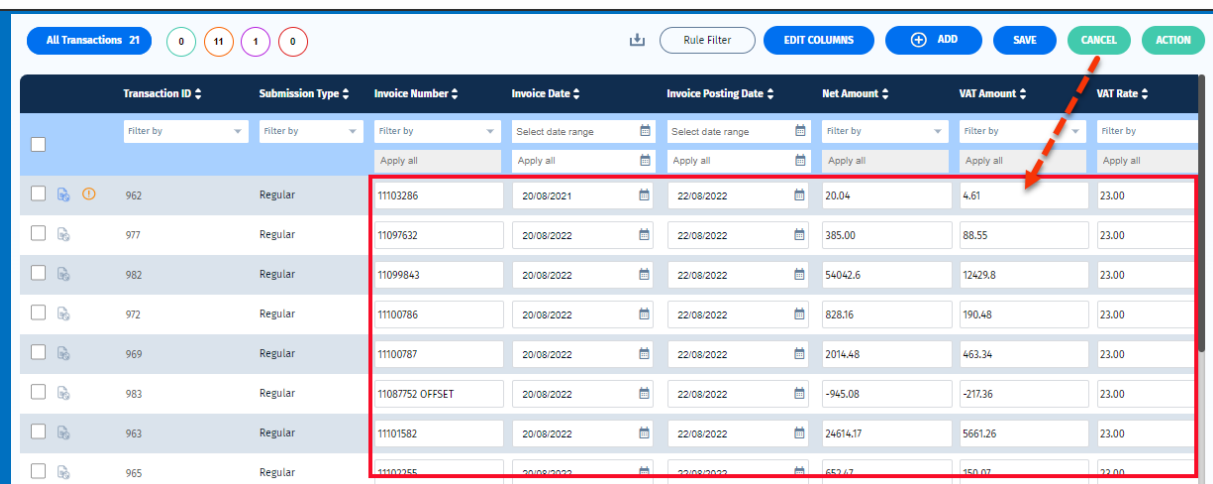

|                                     | Interim Transaction Id | Tax Period | Transaction Type | Transaction Category |
|-------------------------------------|------------------------|------------|------------------|----------------------|
|                                     |                        | Filter by  | Filter by        | Filter by            |
| <input type="checkbox"/>            |                        | Apply all  | Apply all        | Apply all            |
| <input type="checkbox"/>            | 234319                 |            | Sale             |                      |
| <input type="checkbox"/>            | 234320                 |            | Sale             |                      |
| <input type="checkbox"/>            | 234322                 |            | Sale             |                      |
| <input type="checkbox"/>            | 234323                 |            | Sale             |                      |
| <input checked="" type="checkbox"/> | 234324                 |            | Sale             |                      |
| <input type="checkbox"/>            | 234325                 |            | Sale             |                      |
| <input type="checkbox"/>            | 234326                 |            | Sale             |                      |

## 15.2. Edit Functionality Update

When the user (Preparer/Reviewer) navigates to the Transactions Tab, the Edit and Action buttons are always available.

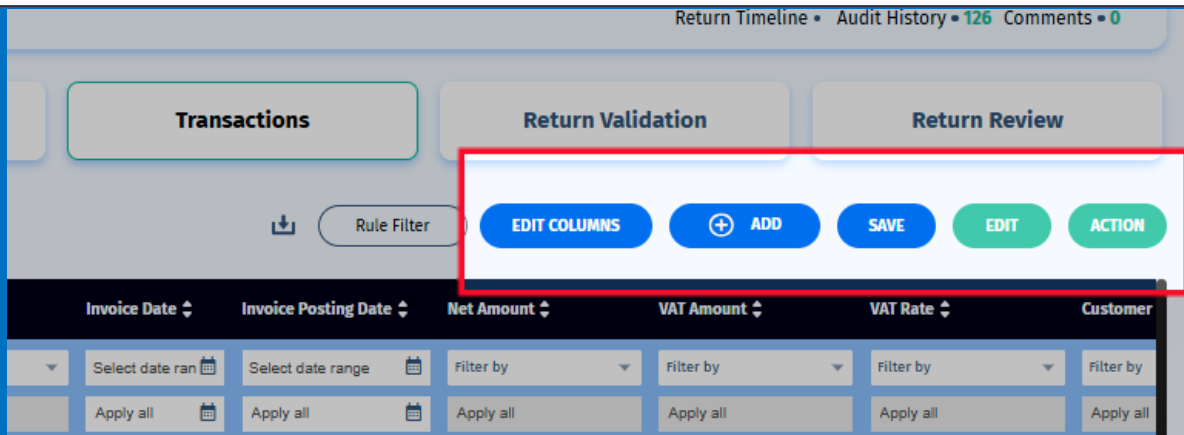

When the user clicks on the Edit button, then all editable fields (regardless of transaction/checkboxes) are opened for editing.

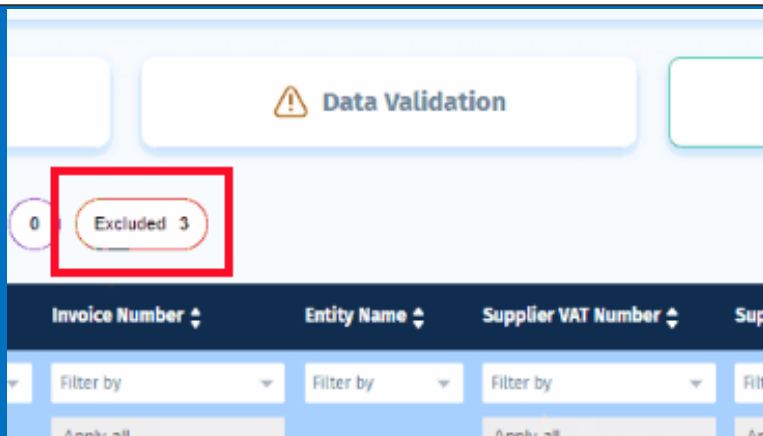

## 15.3.Reordering of Buttons

For a more intuitive experience, the buttons have been reordered on the Transaction Tab, and will now display as follows for the Preparer/Reviewer.

## 15.4.Excluded Transactions

When the user is in the Excluded Transactions Tab, then the Edit button is disabled.

The user can Hover over the button which reveals the following prompt...

“To enable Editing, include the transactions in the Return”.
